Table 134: Percentage of high school students who they themselves or someone in their home ever tested positive for COVID-19.....	134

INTRODUCTION

Priority health risk behaviors (i.e. preventable behaviors that contribute to the leading causes of morbidity and mortality) are often established during childhood and adolescence and extend into adulthood. Ongoing surveillance of youth risk behaviors is critical for the design, implementation, and evaluation of public health interventions to improve adolescent health. The Youth Risk Behavior Survey (YRBS) is a national surveillance system that was established in 1991 by the Centers for Disease Control and Prevention (CDC) to monitor the prevalence of health risk behaviors among youth. The Nevada High School YRBS is a biennial, anonymous, and voluntary survey of students in 9th through 12th grade in regular public, charter, and alternative schools. Students self-report their behaviors in six major areas of health that directly lead to morbidity and mortality; these include:

- 1) Behaviors that contribute to unintentional injuries and violence;
- 2) Sexual behaviors that contribute to human immunodeficiency virus (HIV) infection, other sexually transmitted diseases, and unintended pregnancy;
- 3) Tobacco use;
- 4) Alcohol and other drug use;
- 5) Unhealthy dietary behaviors; and
- 6) Physical inactivity.

In 2021, 36 high schools were randomly chosen by the CDC to represent Nevada. To ensure greater representation from schools in all districts, the Nevada Division of Public and Behavioral Health contracted with the University of Nevada, Reno School of Public Health to conduct the YRBS in all high schools throughout the state. The 2021 Nevada High School YRBS provides statewide data to assess priority health-risk behaviors among high school students, measures progress toward achieving national health objectives for *Healthy People 2030* and other program and policy indicators, and evaluates the impact of school and community interventions at the national, state, and local level. It is our intention that these data will be used by education and health professionals, policy makers, community members, and researchers to improve the health of Nevada's high school students.

METHODS

Sampling, Weighting, and Analysis

The 2021 Nevada YRBS sampling plan was designed to ensure that every eligible student had an equal chance of selection. A random cluster sample design was used to produce a representative sample of students in grades 9–12 (from all Nevada regular public, charter, and alternative high schools). In order to provide regional data that represent all counties in the state, all 17 school districts were grouped into 8 regions that generally reflect the Nevada Statewide Coalition Partnership (Table 1). The regional grouping also helped ensure that individual schools could not be identified. Next, classes were randomly selected within every school with the probability based on a required margin of error in the sample size for each region. Intact classes of either all

second period or all required English courses were randomly selected from each school. The questionnaire was administered to all students in sampled classes from September 2021 to December 2021. The 2021 Nevada YRBS administration was delayed from the spring semester to the fall semester due to the COVID-19 pandemic and subsequent school closures. Additionally, certain questions asking about events that occurred on school property were removed from the 2021 YRBS due to the COVID-19 pandemic-related school closures (Table 2).

The 2021 Nevada YRBS data in this report were weighted based on the sex, race/ethnicity, and grade level of students in each region. The weighting process ensured that the estimates accurately represent the entire student population in each region and the state as a whole. Non-response or poor sampling procedures can result in a sample that is not a representative subset of the population; therefore, un-weighted results from these samples may not accurately reflect student behaviors and could be misleading. This report only displays weighted results.

NOTE: Because 2021 YRBS data were collected spring semester rather than fall semester, the students were younger on average. Age can influence the risk behavior prevalence estimates. When comparing 2021 data to other years, please refer to the UNR trend reports which weight the data by age for all years compared.

Table 1: 2021 YRBS sampling regions and Nevada Statewide Coalition Partnership

Region	School District	# Schools	Nevada Statewide Coalition Partnership
1	Carson City	2	Partnership Carson City

3	Elko County White Pine County Eureka County	11	PACE Coalition
4	Churchill County Humboldt County Pershing County Lander County	5	Churchill Community Coalition Frontier Community Coalition
5	Lyon County Mineral County Storey County	7	Healthy Communities Coalition
6	Nye County Lincoln County	7	Nye Communities Coalition
7	Washoe County	18	Join Together Northern Nevada
8	Clark County	48	Care Coalition PACT Coalition

Table 2: School-property related questions removed in 2021 due to COVID-19 school closures

Section	Question
Violence-related behaviors	During the past 12 months, how many times has someone threatened or injured you with a weapon such as a gun, knife, or club on school property?
	During the past 12 months, how many times were you in a physical fight on school property?
	During the past 12 months, have you ever been bullied on school property?
Other Drug Use	During the past 12 months, how many times did you attend school under the influence of alcohol or other illegal drugs, such as marijuana or cocaine?
Physical Activity	During the past 12 months, on how many sports teams did you play?

Permission Status and Response Rates

The Nevada legislature passed SB69, which requires Nevada public, charter, and alternative secondary schools to participate in the Nevada YRBS. SB69 also requires passive parental permission for YRBS participation. Passive parental permission means the students take a permission form home and return it only if their parent or guardian does not want them to participate in the survey. In 2021, 15 of the 16 school districts with high schools participated in the High School YRBS and only 4 schools did not participate (101 potential respondents). Overall, 4,827 students from 97 schools completed the survey. Table 3 shows school district and overall response rates.

Table 3: 2017, 2019, & 2021 YRBS response rates by school district

District	2017 YRBS Response Rate	2019 YRBS Response Rate	2021 YRBS Response Rate
Carson City School District	74.6%	87.3%	72.4%
Churchill County School District	84.4%	87.7%	57.9%
Clark County School District	61.1%	61.8%	67.6%
Douglas County School District	51.6%	63.4%	80.7%
Elko County School District	81.6%	78.7%	65.2%
Eureka County School District	71.4%	96.7%	0.0%
Humboldt County School District	91.3%	85.0%	62.9%
