

HIV modernization

1. Allow for street based testing for HIV/Hep C
 - a. Testing in homes, at shelters, on the street where ever people are.
 - b. House the tester under a clinic CLIA license
2. Eliminate the barriers that insurance carriers put on medications
 - a. Make it just like Medicaid, they have to cover all meds 90 days after market approval
3. Update sex education in public schools
 - a. Abstinence based counseling is not enough
 - b. Could make it an opt out class if parents object
4. Provide grant funding for innovations in testing and treatment
 - a. Put testing/treatment centers where people live
 - b. Staff with community
5. Same day Medicaid eligibility for HIV + that are newly diagnosed
6. Opt out testing for everyone who gets booked into any level of detention
7. Funding for a telemed network of providers rural communities.
