— No reported cases, Rates were not calculated and no ranking is available.

\* U.S. cases for notifiable diseases are unavailable for 2008.

\*\* These diseases are only reportable in Nevada and are NOT national notifiable diseases.

\*\*\* Not a national notifiable disease in 2004.

† The rates are per 100,000 population. Nevada population estimates for 2004 (2,404,191), 2005 (2,509,637), 2006 (2,623,050), 2007 (2,718,336) and 2008 (2,738,733) used in the calculation of rates were provided by the Nevada State Demographer.

†† Influenza all types includes type A, B, and type unknown.

‡ The numbers for 2008 are preliminary until final comparison with Centers for Disease Control and Prevention publication.

‡‡ National numbers are unavailable for 2004-2007.

¶ Includes E-coli O157:H7; shiga toxin-positive, serogroup non-O157; and shiga toxin-positive, not serogrouped.

¶¶ Became a national notifiable disease in 2007. Includes infections attributable to other Vibrio species non *Vibrio cholerae*.

NOS - not otherwise specified.

Source: 1 - NEDSS (National Electronic Disease Surveillance System) Information System, 2005 to date - except Clark County.

2 - NETSS (National Electronic Telecommunications System for Surveillance) Information System, 2000 to 2004 for all Counties and 2000 to date for Clark County.
