- Over 30 State Agencies
- Department of Health and Human Services
  - Substance Abuse and Mental Health Services (SAMHSA)
  - National Institutes for Health (NIH)
  - Centers for Medicare & Medicaid Services (CMS)
  - Centers for Disease Control and Prevention (CDC)
  - Office of the National Coordinator (ONC)

# WITS History

*A workflow driven, configurable solution for behavioral health and the grants and social service areas that touch behavioral health; including Medicaid, third-party, patient and state funded billing, with multi-level reporting and data access.*

- ❑ 2001-2003: SAMHSA invested \$7M
  - TEDS/NOMs data collection; FEi added treatment health record workflow
- ❑ Initial Pilots: AK, IA and Salt Lake County (2004)
- ❑ Now 33 installations, over \$40M in combined, collaborative development
- ❑ Fully HIPAA and 42 CFR pt 2 compliant, with role-based security access for users and consent/referral for client data sharing
- ❑ Data Warehousing with integration to various systems and extensive reporting

# WITS Data --→ Information

## *Turning Data*

Substance Abuse Data Collection

Grants Management

Court and Justice Systems

SUD Prevention

Statewide Waitlist

ASAM CONTINUUM integration

Billing and Claims

- Third Party/Medicaid
- Self Pay
- State Funded

Provider Compliance

## *into Information*

*Effect of Prevention Services on Treatment Admissions by Region*

*Highest utilizers by region/client type*

*Level of Care assessment versus client assignment*

*Outcomes versus \$ Spent on Programs, by type or level of care*

*Areas of state with highest need vs available programs*

*Impact of Recovery services when combined with treatment services for specific clients*

*Wait times for assessed level of care by region or provider*

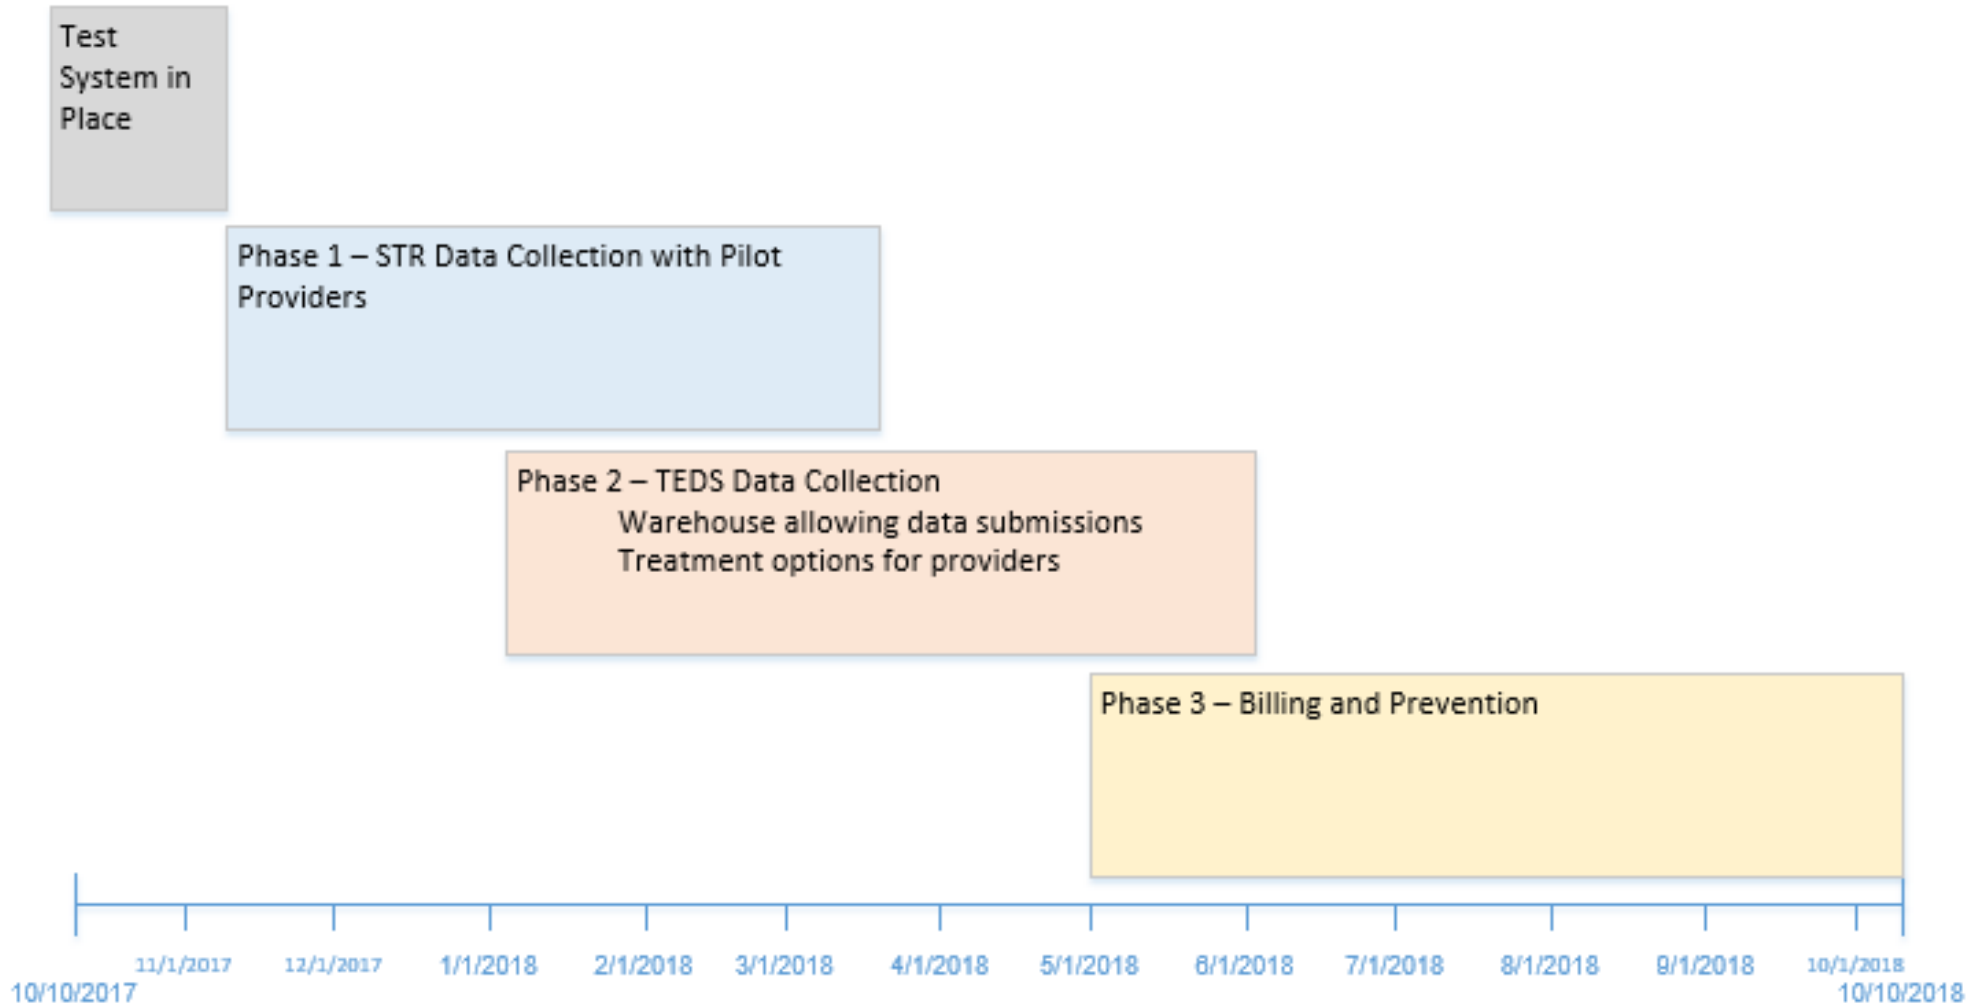

*Provider engagement and success*

*State funding saved with Medicaid expansion*

## *Nevada's Desired End Goals:*

- Data collection and reporting to support the STR grant
- Integrated, Web-based Data Collection, Storage and Reporting System for TEDS/NOMs (SUD and MH), and State-wide Prevention data
- Robust and Flexible Enterprise Reporting
- EHR for Providers who don't already have one
- Data Privacy, Security, and Confidentiality
