State of Nevada Department of Health and Human Services

The State of Nevada Connecting the Recommendations Utilizing the Epidemiological Profile, the Evidence Base Practice Programs, the Statewide Epidemiological Organizational Workgroup, and the Prevention Coalitions and Community Providers

Behavioral Health Wellness & Prevention

Antonia Capparelli-Twait, Health Program Specialist I

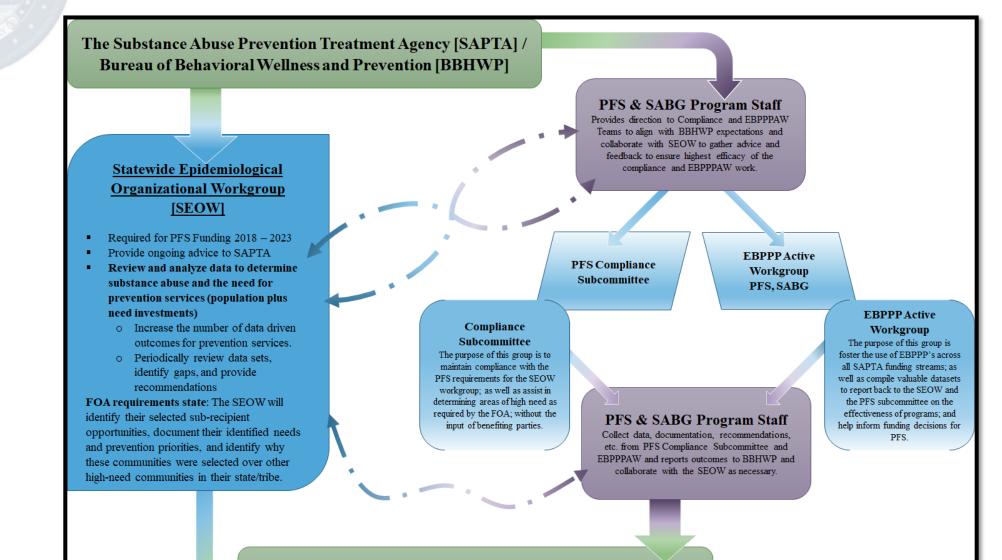

Helping people. It's who we are and what we do.

Agenda

- 1. The NEW Process Map for SEOW
- 2. Substance Abuse Prevention, Treatment, Opioid Response Team Grants and Funding Programs
- 3. Nevada Epidemiological Profile
- 4. Key Findings Associated to PFS, SABG, SOR, and SAPP Grants
- 5. SEOW Review and Provides Recommendations
- 6. EBPPPAW Review and Provides Recommendations
- 7. EBP Programs
- 8. Connecting the State, SEOW, EBPPPAW, and Prevention Coalitions

The NEW Process Map for SEOW

The Substance Abuse Prevention Treatment Agency [SAPTA] / Bureau of Behavioral Wellness and Prevention [BBHWP]

Substance Abuse Prevention, Treatment, and Opioid Response Team Grants and Funding Programs

Bureau of Behavioral Health Wellness and Prevention (BBHWP), Substance Abuse Prevention, Treatment, and Opioid Response Team manages various funding sources for substance use treatment and prevention services.

Grants and Funding Programs

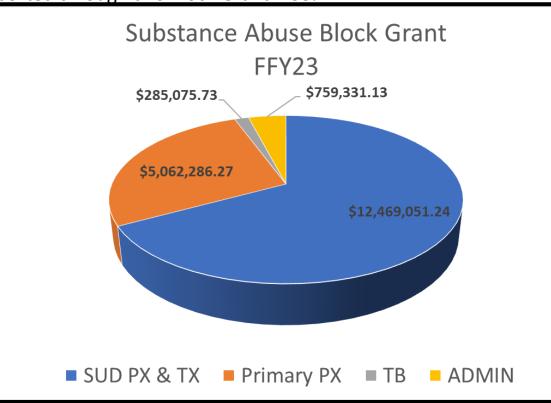

- Substance Abuse Prevention and Treatment Block Grant (SABG)
- Strategic Prevention Framework-Partnership for Success Grant (PFS)
- State Opioid Response (SOR)
- Substance Abuse Primary Prevention (SAPP) General State Fund

Substance Abuse Prevention and Treatment Block Grant (SABG)

The information displayed is for FFY23. The dollars on the left indicate the subgrant award amount. These services are for substance use prevention and treatment programs.

Regional Behavioral Health Coordinators supported through this Block Grant – 33%

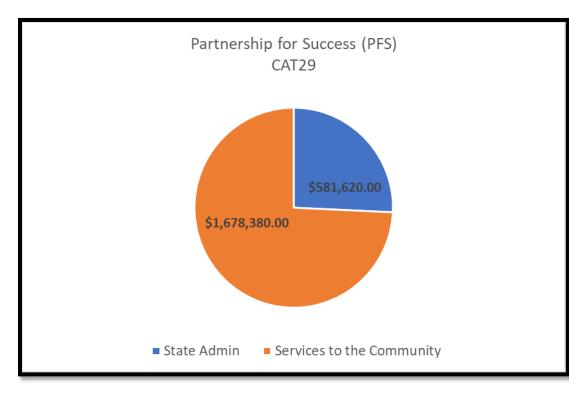

CCC of SNV	s	40,000
Ridge House	s	1,944,000
Westcare	s	5,550,410
Living Free Health & Fitness	s	368,365
8th Judicial	s	788,971
New Frontier	s	134,250
Step 2	s	68,250
CARE	s	473,000
Churchill	s	204,000
Frontier CC	s	204,000
нсс	s	243,000
JTNN	s	288,000
NyeCC	s	270,000
PACE	s	248,000
PACT	s	622,000
PCC	s	211,000
PDC	s	239,000

Strategic Prevention Framework-Partnership for Success (PFS) Grant

The PFS grant funds initiatives to help reduce the onset and progression of substance misuse between the ages of 9 to 20, by supporting the delivery of community prevention services.

CARE Coalition	\$ 260,621
Churchill Community Coalition	
	\$ 97,015
Frontier Community Coalition	
	\$ 102,301
Healthy Community Coalition	
	\$ 119,964
Join Together Northern Nevada	
	\$ 167,838
Nye Community Coalition	\$ 217,181
PACE	\$ 172,677
PACT Coalition	\$ 336,767
Partnership Carson City	\$ 114,942
Partnership Douglas County	\$ 89,074

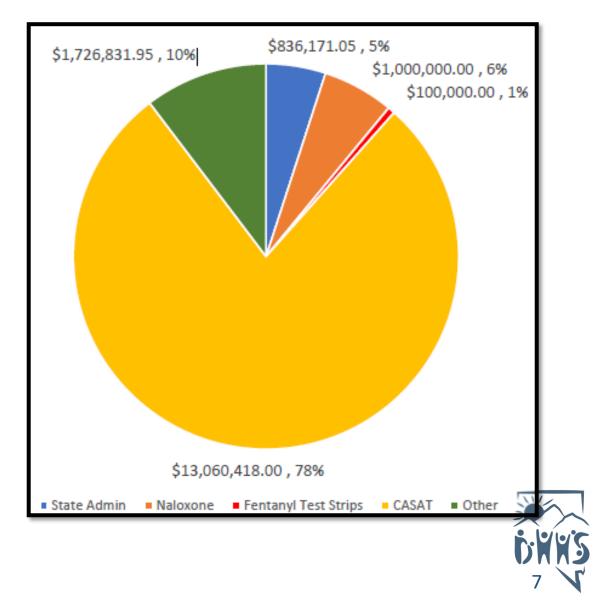

State Opioid Response (SOR)

CASAT houses the Project Coordinator for the State Opioid Response (SOR) grant. -oversight on the harm reduction survey -readiness of the survey -overall data support

CASAT works directly with community entities at both the local and state level. They also conduct and disseminate the suicide prevention learning tool.

CASAT is the central distribution location for naloxone and fentanyl test strips purchased with SOR dollars. Those items are distributed directly t the community.

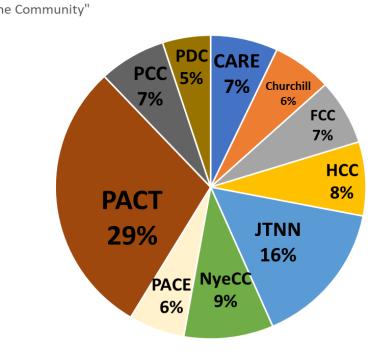

Regional Behavioral Health Coordinators Supporting through this grant 34%

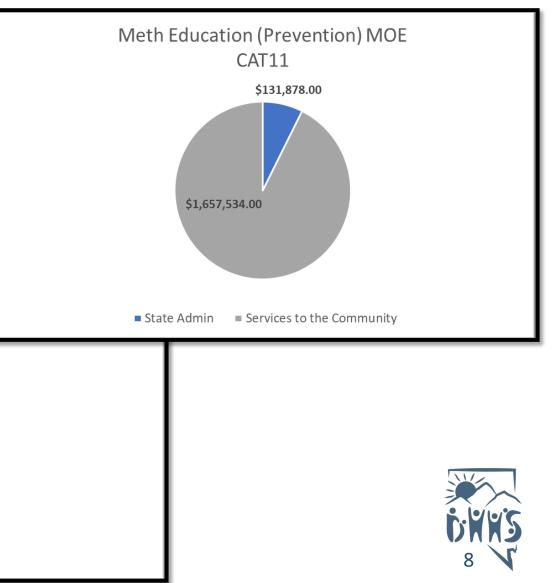

Substance Abuse Primary Prevention (SAPP) General State Fund

Maintenance of Effort (MOE): Substance Abuse Block Grant (SABG) requires t State to demonstrate that State general fund dollars are also utilized to support Block Grant activities.

Education & Awareness on Methamphetamine MOE CAT11 "Services to the Community"

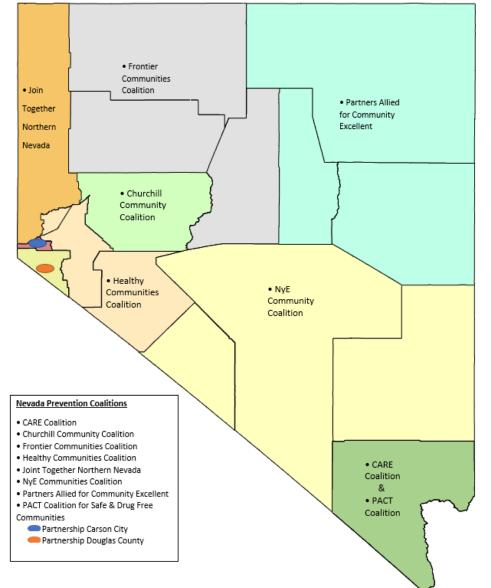

Nevada Epidemiological Profile

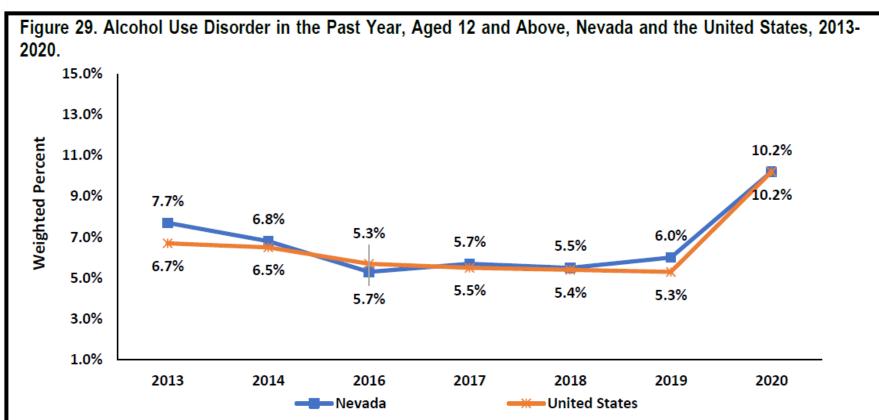

Key findings in the 2021 Epi Profile Report:

Substance Use

- Alcohol use disorder among ages 12 and above reached a high in Nevada and the United States in 2021 (NSDUH).
- Nevada Adult BRFSS survey respondents reported marijuana/hashish use has continued to rise since 2013 (BRFSS).
- The most common substance listed in cause of death in 2021 is opioid, type not specified, followed by methamphetamine (Deaths).

Key Findings Associated to PFS and SABG Grants

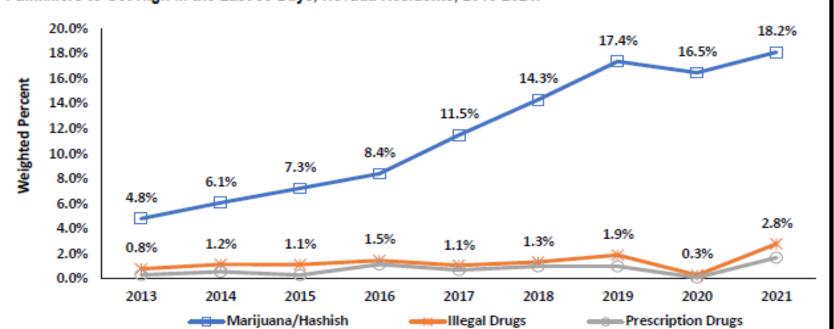

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Surveys on Drug Use and Health. Chart scaled to 15.0% to display differences among groups.

Alcohol use disorder among adolescents and adults in the past year increased from 6.0% in 2019 to 10.2% in 2020 for Nevada. This increase is also seen in the United States from 5.3% in 2019 to 10.2% in 2020.

Key Findings Associated to PFS and SABG Grants

Figure 47. Percent of Adult BRFSS Respondents Who Used Marijuana/Hashish, Illegal Substances, or Painkillers to Get High in the Last 30 Days, Nevada Residents, 2013-2021.

Source: Behavioral Risk Factor Surveillance System.

Chart scaled to 20.0% to display differences among groups.

Specific question asked in survey: "During the past 30 days, on how many days did you use marijuana or hashish/any other illegal drug/ prescription drugs without a doctor's order, just to "feel good," or to "get high"?"

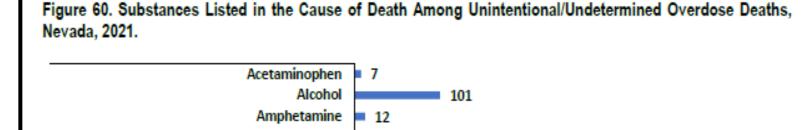

Marijuana use has more than tripled since 2013. In 2021, 18.2% of respondents reported to have used marijuana in the past 30 days, up from 4.8% in 2013. Self-reported use of marijuana has increased, as expected, since recreational marijuana use was legalized in Nevada in 2017. Of Nevadans surveyed, 0.8% (on average) used prescription drugs to get high in the last 30 days and 1.3% used other illegal drugs to get high in the last 30 days.

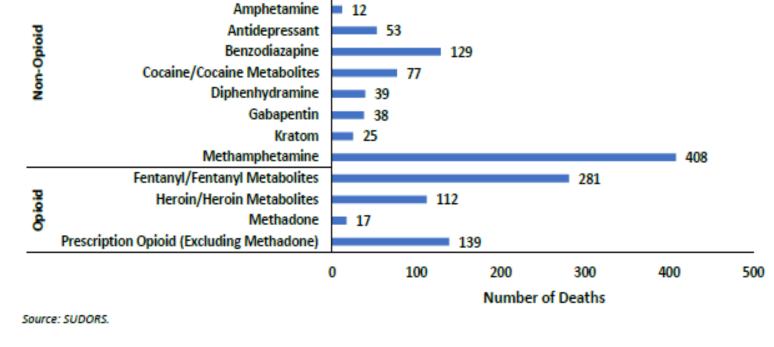

Key Findings Associated to SOR and SAPP Grants

For 2021, the most common substances listed in cause of death is opioid (type not specified, 63.5%), followed by methamphetamine (53.1%). Since a person can have more than one drug in their system, these counts are not mutually exclusive.

Statewide Epidemiological Organizational Workgroup (SEOW) Reviews and Provides Recommendations

Recommendations

It was identified that Amy Lucas from the NV Office of Analytics will manage the production of the next Epi Profile.

Here are some items the SEOW thought would be important to include in the next Epi Profile:

- Mortality rates focused on Substance use and mental/behavioral health
- Adverse Childhood Experiences (ACES)
- Emergency Department encounters related to substance use & mental/behavioral health
- Consequence data related to substance use and misuse
- PRAMS data
- Resilience data
- If possible, we would like to see this data aggregated before and after COVID (3/1/2020) and perhaps a timeline of significant dates related to COVID mandates and surges/resurges.

EBPPPAW First Evaluation Review 2020 - 2021

Results

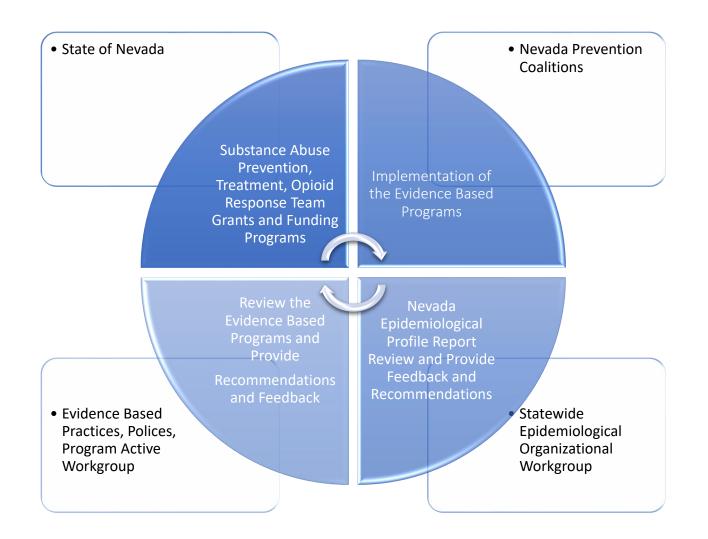

- 10% of reviewed programs (3) were found to be Approved EBPs with all supporting documentation as required by the EBPPP Proposal and Review Form.
- 20% of reviewed programs (6) were found to be Waiver Approved programs, which includes three different categorizations of Waiver program
- 67% of review programs (20) were found to be Provisional Waiver programs, which includes three different categorizations of Provisional Waiver programs
- 3% of reviewed programs (1) were reported as Non-EBP or Not Approved, which w as a result of the selected program not being implemented by the Prevention Coalition during FY-2021.

Recommendations

- Developing and implementing more EBP programs and improve alignment of Waiver Approved programs to the EBP literature and best practices. The goal of this approach is to connect proposals and scopes of work to actionable evaluation and compliance monitoring related to EBP implementation and administration to ensure PFS and SABG funding is impacting identified target populations.
- The Bureau has invested in external monitoring and evaluation with support of Strategic Progress, LLC to maintain compliance, align programming with Strategic Plans and statewide goals, develop standardized data collection instruments, and publish various reports and guidance documentation to support PFS and SABG funded programs.
