# Purpose & Goals

The SAPTA SOR program works to develop and provide opioid or stimulant misuse prevention, treatment, harm reduction, and recovery support services for the purpose of addressing the opioid or stimulant abuse and overdose crisis in states, including cocaine and methamphetamine. The State of Nevada's needs align with SAMHSA's strategic initiatives.

- A. GOAL 1:** Ensure there is a continuum of high-quality recovery support and care to achieve and maintain stability.
- B. GOAL 2:** Ensure individuals have access to appropriate, timely services in the most integrated setting based on a self-determination plan.
- C. GOAL 3:** Ensure a system that prevents inappropriate incarceration, hospitalization, institutionalization, or placement.

# General Scoring Rubric

Weak 20%

Basic 40%

Average 60%

Strong 80%

Excellent 100%

# Project Design and Implementation

- How well does the applicant describe the description of their program and how it meets the NOFA requirements which includes the Target Population and geographic area served?
- How well does the project address the community needs?
- How well does the applicant tie project deliverables to objectives to include:
  - 1) how many individuals will be targeted; the target population or subpopulation;
  - 2) key priority service areas;
  - 3) how they will meet the deliverables;
  - 4) Evidence-based practice to be implemented
  - 5) capacity of organization (i.e. number of staff/beds, etc.)

# Scope of Work

To be considered excellent:

The Scope of Work must identify a goal that is consistent with the narrative; identify the objective with states how the goal will be accomplished; identifies at least one if not more specific activities to achieve that goal; the timeframe to submit; and the documentation required to provide that detail.

Data collection activities are not goals or objectives, but could be included in strategies. The documentation is specific to what is going to be provided to prove that the metric was met (i.e. provide services for 20 women, the documentation would need to provide unduplicated number of women, demographics, services provided)

How well does the applicant describe the process for collecting data? For a score of excellent, applicant should describe who is collecting the data, the system to collect data, whether the agency has an electronic health record system, and how that data will be used?

How well does the applicant describe the project performance measures; who will be responsible for project performance; and how that information will be used to evaluate the project impact. Note: Data Collection is not project measurement.

## Plan for Collecting Data

## What is GPRA?

## What is client-level data?

- All sub-awardee organizations will be required to submit monthly progress reports.
- Additionally, all organizations providing opioid use disorder treatment will need to complete the SOR Client-Level Data Collection Tool (GPRA) at baseline, six-month follow-up, and discharge for all clients served with funding and report data. The Tool is estimated to take 45 minutes to complete.
- To see the types of questions included in the tool, visit <https://www.samhsa.gov/grants/gpra-measurement-tools/csat-gpra/csat-gpra-discretionary-services>.

# Budget

- How well does the proposed budget support the proposed goals and objectives outlined in the Scope of Work?
- How reasonable are the number of services being provided and the percentage of third-party liability for direct services?
- Given the project period, rate your confidence in the applicant's ability to provide the projected number of services with the budget amounts requested.
- Does the budget address implementation and start-up time (time to bring on board new hires)?
- 2 CFR Section 200.68 – Modified Total Direct Cost – specific to Indirect Cost  
Rate (ensure compliance). Note: This applies to both de minimis rate of 10% and audited rates.
- Must be specific to the deliverables of the grant.

<https://ecfr.io/Title-2/Part-200>

- Amphetamine diagnosis would be allowable.
- Cocaine and Methamphetamine are considered stimulants under this grant.
- Sustainability means the ability to keep the program going to some level, with other funding. To not be dependent on the grant indefinitely.
- Grant should be written for nine-months for year 1.
- Sliding scale fee should be used in all cases.
- This grant can be either FFS or a cost-reimbursement grant; following SAPTA's FFS amounts.
- All applications will be considered.
- The grant does not cover services that are otherwise billable.
- Justification for all positions is required in the Budget.
