

## Errata for R11-20

**Sec. 3. 1.** *An examination conducted pursuant to NRS 433A.165 must include, without limitation, an assessment of whether the person alleged to be a person in a mental health crisis is experiencing the symptoms of intoxication or withdrawal from alcohol or another drug. If so, ~~the physician,~~ **the physician** assistant or advanced practice registered nurse conducting the examination may include in the examination a quantitative measurement of the concentration of alcohol in the blood of the person alleged to be a person in a mental health crisis.*

**Sec. 8. ~~4.~~ 5.** *As used in this section, “director” means:*

**(a)** *The ~~medical director~~ **administrative officer** of a division facility as defined in NRS 433A.012; or*

**(b)** *The person in charge of the provision of care to patients at any other public or private mental health facility or hospital*

Rationale:

Sec. 3: The addition of “the physician” is meant to bring the section in line with the rest of the regulation. The omission of “the physician” was an oversight in drafting.

Sec. 8: The removal of “medical director” and addition of “Administrative officer” is meant to bring the regulations into conformity with the structure of Division facilities and the duties of the administrative officer of the facilities.
