

LEGISLATIVE 2015 HEALTH PROFILES

Nevada Senate District 16

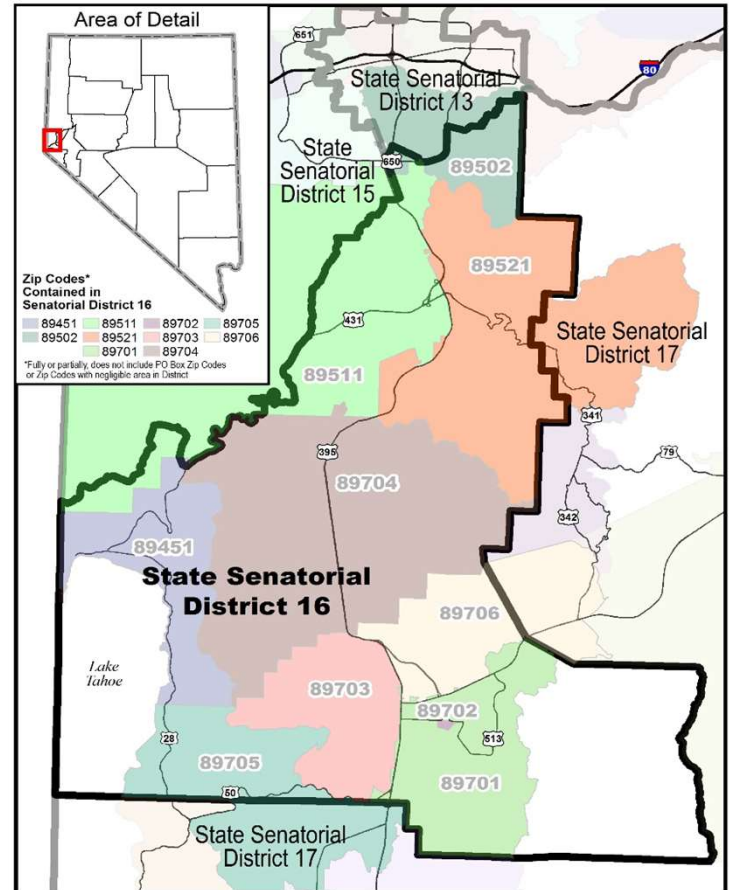

This Senate District Health Profile provides data on key health topics for the approximately 136,055 adults and children living in Nevada Senate District 16 in 2015. Estimates are based on the data available from Office of Public Health Informatics and Epidemiology (OPHIE).

Death ¹	Senate District	Nevada
Heart Disease	181.1 (167.8 - 194.3)	192.8 (189.8 - 195.7)
Cancer	183.6 (170.2 - 196.9)	164.3 (161.6 - 167.1)
Chronic Lower Respiratory Disease	53.5 (46.3 - 60.7)	52.1 (50.6 - 53.6)
Accidents	40.7 (34.4 - 46.9)	39.3 (38.0 - 40.7)
Stroke	34.6 (28.8 - 40.4)	32.2 (31.0 - 33.5)
Influenza and Pneumonia	17.7 (13.5 - 21.8)	20.5 (19.5 - 21.5)
Suicide	16.4 (12.4 - 20.4)	18.7 (17.8 - 19.7)
Diabetes Mellitus	21.5 (16.9 - 26.0)	13.3 (12.5 - 14.1)
Hypertensive Renal Disease	16.2 (12.2 - 20.1)	5.7 (5.2 - 6.2)
All Others	267.4 (251.3 - 283.5)	211.4 (208.3 - 214.5)

Cancer Incidence ²	Senate District	Nevada
All Cancers	540.9 (500.8 - 581.0)	430.0 (422.3 - 437.6)

Birth Related ³	Senate District	Nevada
Infant Mortality ⁴	0.3% (0.2% - 0.5%)	0.5% (0.5% - 0.6%)
Low-birthweight births ⁵	7.2% (6.6% - 7.9%)	8.2% (8.1% - 8.3%)
Inadequate prenatal care ⁶	13.9% (13.1% - 14.8%)	26.9% (26.7% - 27.2%)

General Health ⁷	Senate District	Nevada
Ever had a heart attack?	3.8% 2.3%-5.4%	4.6% 4.2%-5.0%
Ever had a stroke?	*	2.9% 2.6%-3.2%
Currently have asthma?	7.3% 4.5%-10.1%	7.8% 7.3%-8.4%
Ever had COPD?	5.0% 3.0%-6.9%	7.0% 6.4%-7.5%
Ever had a depressive disorder?	17.8% 13.8%-21.7%	16.4% 15.6%-17.2%
Ever had diabetes?	7.8% 5.2%-10.4%	9.6% 9.0%-10.2%
Current smoker?	17.2% 13.2%-21.3%	18.9% 18.0%-19.8%
Overweight or Obese?	60.0% 54.6%-65.4%	63.2% 62.1%-64.3%
Mammogram in the last 2 years? ⁸	74.0% 64.1%-84.0%	71.9% 69.3%-74.6%
Pap test in the last 2 years? ⁹	80.9% 71.3%-90.5%	75.0% 72.6%-77.5%
PSA test in the last 2 years? ¹⁰	43.1% 31.4%-54.8%	44.8% 41.9%-47.8%

Notes

¹Data reflects the top causes of deaths that occurred between 2013 and 2015. Nevada residents only are included in the data.

²Data reflects cancers that occurred in 2013.

³Nevada residents only are included in the data.

⁴Infant mortality measures the number of babies who die during their first year of life per 1,000 live births. Data is reported on Senate District of residence, rather than place of death.

⁵Low-Birthweight babies are those weighing less than 2,500 grams (about 5.5 pounds) at birth. Data are reported by mother's residence, rather than the infant's place of birth.

⁶Adequate prenatal care is determined by calculating an expected visit ratio where the number of prenatal visits is compared to the expected number of visits from between when care began and the date of delivery. The expected number of visits is adjusted for the gestational age of when care began and the gestational age at delivery. Care is deemed adequate if the ratio of observed to expected visits is 80% or greater.

⁷General Health indicators are collected from the Behavioral Risk Factor Surveillance System (BRFSS), which is a state-based system of health surveys that collects information on health risk behaviors, preventive health practices, and healthcare access primarily related to chronic disease and injury. All indicators except mammogram, pap test, and PSA test reflect responses from 2011-2015.

⁸Defined as the percent of adult women (50 years and over) who reported having a mammogram within the last 2 years. Questions reflect responses from 2012 and 2014.

⁹Defined as the percent of adult women (21 years and over) who reported having a pap test within the last 3 years. Questions reflect responses from 2012 and 2014.

¹⁰Defined as the percent of adult men (40 years and over) who reported having a PSA test within the past 2 years. Questions reflect responses from 2012 and 2014.

*Indicators with too few responses were suppressed due to reliability.

↑↓Arrows reflect if Senate District rates or proportions are statistically significantly higher or lower than Nevada rates or proportions for the same indicator.
