Nevada COVID-19 School Dashboard Data

- This displays the number of COVID-19 cases in Nevada schools (K-12).
- It includes students and staff who were present at their school when they were infectious for COVID-19 (i.e., two days before symptoms presented if symptomatic or two days prior to their specimen that tested positive was collected if asymptomatic).
- This information is updated weekly at [Microsoft Power BI \(powerbigov.us\)](https://powerbigov.us).

MIS-C

Multisystem inflammatory syndrome in children (MIS-C)

MIS-C is a serious inflammatory syndrome in children, including some teenagers. This syndrome is rare, but there appears to be an emerging link between children, MIS-C and COVID-19. This link is being researched nationally and there remains a lot to be learned about the connection.

- Prior to the COVID-19 global pandemic, MIS-C symptoms have been monitored via syndromic surveillance within Nevada hospitals, and an MIS-C diagnosis must be reported to the State.
- Between January 1 and December 31, 2021, there were 34 diagnosed MIS-C cases in Nevada. 22 of the diagnosed MIS-C cases also tested positive for COVID-19.
- There were 32 diagnosed cases of MIS-C in 2020.

Comorbidities/Disabilities

- Many states, including Nevada, are struggling to better identify people with disabilities and pre-existing medical conditions within confirmed cases of COVID-19.
- Below is information a disease investigator may ask around pre-existing conditions during the investigation process.
- To date, pregnancy is the most utilized field.

Next Steps in Data Collection

- Improved data completeness.
- Better identification of comorbidities through the disease investigation process of confirmed COVID-19 cases.
- Identification on the best way to continually monitor and display comorbidity information within confirmed COVID-19 cases.
 - This may include incorporating comorbidities in existing dashboards as other states have.
 - Georgia: <https://dph.georgia.gov/covid-19-daily-status-report>
 - Creation of separate and specific dashboards.
