

**Technical Assistance Questions
for the
Behavioral Health Planning and Advisory Council**

1. What additional training and technical assistance do members think would be useful to them?
2. What does the state staff see as technical assistance needs for the Council?
3. Do members of the public (non-Council members and non-staff members) have suggestions to increase the Council's effectiveness?
4. What does the Council need in terms of support and collaboration from the state?
5. What are the most immediate challenges that might be addressed through technical assistance support?
6. Do the council and state think an on-site visit would be of value?
7. Should a technical assistance collaboration group be formed (Council members and staff) to update a technical assistance plan and establish regular virtual meetings with a consultant?
