

Weight and Chronic Disease in SNAP/Medicaid Clients

Ellen Crecelius, Ph.D.

Deputy Director – Fiscal Services

Department of Health and Human Services

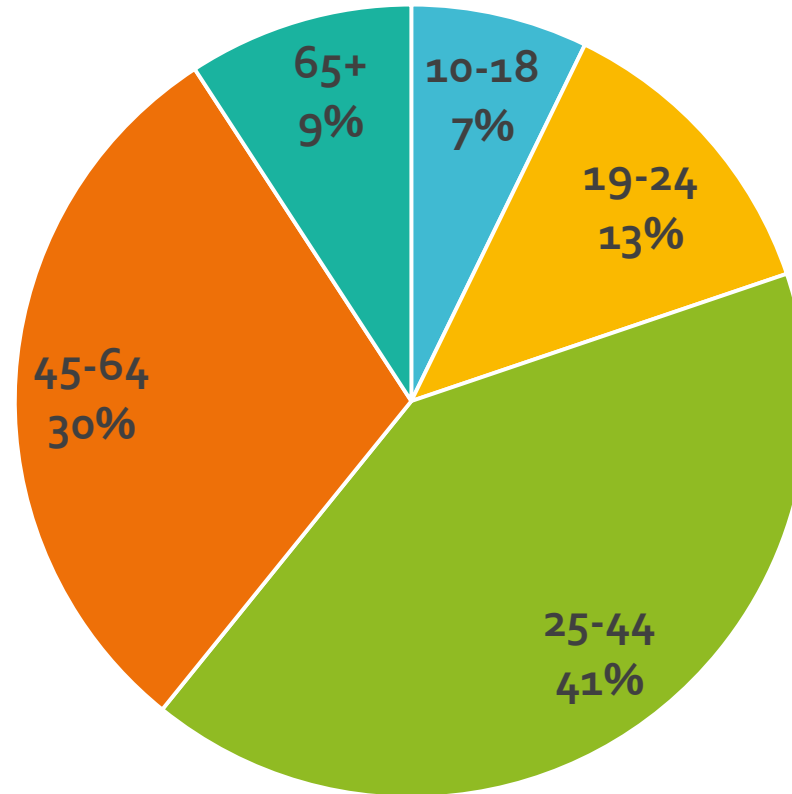

Goal: Better understand the health of public assistance clients

Focus of analysis: Clients on SNAP and Medicaid and in the DMV database of driver licenses and ID cards.

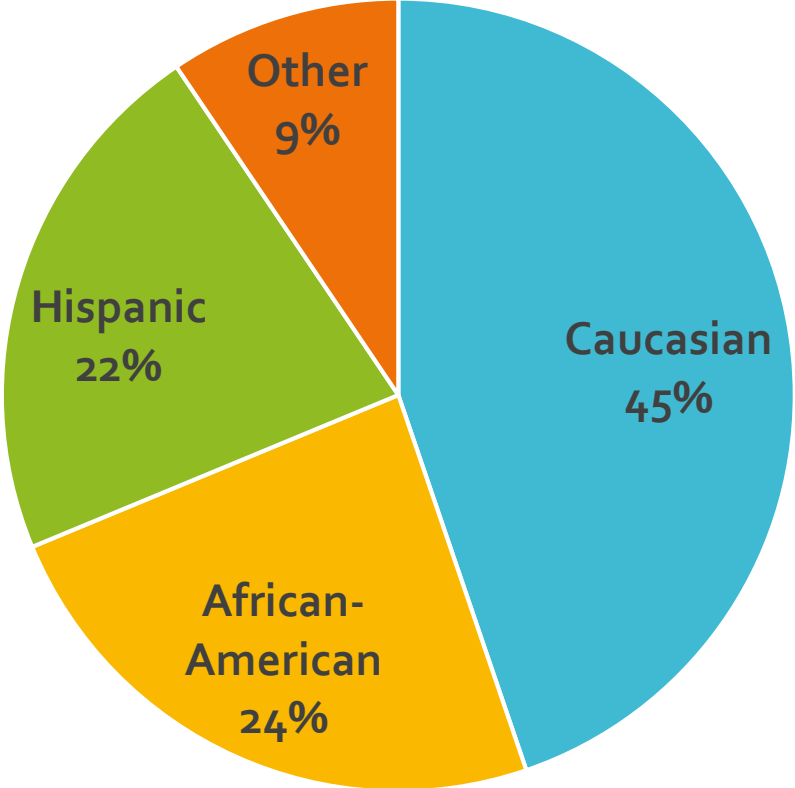

Demographics

Family Size

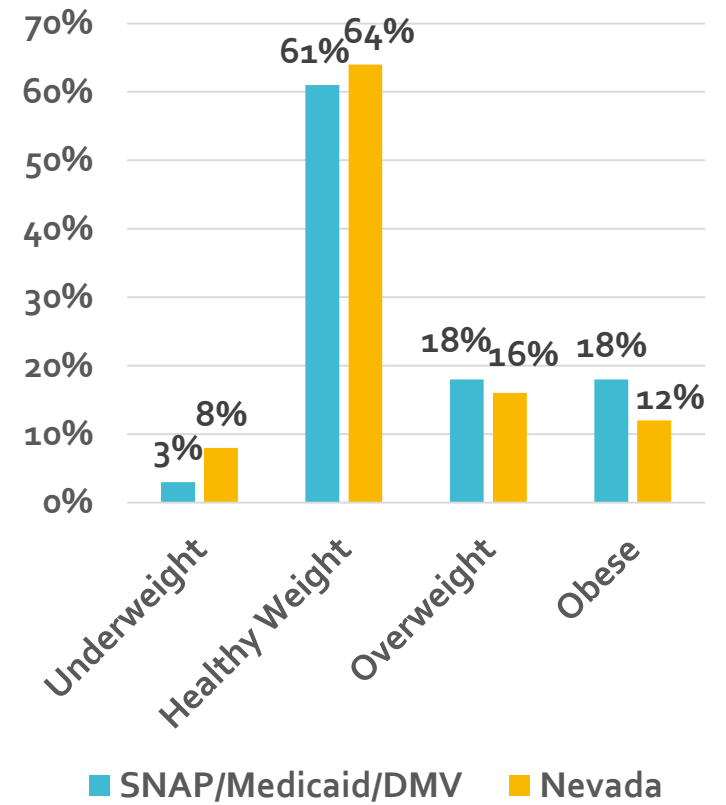

Weight Status - Adolescents

Age 10-13 Years

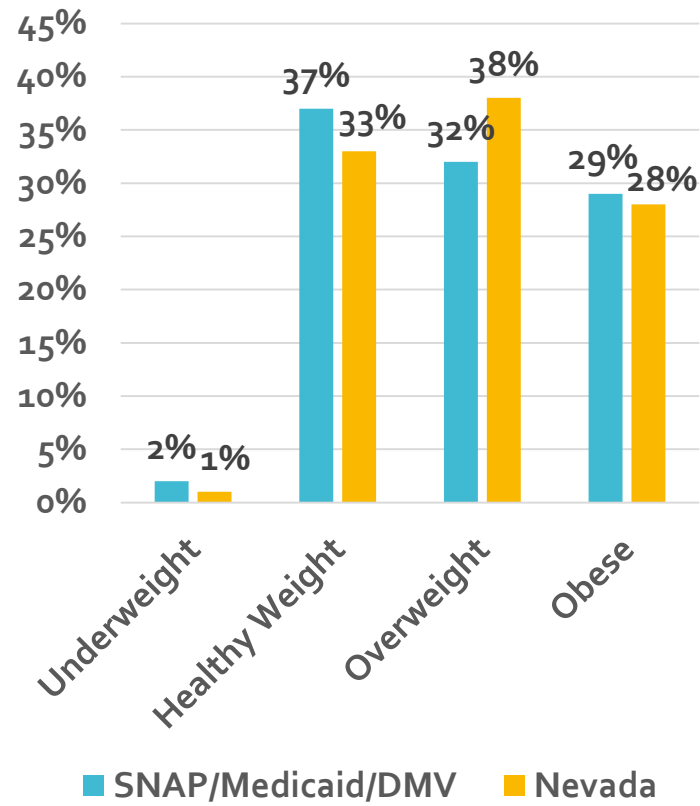

Nevada data is not available for this age range.

Age 14-17 Years

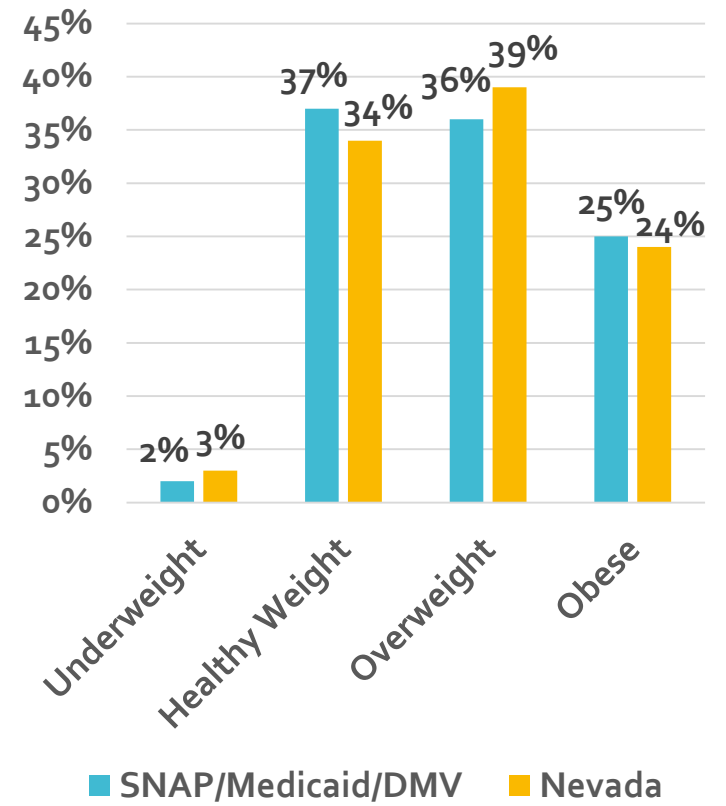

Weight Status - Adults

Age 20-64 Years

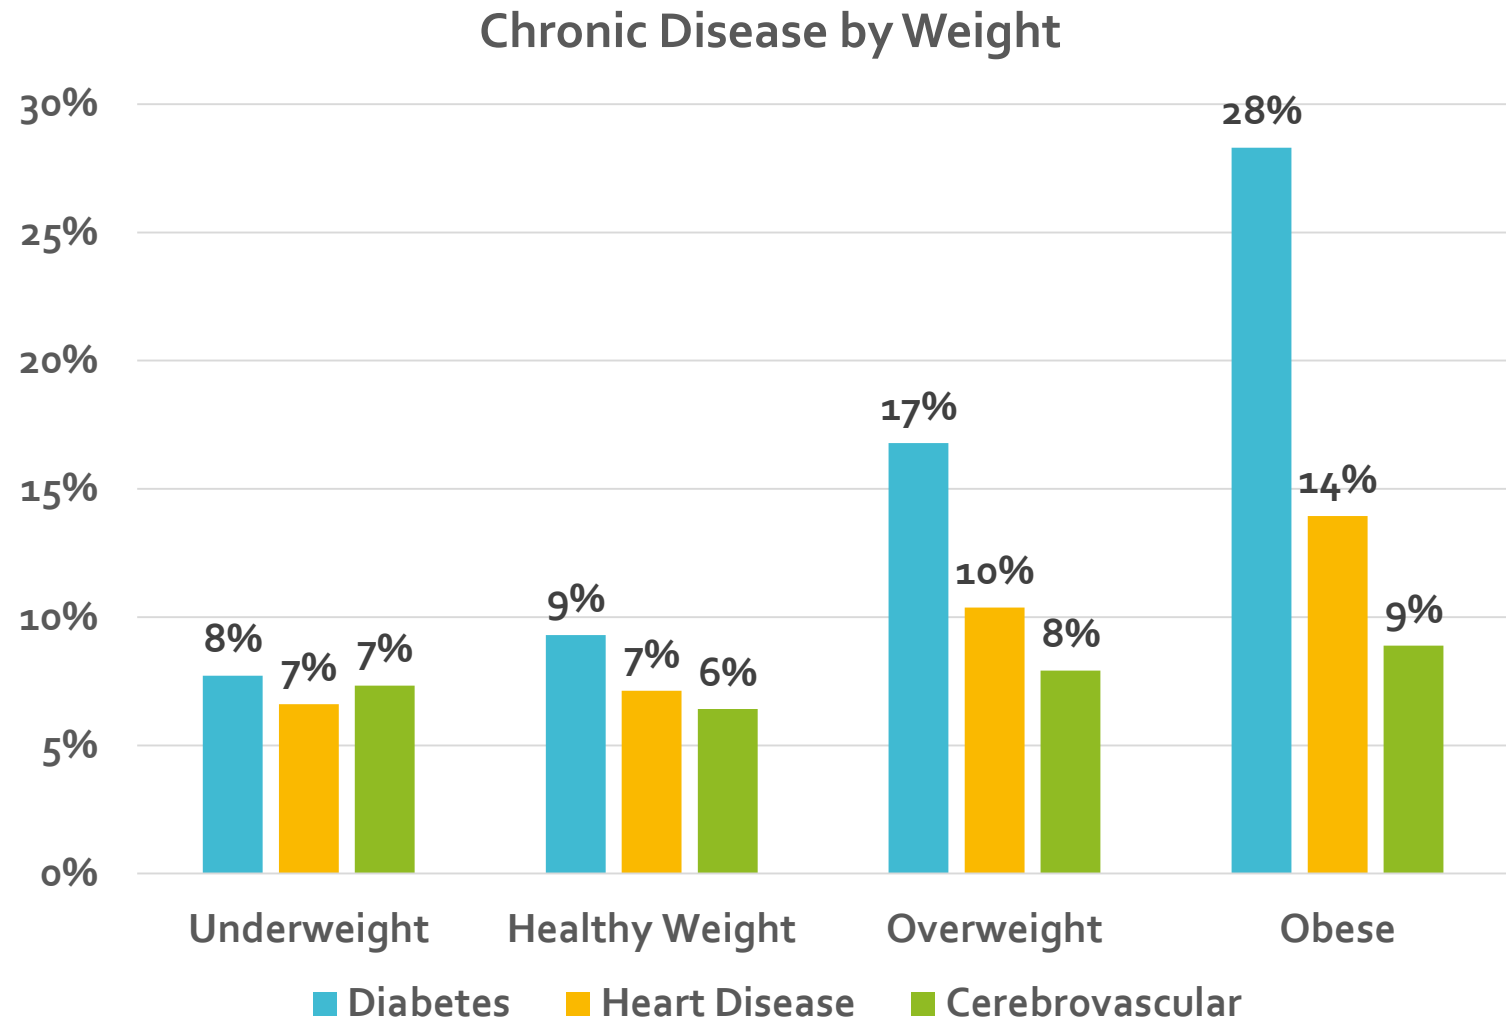

Age 65+ Years

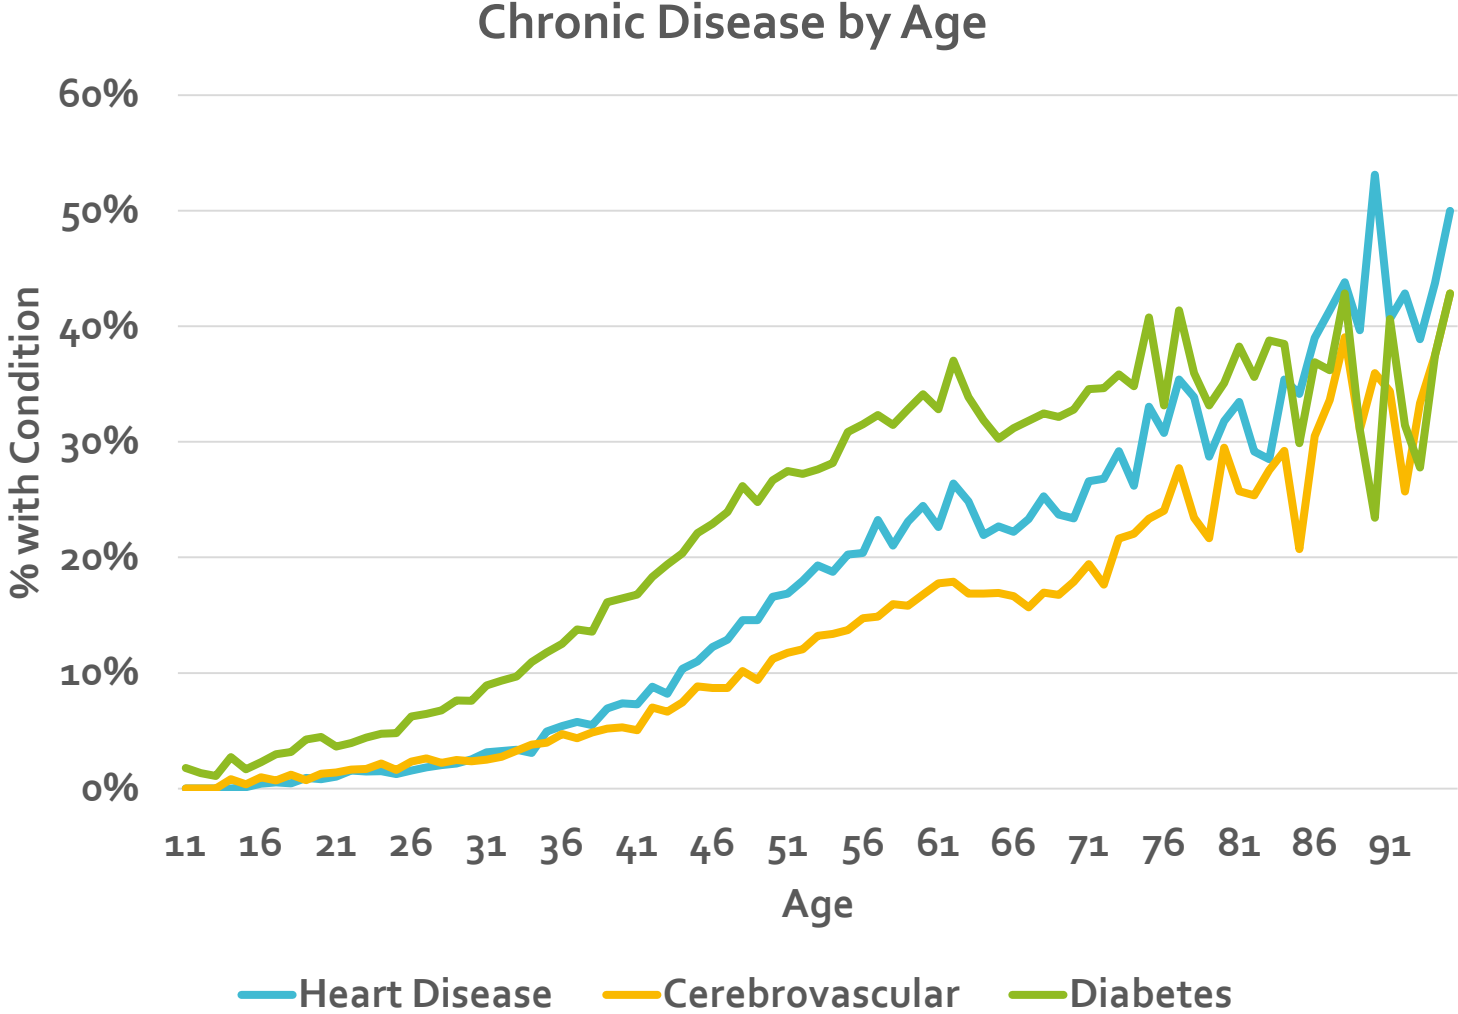

Chronic Diseases by Weight

SNAP/Medicaid/DMV clients

Chronic Disease by Age

SNAP/Medicaid/DMV clients

Next Steps

- Relationship between location/type of SNAP retailer and weight status
- Health care costs for SNAP/Medicaid clients due to these chronic diseases
- Opportunities to incentivize healthy diets and nutrition among SNAP/Medicaid clients.
