

# eLogic Genesis Marketing Data Dictionary

## ***System Navigation Bar***

The topmost navigation bar. This bar has a few different features available, which features depend on the staff's Roles and Permissions

## ***Alert System***

This is an alert system organizations can use to communicate events or meetings or any custom notifications to any users with their system. This can be used within a network for a parent organization can communicate with their organizations and staff.

## ***People Page***

The central repository for all client and staff accounts

## ***Referrals***

Organizations can refer clients in a multitude of ways. Referrals can be formulated into a PDF, internal documents and through API's. Organizations using Genesis can both refer client documents as well as the client's themselves giving users the ability to refer clients over a network.

**Network** - Network referrals allow you to transfer client data to other agencies within the eLogic Network.

**Internal** - Internal referrals allow you to assign clients to other caseworkers within your organization.

**Email** - Email referrals allow you to transfer client data to an email of your choice.

**Quick** - Quick referrals allow you to log your client as having been referred to a specific place.

## ***Permissions***

Organizations can set specific interfaces for different roles throughout their organization.

**Tabs** - Organization sets intake tabs and all other major data areas (Applications, Assessments, Budgets, Casenumbers, Client Reports, Contacts, Education, Employments, Family, Files, Forms, Groups, Notes, Programs, Referrals, Report Management, Report Viewing, Schedule, Services, Trainings)

**Programs** - Organizations set which Programs users can view or edit or create depending on Agency Settings.

**Forms** - Organization can organize Intake Data Points into a form with online signatures.

**Assessments** - Organization can set which assessment a Role has access too.

**Client Groups** - Organization can set which group of clients they have access too.

**Reports** - Organization can set which Reports staff have access too.

**Users** - Organization can set which staff are located to which Role.

### ***Intake Fields***

Organizations can set any data points within any intake fields for their database. These can be set by organization within a network to set data standards for an unlimited amount of agencies.

### ***Places Page***

The central repository for all employers, referral agencies, and educational institutions

**Basic** - Agency Information (Contract Name, Contact Email, Website, Contact Number, Site)

**Address** - Address Information (Address 1, Address 2, City, State, Zip, County)

**Retention** - Staff retention Rates (0-30 days, 30-60 days, 60-90 days, 90-120 days, 120 days - ongoing).

**Staff** - Manage and update staff information (First Name, Last Name, Position, Type, Hourly Wage, Hire Date, Status, Navigator Assigned).

**Service** - First Name, Last Name, Service, Type, Status, Hour, Cost, Start Date, End Date

### ***Agency Settings***

Organizations can set specific rules for their database.

**Default Fields** - These are fields that autofill when a client is created.

**Mandatory Fields** - Organizations can limit staff from assessing a client until specific intake fields are generated

**Referral Fields** - These are intake areas that are used in preset referrals.

**Custom Fields** - Organizations can set custom intake fields per their organization. The include; Radio Buttons, Checkboxes, Large Text, Small Text, Dropdown

**Privacy Fields** - Organizations can set Privacy Groups to have specific staff members communicate in private

### ***Reports***

The central repository for all agency-wide reports

#### ***Report Scheduler***

Reports can be set on a timer to run and deliver themselves to selected staff members.

#### ***Report Manager***

Reports can be assigned to different staff members and roles.

#### ***Agency Admin***

This will bring the staff to the part of the system that houses all the agency's settings and options.

- Count Employer Wage as Income - Include employment wage on the budget sheet and in other budget calculations. This prevents having to double enter the data, but if it's

already been entered on the budget sheet, it will need to be removed to avoid counting it twice.

**Use Work Logs** - Work Logs are basic client-level logs used to track worksite, hours and pay for basic work log entries.

**Report Only My Clients** - When enabled, this setting restricts reporting for caseworkers to only their assigned clients. Clients not assigned to the caseworker will not appear in any of their reports.

**Parent Reporting Type** - This setting determines the accessibility of your data to your parent group in reports. The options are No Reporting, No Identifiable Information (which excludes Names and Casenumbers from being report), or Full Access, which allows reporting on any of your group's data.

**Default Next Assessment Date** - When finalizing an assessment, the default next assessment date will be the number of months entered from now.

**Auto-assign Caseworkers** - Automatically assigned caseworkers to a client when they interact with the client's record. A client can have multiple caseworkers assigned.

**Hide Employee Records** - Prevents non-admins from viewing the records of other employees.

**Enable View Access** - Allows read-only access to services, programs and forms the user would otherwise not be able to see.

**Enable FRC Settings** - Enables FRC checkbox settings for Referral and Application in service admin.

### ***Dashboard***

Staff can view upcoming events by Navigator(s).

- Assessments
- Services
- Appointments
- Goal Plans (Objective and Steps)
- Applications
- Programs
- Meetings
- Events

### ***Global Search***

A client and staff profile search engine. Profiles can be located by first or last name, address, phone number, case number, or date of birth.

***Client Portal*** - Client's can directly access their user account by organization. Portals are defined and structured by the organization.

### ***Reports Notification Icon***

Reminders or Notifications to run reports will be displayed here.

## ***User Menu***

Drop-down menu includes:

- Notifications
- Outstanding Referrals
- Account Settings
- Personal Notes
- staff calendar
- Logout

## **Intake Navigation Bar**

The Intake Navigation Bar will display different options, depending on where the staff is in the system.

### **Intake Navigation Bar - *People Page***

#### ***Create New Client***

Create a new client or employee profile here

#### ***Print Forms***

Print agency created forms
