

Oasis Insight provides innovative features that transform the lives of clients challenged by food insecurity – Our focus is ending hunger, not just tracking it.

For the last 13 years, through ease of implementation and reliable performance, we’ve grown our network to 70 food banks, including Greater Boston, Greater Chicago, San Francisco, San Diego, Atlanta and Central Texas Austin, and our software is deployed in 46 states and 1,400+ cities.

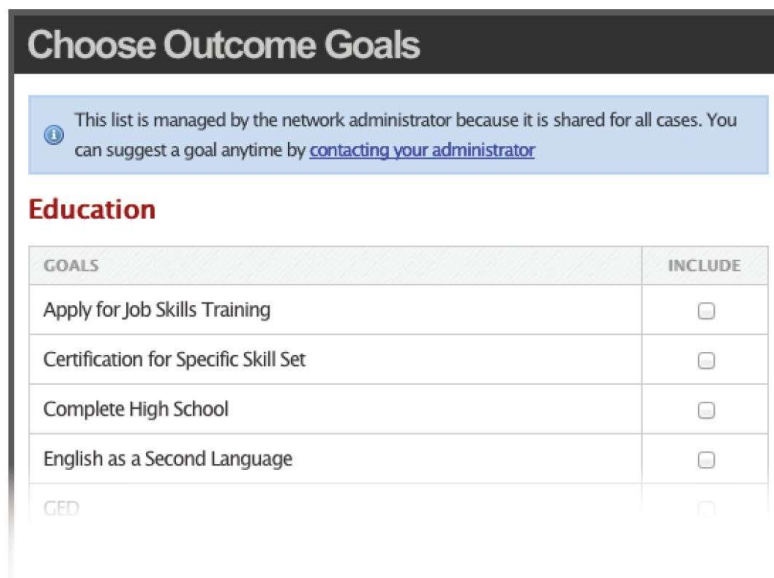

We Listen. We are constantly developing to make sure our technology fits like a hand in glove to meet your goals and expectations.

Outcomes

With the Outcomes feature a user can keep track of specific goals in a client’s life and even collaborate with other agencies to monitor goal competition.

This client’s “road map to success” is customized for an individual during a case management session.

A client's progress bar reflects a visual for the advancement in completing goals in one's life.
