Oasis Insight provides innovative features that transform the lives of clients challenged by food insecurity – Our focus is ending hunger, not just tracking it.

For the last 13 years, through ease of implementation and reliable performance, we’ve grown our network to 70 food banks, including Greater Boston, Greater Chicago, San Francisco, San Diego, Atlanta and Central Texas Austin, and our software is deployed in 46 states and 1,400+ cities.

We Listen. We are constantly developing to make sure our technology fits like a hand in glove to meet your goals and expectations.

**Outcomes**

With the Outcomes feature a user can keep track of specific goals in a client’s life and even collaborate with other agencies to monitor goal competition.

This client’s “road map to success” is customized for an individual during a case management session.
A client’s progress bar reflects a visual for the advancement in completing goals in one’s life.

Follow-up dates/tasks can be established. Oasis will send email notifications 5 days before and on the due date itself.

A hand-out can be printed and provided to a client at the end of each session.

**Initial Goal Set — John Smith**

**1. Financial**

- Financial Mentoring  
  *May 1, 2019*
- Reduce expenses

**2. Social Support**

- Life Skills (Clothing, Housekeeping, Cooking, personal hygiene)
- Support Group
Reports can be generated to aggregate data for all clients enrolled in Outcomes goals to provide a snapshot in time.

**John Smith**

- **Case #:** C0001
- **Date of birth:** Jan 25, 1958
- **Address:** 405 Poplar Ave. Florence, AL 35620
- **County:** Landerdale
Assessments

The Assessments feature was developed to help communities and/or agencies quantify program effectiveness based upon custom assessment indicators and report changes over time reports to show funders, among others, long-term impact and changed lives.

An individual may be assessed at certain intervals. The result of each assessment will be displayed as a column for each date of assessment.
A “Changes Over Time” assessment report is available to show aggregate % and # totals for each of the assessment indicators.

**Report Summary**

Total Assessments: 12
Total Cases: 5

**Assessment Field Totals:**

- **Calculated Body Mass Index (BMI):**
  - Clients that increased: 1 (20%)
  - Clients that stayed the same: 2 (40%)
