University of Nevada School of Medicine Strategic Planning Committee November 2015 to present

Dear Advisory Committee on the State Program for Oral Health:

It was recently brought to my attention by Dr. Capurro that there is a vacancy on the committee. I am writing to express my interest in serving.

I have been practicing Pediatric Dentistry since 2004, mostly in the greater Carson Valley area. During this time, I have served on multiple community and educational boards in order to better understand the needs of the children and families I provide care for, and to give back to the community. In addition, I have also served as the Dental director for the Eagle Valley Children's Children Center in Carson City, where I provided regular dental care to the residents and education to the staff.

Outside of my work in Nevada, for the past 5 years I have served as a consult to Pediatric Dental Initiative, a non-profit dental center for underserved children in Northern California. Through my association with PDI, I have been able to work with Denti-Cal and see first hand some of the struggles that states and providers face in providing necessary care to underserved populations. I have also participated in problem solving for the organization when they were facing state mandated cuts, how to increase prevention awareness, and how to increase access to care.

I believe that the two biggest obstacles facing our state today are:

1. A lack of education in the prevention of dental disease; and
2. A lack of access to care for those who need us most.

I have spent my career focusing on these issues and I would like to have a voice in helping the state of Nevada work to better achieve your goals. Because of my years working with people from all walks of life, and my experience in both the private and public health sectors of the dental field, I believe that I could be of benefit to the committee.

Thank you in advance for considering my appointment to the Advisory Committee on the State Program for Oral Health. I will be happy to provide any further information that the committee members may require.

Sincerely,

Todd A. Gray, DDS
