Interim 2019 Novel Coronavirus (2019 nCoV) assessment information: Evaluating persons with fever and acute respiratory illness

- Obtain a detailed travel history on ALL patients being evaluated for fever and acute respiratory illness.
- Use the assessment criteria below to determine if 2019 nCoV should be included in the differential diagnosis.

<table>
<thead>
<tr>
<th>Assessment Criteria</th>
<th>Yes</th>
<th>No</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>A) Did/Does the patient have a fever? (Fever may not be present in some patients; use clinical judgment to guide testing.)</td>
<td></td>
<td></td>
<td>Fever onset date:<strong>/</strong>/____. Highest measured temperature: ________ □ °F □ °C □ Check if SUBJECTIVE fever only</td>
</tr>
<tr>
<td>B) Does the patient have symptoms of lower respiratory illness (LRI) (e.g., cough, difficulty breathing)?</td>
<td></td>
<td></td>
<td>Symptom onset date:<strong>/</strong>/____. □ Cough □ Sore throat □ Difficulty breathing. Other Symptoms (list): _________________________</td>
</tr>
<tr>
<td>C) In the 14 days before symptom onset, did the patient:</td>
<td></td>
<td></td>
<td>Dates in Wuhan:<strong>/</strong>/____ to__/__/____. Return to /Arrival in US. Other locations visited in 14 days before symptom onset: _________________________</td>
</tr>
<tr>
<td>i. Travel from Wuhan City, China*?</td>
<td></td>
<td></td>
<td>Dates of contact with 2019nCoV PUI/lab-confirmed case:<strong>/</strong>/____ to__/__/____. PUI/lab-confirmed case name (if known): _________________________</td>
</tr>
<tr>
<td>ii. Have close contact with a person who is under investigation (PUI) for 2019-nCoV while that person was ill?</td>
<td></td>
<td></td>
<td>Nature of contact: □ Family/Household □ Coworker □ Healthcare worker □ Travel □ Other: _________________________ Comments: _________________________</td>
</tr>
<tr>
<td>iii. Have close contact with a lab-confirmed 2019-nCoV patient while that person was ill?</td>
<td></td>
<td></td>
<td>Nature of contact: □ Family/Household □ Coworker □ Healthcare worker □ Travel □ Other: _________________________ Comments: _________________________</td>
</tr>

</table>

Suspect 2019-nCoV if you answered YES to:
- A and B and (C) or Ci, OR (A or B) and Ci
- *If patient does not meet case definition but there is a high index of clinical suspicion, contact LHA.

IMMEDIATELY:
- □ Ensure that the patient is masked and isolated in a private room with the door closed AND
- □ Ensure that healthcare personnel entering the room use contact, droplet, AND airborne precautions, INCLUDING eye protection (e.g., goggles or face shield).
- □ Please note: Airborne precautions include use of NIOSH-approved fit-tested N95 mask or higher.
- □ Notify your healthcare facility’s infection control personnel.
- □ Perform any clinically indicated respiratory and other diagnostic tests.
- □ Respiratory testing performed (indicate results if known):

  - □ Rapid Influenza: □ A □ B
  - □ Rapid Strep
  - □ Viral Respiratory Panel
  - □ Pneumonia
  - □ Legionella
  - □ Other: _________________________
  - □ Other: _________________________

- □ Call your local health authority (LHA) with the above information to discuss the case and determine whether to test for 2019nCoV. (If after hours and the LHA is not available, call the Nevada Division of Public & Behavioral Health: (775) 400-0333).
- □ If instructed by your local health department, collect samples for 2019 nCoV testing. Follow Middle East Respiratory Syndrome (MERS) specimen collection guidance on Public Health Laboratory Microbiology Lab Test Menu.

  - □ NP swab (synthetic swab in 2-3 ml viral transport media)
  - □ OP swab (synthetic swab in 2-3 ml viral transport media)
  - □ Serum (5-10 ml in serum separator tube)
  - □ Sputum (in sterile cup)
  - □ Urine (in sterile cup)
  - □ Stool, if possible (in sterile cup)
