Office of Public Health Informatics and Epidemiology | 4126 Technology Way | Suite 200 | Carson City, NV 89706 | t: 775.684.5282 | f: 775.684.5999
Notes

District 2015 populations are based on the number individuals within each district in 2014 (obtained from U.S. Census Bureau, 2010-2014 5-Year American Community Survey, Table DP05 – ACS Demographic and Housing Estimates) as a proportion of the estimated 2015 Nevada population from the Nevada State Demographer.

Data reflects the causes of deaths that occurred between 2013 and 2015. Only Nevada residents are included in the data.

Racial/Ethnic populations for each District were obtained from U.S. Census Bureau, 2010-2014 5-Year American Community Survey, Table DP05 – ACS Demographic and Housing Estimates.

Income below poverty level (PL) was obtained from U.S. Census Bureau, 2010-2014 5-Year American Community Survey, Table DP03 – Selected Economic Characteristics.

Uninsured reflects individuals without insurance covered. Data was obtained from U.S. Census Bureau, 2010-2014 5-Year American Community Survey, Table S2701 – Health Insurance Coverage Status.

Cancer incidence is reflective of the number of reportable cancers diagnosed in 2013 that were reported to the Nevada Cancer Registry.

General Health indicators are collected from the Behavioral Risk Factor Surveillance System (BRFSS), which is a state-based system of health surveys that collects information on health risk behaviors, preventative health practices, and healthcare access primarily related to chronic disease and injury. Data is provided at the zip code level, and since a zip code may be a part of multiple Districts, populations outside of a District may be included within each indicator. All indicators reflect responses from 2011-2015, except mammogram, Pap test, and PSA test which reflect responses from 2012 and 2014 only.

The following questions correspond with the indicators:

- Ever had a heart attack?
  - o (Ever told) you that you had a heart attack also called a myocardial infarction?
- Ever had a stroke?
  - o (Ever told) you had a stroke?
- Currently have asthma?
  - o (Ever told) you had asthma?
  - o Do you still have asthma?
- Ever had COPD?
  - o (Ever told) you have Chronic Obstructive Pulmonary Disease or COPD, emphysema or chronic bronchitis?
- Ever had a depressive disorder?
  - o (Ever told) you have a depressive disorder, including depression, major depression, dysthymia, or minor depression?
- Ever had diabetes?
  - o (Ever told) you have diabetes?
- Current smoker?
  - o Have you smoked at least 100 cigarettes in your entire life?
  - o Do you now smoke cigarettes every day, some days, or not at all?
- Overweight or Obese?
  - o About how much do you weigh without shoes?
  - o About how tall are you without shoes?
- Illicit Drug Use in the last 30 days?
  - o During the past 30 days, on how many days did you use marijuana or hashish?
  - o During the past 30 days, on how many days did you use any other illegal drug?
  - o A mammogram is an x-ray of each breast to look for breast cancer. Have you ever had a mammogram?
  - o How long has it been since you had your last mammogram?
  - o A Pap test is a test for cancer of the cervix. Have you ever had a Pap test?
  - o How long has it been since you had your last Pap test?
  - o A mammogram is an x-ray of each breast to look for breast cancer. Have you ever had a mammogram?
  - o How long has it been since you had your last mammogram?
- PSA test in the last 2 years?
  - o Have you EVER HAD a PSA test?
  - o How long has it been since you had your last PSA test?

*Indicators with too few responses were suppressed due to reliability.

Notes

Emergency room visits and inpatient hospitalizations related to substance use includes: abuse, poisoning, dependence, and non-dependence that occurred between 2013 and 2015. This indicator excludes alcohol and tobacco related events.

The following ICD-9-CM and ICD-10-CM codes were included: 304.0, 304.7, 965.0, 305.5, 304.3, 305.2, 970, 304.2, 304.4, 969.7, 305.6, 305.7, 304.5, 305.3, 969.6, 304.1, (undetermined intent) that occurred between 2013 and 2015.

Drug overdose deaths were classified based on the ICD-10 underlying cause-of-death codes X40–44 (unintentional overdose), X60–64 (intentional overdose, suicide), X85 (homicide), or Y10–Y14 (undetermined intent) that occurred between 2013 and 2015. This indicator excludes alcohol and tobacco related events.

Sexually transmitted diseases includes all individuals reported to have chlamydia, gonorrhea, primary and secondary syphilis, and early latent syphilis in MMWR Year 2015.

Low-Birthweight babies are those weighing less than 2,500 grams (about 5.5 pounds) at birth. Data is reported by mother’s residence, rather than the infant’s place of birth. Data reflects the births that occurred between 2011 and 2015.

Infant mortality measures the number of babies who die during the first year of life per 1,000 births. Data is reported on district of residence, not place of death. Data reflects the deaths that occurred between 2011 and 2015.

Teen birth rate is the number of births to teenage females between the age of 15 and 19, per 1,000 females in this age group. Data reflects the births that occurred in 2015.

Persons Living with HIV indicate any person regardless of HIV staging, including HIV stage 3 (AIDS), living in Nevada at the end of 2015.

Sexually transmitted diseases includes all individuals reported to have chlamydia, gonorrhea, primary and secondary syphilis, and early latent syphilis in MMWR Year 2015.

Drug overdose deaths were classified based on the ICD-10 underlying cause-of-death codes X40–44 (unintentional overdose), X60–64 (intentional overdose, suicide), X85 (homicide), or Y10–Y14 (undetermined intent) that occurred between 2013 and 2015. This indicator excludes alcohol and tobacco related events.

Emergency room visits and inpatient hospitalizations related to substance use includes: abuse, poisoning, dependence, and non-dependence that occurred between 2013 and 2015. This indicator excludes alcohol and tobacco related events.

The Zip Code and legislative district data are not one-to-one comparable due to issues of geographic and data distinctiveness. Zip codes are designated by the U.S. Postal Service for mail delivery and may not be fixed areas. The data and Zip Code boundaries presented in this report should be used for general reference only.

↑ Arrows reflect if District rates or proportions are statistically significantly higher or lower than Nevada rates or proportions for the same indicator.
