

Bristlecone Problem Gambling Center

Features: Residential, Transitional Living, Outpatient Treatment Programs, Aftercare as well as a screening for each new client that enters residential treatment within 48 hours of admittance.

Who we are: We are one of two residential facilities in the North that offer residential treatment for gambling specific clients.

Residential treatment: Offers three weeks of treatment followed by OP, Transitional living if chosen by the client and then up to three years of aftercare. Currently BPGC has agreements (MOU's) with 6 other agencies to help those in the community suffering from gambling addiction. We do continuous outreach and attend events to help our community know who we are and what we do.

We are currently working with Innovation High School to help with the curriculum for their spring semester to get the word out regarding gaming and gambling to High School Students. We have an innogration project with Carson Community Counseling. We are waiting on approval to go to the Washoe County Detention Center to hold groups regarding gambling for the inmates. Our hope is to work with DA's office, Public Defenders Office and Judges to Implement a Gambling Diversion Program in Washoe County.
