Treatment—Meeting the client's goals

- ▶ Individualized Treatment Plans~~Counselors work with the clients to determine short and long term goals. Gambling and Mental Health goals are integrated to assist the client in all aspects of their recovery.
- ▶ Cognitive Behavioral Therapy~~ Help the client to identify how their attitudes and behaviors affect their gambling recovery processes. How they 'think' about gambling, what they believe is or is not possible.
- ▶ Family Systems Theory~~ Help the client understand how their family story impacts their gambling habits. The family can be integral to recovery, yet family traditions of gambling may detract. Counselors guide clients through their discovery processes.
- ▶ Individual Counseling~~Counselors work with client to identify distorted thinking and implement strategies to avoid relapse situations.
- ▶ Group Settings~~ Allow clients the freedom to explore their own gambling behaviors while discussing key ideas with peers.
