

Hi Jenna,

My name is Brandon Miles and I am writing this to express interest in the soon-to-be vacant position on the Nevada EMS Advisory Committee. The specific role I am interested in is that of the "member who is an employee of a privately-owned entity that provides emergency medical services". I am presently employed by Air Methods Corporation as the Clinical Base Lead/Flight Paramedic based out of Bullhead City, AZ. However, I do reside in and often operate in Las Vegas, NV.

I have been a Paramedic for approximately 14 years; 5 of which have been with Air Methods. The years before that I was employed by one private and one county based ambulance service. I have served in various educator roles of sorts for the past 10 years assisting others in learning operations, improving clinical experience, and general practice in the field of EMS.

I am relatively new to the state of Nevada as of May 2020 by way of Savannah, GA. From my flight experience working out of Augusta, GA, I was often exposed to many of the top trauma centers and EMS systems in the Southeast. While those times did greatly enhance my clinical experience, it also opened up the doors to a growth in knowledge of overlooked aspects of EMS to include billing, legal, and logistic operations. While I am still somewhat unfamiliar with EMS operations in the state of Nevada, I believe my history of being involved with a highly organized trauma system in a different part of the country would only benefit the state of Nevada and it's EMS operations.

I have attached my employment resume for your review and I look forward to hearing back!

Kind regards,

Brandon Miles FP-C, CCEMT-P, NRP
