Elko, NV

28th Annual RURAL NEVADA EMS Conference

The University of Nevada, Reno School of Medicine would like to invite you to join us September 12-14, 2019 for the Rural EMS Conference. The conference is being held at the Elko Convention Center in Elko, Nevada.

You absolutely cannot miss this one!

- Murph, Rick Howard and Chris Ebright will be joining us.
- George Washington University in Washington D.C is sponsoring 2 speakers from the GW University School of Medicine and Health Sciences.
- Elko County Ambulance is sponsoring the Occupational Safety Manager from Austin, Texas. *How cool is that!*
- Pre-conference classes are spectacular: Simulated Cadaver Lab, PITLS, One Stop Shopping (CPR/ EMT & AEMT Skills Sign Off), Moulage, Triage, Search and Rescue Scenario, and Bandaging by Bill.
- General and breakout sessions will not disappoint.

A continental breakfast will be available every morning and lunch will be served on Saturday. And of course, SNACKS will be provided throughout the day!

SO, plan on joining us for some great learning, food, fun and most important – a chance to network with fellow EMS folks.

A GOOD TIME WILL BE HAD BY ALL!

Register Now:
www.ElkoEMS19.eventbrite.com

PITLS

(Pediatric International Trauma Life Support)

ITLS of Nevada

— Min 10 / Max 18 - \$50 fee —

This is a great class! PITLS focuses on the special needs of young trauma patients. Participants learn the principles of proper assessment, management, critical interventions, patient packaging and rapid transport. Students will learn and practice proven techniques for communicating with young patients and their parents. The practical skills will enable you to feel confident and competent when caring for a critically injured child.

Moulage

Image Perspectives

— Min 10 / Max 30 —

It's going to be a good one! This 4 hour class will teach you how to create realistic treatable wounds. Students will learn how to make bruises, black eyes, superficial lacerations, abrasions, premade GSW entrance and exit wounds, as well as chemical and thermal burns. The wounds you create will be used later on in the day for the Triage and Search and Rescue classes.

Simulated Cadaver Anatomy Lab

Steve Murphy

— Limit 45 each session —

Bridging the gap between textbooks and real life has never been so much FUN! When it comes to simulating the human anatomy there is nothing better than a pig!! In this Hands-On Workshop students will dissect and explore a variety of structures that are commonly associated with the killing zones: Brain, Heart, Lungs, Liver, Spleen, Kidneys, and Eyes just for FUN!

Bandaging by Bill

Bill Webb

— Limit 30 —

Bill is Back with Bigger and Better Bandaging techniques! This is strictly a HANDS-ON class. Not only will you learn how to bandage a variety of injuries BUT how to bandage effectively and professionally. As an added extra, you will get a dose or two of Bill's unique sense of humor!

One Stop Shopping: CPR/Skills Sign Off

Barrick NV

— Limit 20 each session —

This class is a must if you need to re-certify this year. In the morning, CPR Recertification will take place. In the afternoon, EMT's and AEMT's will be able to get their skills signed off. Like the title says: ONE STOP SHOPPING.

Search and Rescue

Newmont Mine Rescue

— Limit 20 —

This class will be looking at the acronym L.A.S.T. as used in wilderness search and rescue. **Locate**, we will cover basic search strategies, track and clue awareness, land navigation using map and compass, GPS, and universal transverse mercator "UTM".

Access, topographical maps, techniques for accessing an injured or stranded subject. **Stabilize**, techniques for packaging your patient including basic first aid. **Transport**, transporting patients in a wilderness setting using rescue baskets and improvised stretchers. This class will also cover searcher preparedness, including physical conditioning, search packs, and being self-sustaining for 24 hours.

Triage

Newmont Mine Rescue

The goal of this training exercise is to increase first responder readiness to respond, triage, treat and transport patients arising from multiple patient or mass casualty incident. The purpose of this training is to introduce responders using a triage method called S.T.A.R.T—Simple Triage and Rapid Treatment. Responders will also have an opportunity to demonstrate their skills during a simulated multi-patient incident.
