Source: CMS Form 671:L18, L37, L38, L39 and Form 672:F78. *State occupancy is calculated by dividing the sum of patients occupying certified beds by the sum of all certified beds in the state. CASPER data only reflects patients who occupy a certified bed. Occupancy rate of 0% and greater than 100% were eliminated from this analysis.

Glossary of Terms for use with CASPER data

Certified Beds This measure represents the total number of certified beds in the nursing home. Some nursing homes can have a combination of Medicare, Medicaid, and/or private pay beds. Please check with the nursing home to find out what types of beds are available.

Certified Nursing Assistants (CNAs) provide care on a twenty-four hour basis. They work under the direction of a licensed nurse to assist patients with activities of daily living, i.e., eating, grooming, hygiene, dressing, transferring, and toileting. All full-time certified nursing assistants (CNAs) must have completed a competency evaluation program or nurse assistant training within 4 months of their permanent employment. They must also pursue continuing education each year.

Hospital-based - The nursing home is affiliated with a hospital.

Hours Per Patient Day is computed as the sum of the total number of hours worked by direct care staff in each category, and is then divided by a 35-work week and by the number of patients.

Medicare is the federal health insurance program for: people 65 years of age or older, certain younger people with disabilities, and people with End-Stage Renal Disease (permanent kidney failure with dialysis or a transplant, sometimes called ESRD). Medicare pays for some nursing home care in specific situations and for no more than 100 days for each benefit period. A benefit period begins the day you go to a skilled nursing facility. The benefit period ends when you have not received skilled nursing care for 60 days in a row.

Medicaid is a joint federal and state program that helps with medical costs for some people with low incomes and limited resources. Medicaid programs vary from state to state, but most health care costs are covered if you qualify for both Medicare and Medicaid. Medicaid pays for long term care for people with low incomes and resources. Check out with your State Medicaid Agency for the income levels in your State. If a nursing home does not participate in the Medicaid program and does not accept Medicaid patients, and the resident runs out of other funds/coverage, the resident will have to move to another nursing home if he/she wants to be on Medicaid.

Multifacility Multi-nursing home chains have two or more homes under one ownership or operation.

Nursing Home A residence that provides a room, meals, and help with activities of daily living and recreation. Generally, nursing home residents have physical or mental problems that keep them from living on their own. They usually require daily assistance.

Occupancy This measure indicates the percentage of certified beds occupied by residents at the time of the inspection. It is obtained by taking the number of residents occupying certified beds at the time of the inspection divided by the total number of certified beds in the nursing home.

Ownership Nursing homes can be run by private for-profit corporations, non-profit corporations, religious affiliated organizations or government entities.

Registered Nurses and Licensed Practical and Vocational Nurses - Registered nurses (RNs) have between 2 and 6 years of education. Licensed practical and vocational nurses (LPNs/LVNs) generally have 1 year of training. By law, RNs must assess residents' needs. RNs and LPNs/LVNs work together to plan care, implement care and treatment, and evaluate residents' outcomes. Nurses must be licensed in the state and are on site to provide care to residents twenty-four hours per day, seven days a week.

Residents in Certified Beds This number tells you how many residents in certified beds were living in the nursing home at the time of the inspection.
