Top Five Mental Health Disorders Among Drug Related Deaths, by Year					
2012	2013	2014	2015	2016	2017
Depression	Depression	Depression	Depression	Depression	Schizophrenia
Substance Induced Dis.	Schizophrenia	Bipolar Dis.	Bipolar Dis.	Schizophrenia	Mood Dis.
Mood Dis.	Mood Dis.	Mood Dis.	Mood Dis.	Mood Dis.	Bipolar Dis.
Bipolar Dis.	Bipolar Dis.	Substance Induced Dis.	Substance Induced Dis.	Bipolar Dis.	Depression
Schizophrenia	Substance Induced Dis.	Schizophrenia	Schizophrenia	Psychosis Dis.	Substance Induced Dis.

Notes:

Methods: Among Nevada residents who died from drug overdose and received mental health services from a Nevada state mental health facility, the top five mental health diagnoses were included in the above table.

Limitations: Mental health disorders were grouped into their broader "umbrella" terms. It's important to note that one disorder may be representing 15+ different diagnoses.

ICD-10 codes for underlying cause of death: X40-X44, X60-X64, X85, Y10-Y14

ICD-10-CM codes for contributing cause of death: T36-T50
