

# Prevalence of Physical Inactivity for Nevada 2011-2013

**Public Health**  
Prevent. Promote. Protect.

**State Physical Inactivity Prevalence = 23.0%**

Nevada Behavioral Factor Surveillance System (BRFSS) 2011-2013 data was pooled to calculate the physical inactivity prevalence estimates.

**Note:**  
Lyon and Nye Counties had statistically significant higher physical inactivity prevalence estimates compared to the state estimate while Douglas, Lincoln, and Washoe Counties had statistically significant lower physical inactivity prevalence estimate compared to the state estimate. There was no difference in the prevalence estimates of the other Counties compared to the state estimate.
