Source: Nevada State Health Division HIV/AIDS Reporting System (eHARS), (February 2009)

Rates highlighted in red indicate where Nevada had a higher rate than the national rate. Nevada rates are based on 2007 interim population estimates (most recent data available). The national rate by gender does not include cases aged less than 13 years. HIV data only includes 33 states and 5 U.S. dependent areas with name-based HIV reporting.

eHARS surveillance statistics includes HIV and AIDS cases diagnosed in Nevada, both living and deceased. The surveillance data excludes HIV/AIDS cases diagnosed in other states, but who currently live in Nevada. HIV Diagnoses and AIDS Diagnoses may duplicate case counts if the person was diagnosed with both HIV and AIDS in 2008.

*"All Other Counties" includes the counties of Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine.

**NR is the national rate estimate according to the Centers for Disease Control and Prevention (CDC); rates based on 2006 HIV/AIDS data and 2005 population estimates (most recent data available).
