

Teen Pregnancy (15-19 yrs old) Counts and Rates, Nevada Residents, 1998-Preliminary 2008*

* Note: 2008 birth and fetal death data are not final and is subject to changes.

Note: Fetal deaths are 20+ weeks of estimated gestation.

Note: Abortion counts are based only on cases reported to the Nevada State Health Division.

Note: Rates are per 1,000 age-specific female population.

Note: Rates were not adjusted for cases where age was listed as unknown.

Years	Births	Abortions	Fetal Deaths	Total	Population	Rates
1998	3,653	1,175	23	4,851	62,140	78.1
1999	3,710	1,328	29	5,067	64,528	78.5
2000	3,770	1,395	31	5,196	67,084	77.5
2001	3,663	1,653	26	5,342	71,095	75.1
2002	3,638	1,458	26	5,122	73,639	69.6
2003	3,720	1,372	27	5,119	76,729	66.7
2004	3,787	1,450	28	5,265	81,288	64.8
2005	3,921	1,576	30	5,527	85,604	64.6
2006	4,285	1,633	31	5,949	89,472	66.5
2007	4,354	1,523	35	5,912	92,701	63.8
2008*	4,192	1,497	31	5,720	93,403	61.2

Source: Population data from 2006-2008 is interim. Data was provided by the Nevada State Demographer.
