

# Humboldt County

Population (2008) 18,014

Land Area (square miles) 9,648

Persons per square mile 1.9

## Race/Ethnicity

- White 75.1%
- Black 0.6%
- American Indian & Alaskan Native 4.0%
- Asian 0.9%
- Hispanic or Latino origin 19.3%

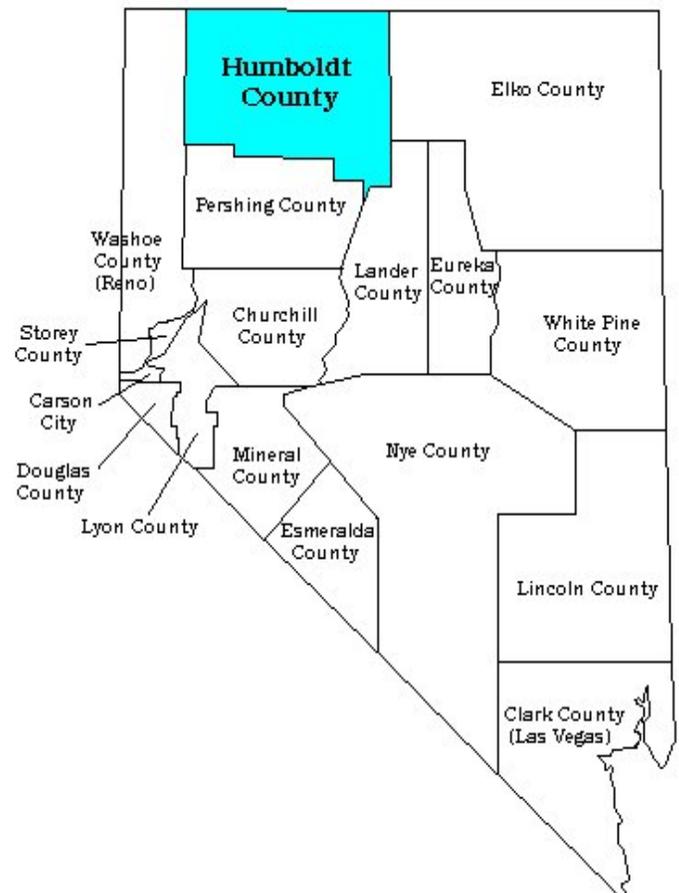

Median Household Income \$56,875

Persons Below Poverty 11.4%

Population and race/ethnicity data are from the Nevada State Demographer; Income and poverty data are from the U.S. Census Bureau

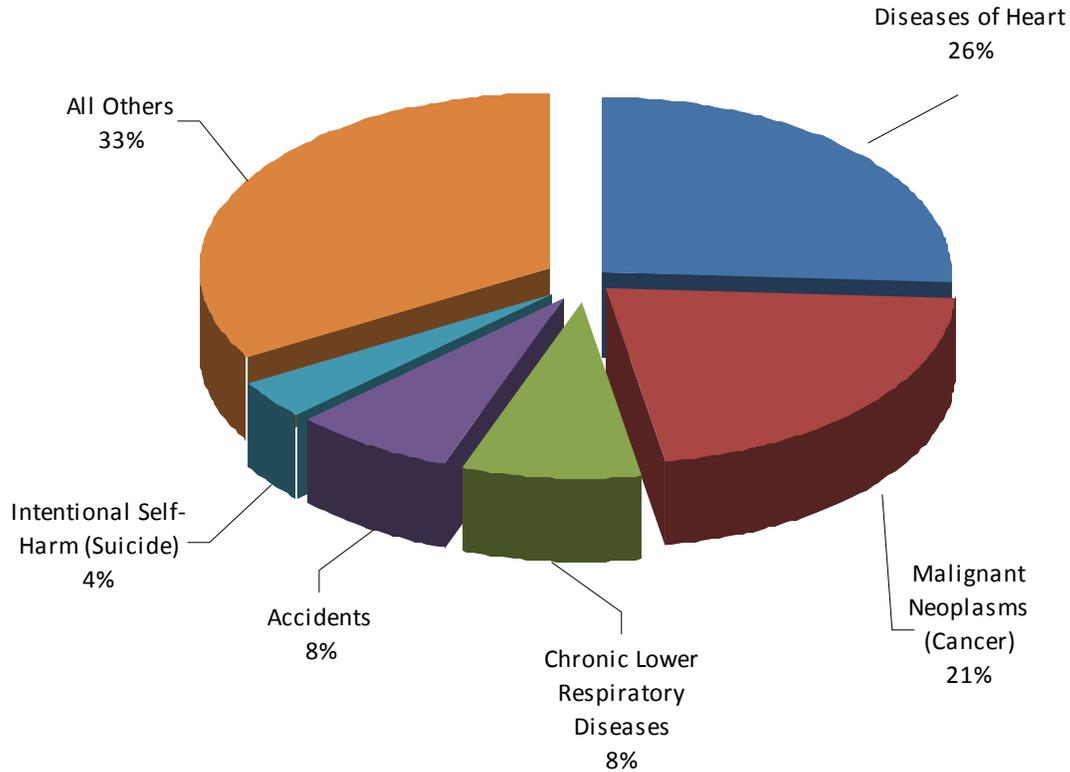

## Healthy People Highlights:

- Since 2008, Humboldt County has exceeded the state rate for the percentage of persons with health insurance.
- Humboldt County's stroke mortality rate has consistently been lower than the state's from 2000 to 2008.
- Humboldt County's firearm related death rate has decreased by almost half during the years 2000—2008.
- This decade, the motor vehicle crash mortality rate increased 11.7 per 100,000 for Humboldt County.
- Humboldt County's adolescent mortality rate, aged 10 to 14 years, averaged over three times that of the state rate between the years 2000—2008.
- The adolescent, aged 15 to 19 years, mortality rate for Humboldt County averaged over twice that of the Nevada rate during the years 2000 to 2008.

# Leading Causes of Death

## Humboldt

2000 - 2008 Pooled Data

Humboldt County's top five leading causes of death is led by heart disease (26%), closely followed by malignant neoplasms—cancer (21%). Chronic lower respiratory diseases (8%), accidents (8%), and suicide (4%) round out the list. All other causes of death account for the remaining 33% of the county's mortality.

Similarly, the leading cause of death for Nevada is heart disease (26%), followed by malignant neoplasms—cancer (23%), chronic lower respiratory diseases (6%), accidents (5%), and cerebrovascular diseases—stroke (5%).

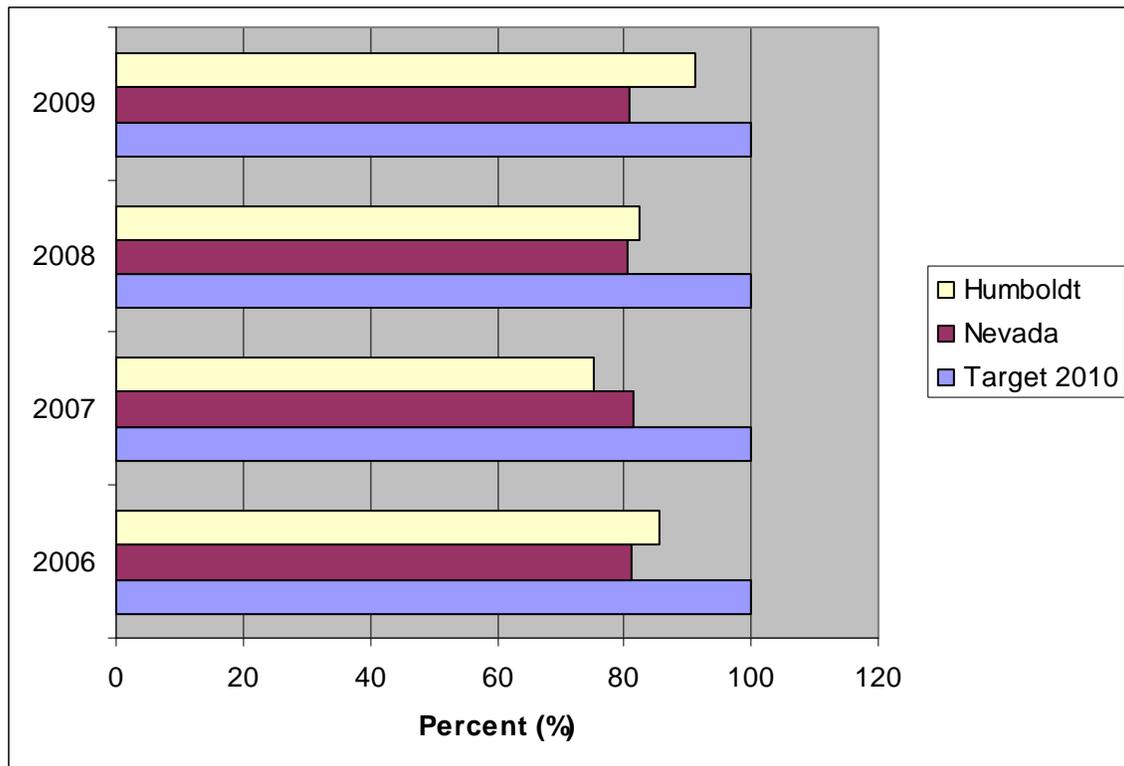

\*The data are from Nevada Vital Statistics Records.  
Note: 2007 and 2008 data are not final and are subject to change.

# Access to Quality Health Services

**Healthy People 2010 Objective (1-1):** Increase the proportion of persons with health insurance.

**Healthy People 2020 Objective AHS HP2020-1:** Increase the proportion of persons with health insurance.

**Proportion of Persons with Health Insurance, Humboldt County and Nevada, BRFSS Data, 2006 - 2009.\***

For three of the available years, 2006, 2008, and 2009, Humboldt County exceeded the state rate for the percentage of persons with health insurance. The Nevada rate for the percentage of persons with health insurance has remained steady around 80 percent. Neither the state nor Humboldt County have attained the Healthy People 2010 target of 100 percent.

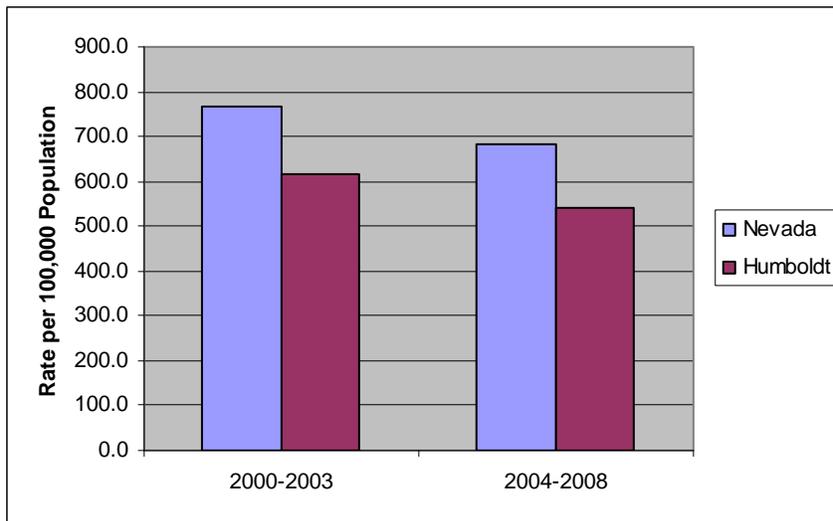

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

# Arthritis, Osteoporosis, and Chronic Back Conditions

**Healthy People 2010 Objective (15-28):** Reduce hip fractures among females and males aged 65 and older.

**Healthy People 2020 Objective AOCBC HP2020-11:** Reduce hip fractures among older adults.

**Aggregated Hospitalization Rate for Hip Fractures Among Females Aged 65 Years and Older, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

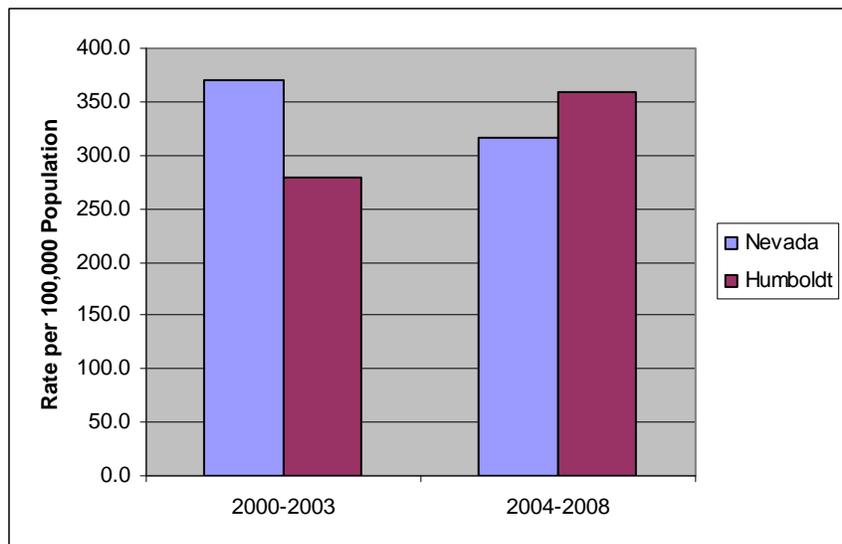

Humboldt County's hospitalization rate for hip fractures among females, aged 65 years and older, has been lower than the state rate for each of the years reported.

The Healthy People 2010 target was a rate of 416 per 100,000 population.

**Aggregated Hospitalization Rate for Hip Fractures Among Males Aged 65 Years and Older, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The hospitalization rates for hip fractures among males, aged 65 years and older, decreased for Nevada but increased for Humboldt County between the years 2000-2008.

The Healthy People 2010 target was a rate of 474 per 100,000 population.

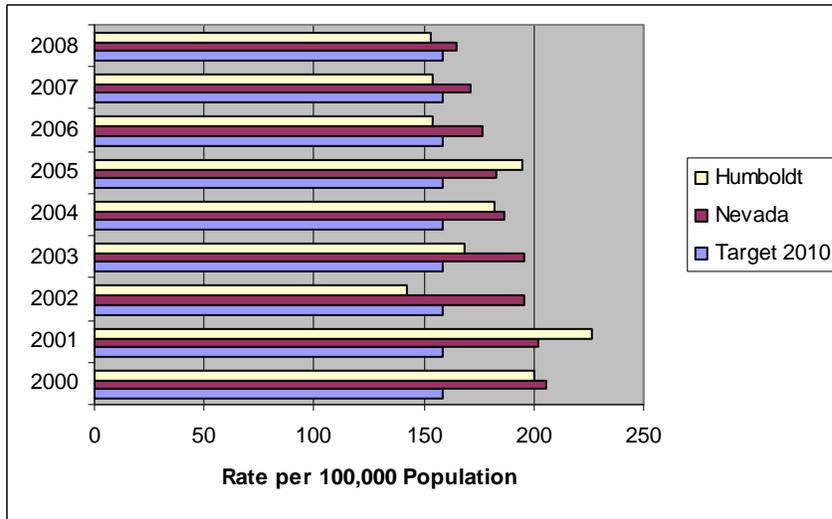

\*The Nevada data are from Nevada Inpatient Hospital Discharge (NIHDD).

# Cancer

**Healthy People 2010 Objective (3-1):** Reduce the overall cancer death rate.

**Healthy People 2020 Objective C HP2020-1:** Reduce the overall cancer death rate.

**Age-Adjusted Overall Cancer Death Rate, Humboldt County and Nevada, 2000 - 2008.\***

The overall cancer death rate in Humboldt County fluctuated between 2000-2008, but was at a lower rate in 2008 than in 2000. The Nevada rate declined over the period from 2000-2008.

The Healthy People 2010 target was a rate of 158.6 per 100,000 population.

**Healthy People 2010 Objective (3-2):** Reduce the lung cancer death rate.

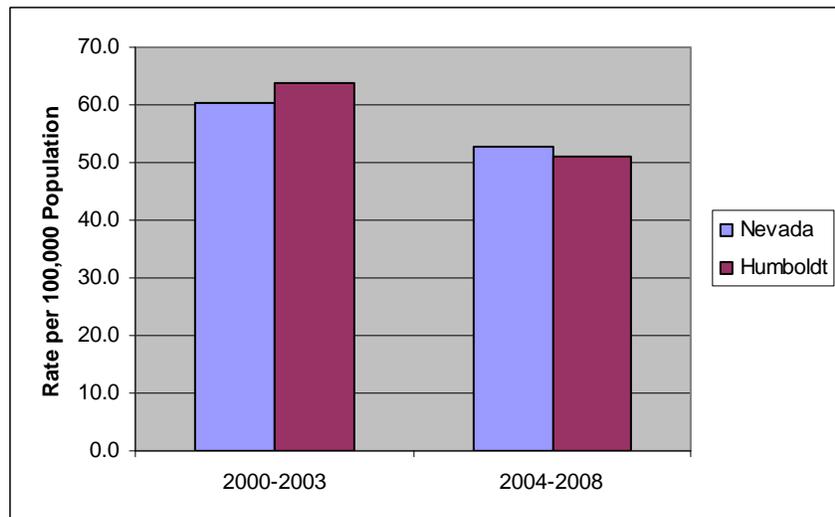

**Healthy People 2020 Objective C HP2020-2:** Reduce the lung cancer death rate.

**Aggregated Age-Adjusted Lung Cancer Death Rate, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The lung cancer mortality rate declined for both Humboldt County and Nevada from 2000-2008.

The county rate has dropped below the state rate during the 2004—2008 reporting period.

The Healthy People 2010 target was a rate of 43.3 per 100,000 population.

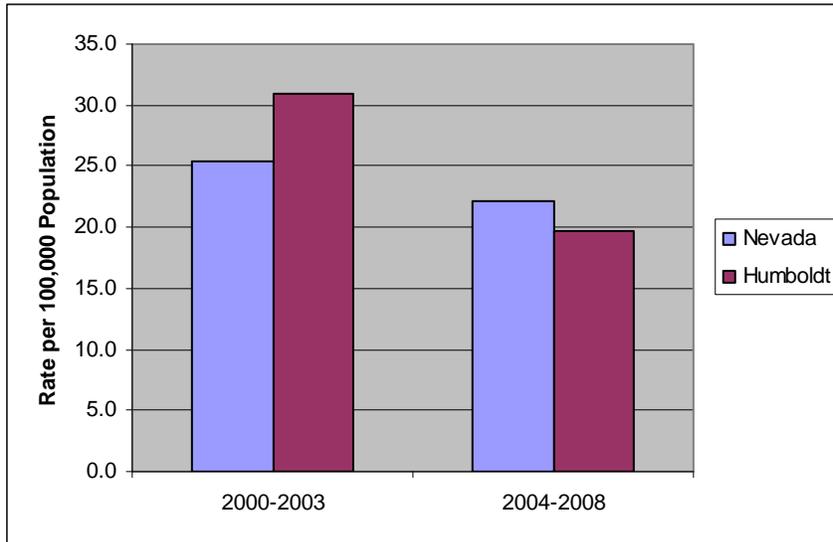

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (3-3):** Reduce the breast cancer death rate.

**Healthy People 2020 Objective C HP2020-3:** Reduce the female breast cancer death rate.

**Aggregated Age-Adjusted Female Breast Cancer Death Rate, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

Since the year 2000, the female breast cancer mortality rate declined for both the state and Humboldt County.

The Humboldt County aggregated rate was lower than the Nevada rate during the 2004—2008 reporting period.

The Healthy People 2010 target rate was 21.3 per 100,000 population.

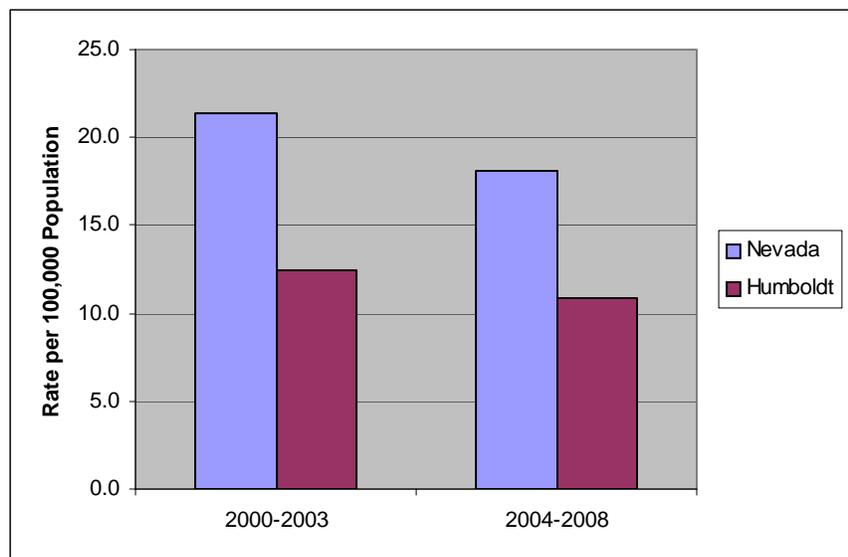

**Healthy People 2010 Objective (3-5):** Reduce the colorectal cancer death rate.

**Healthy People 2020 Objective C HP2020-5:** Reduce the colorectal cancer death rate.

**Aggregated Age-Adjusted Colorectal Cancer Death Rate, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The colorectal cancer mortality rate declined for both Humboldt County and Nevada. The county rate was lower than the state rate from 2000-2008.

The Healthy People 2010 target rate was 13.7 per 100,000 population.

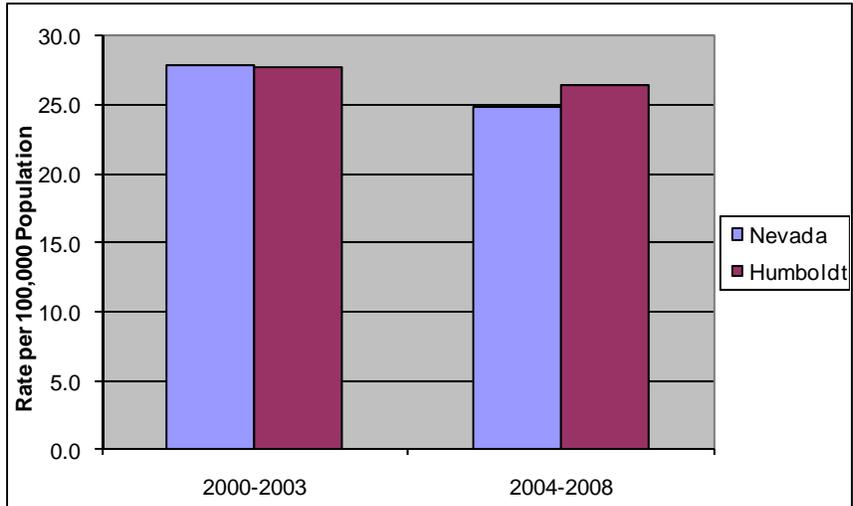

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (3-7):** Reduce the prostate cancer death rate.

**Healthy People 2020 Objective C HP2020-7:** Reduce the prostate cancer death rate.

**Aggregated Age-Adjusted Prostate Cancer Death Rate, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The prostate cancer mortality rate declined for Nevada and Humboldt County between 2000-2008.

The Healthy People 2010 target rate was 28.2 per 100,000 population.

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

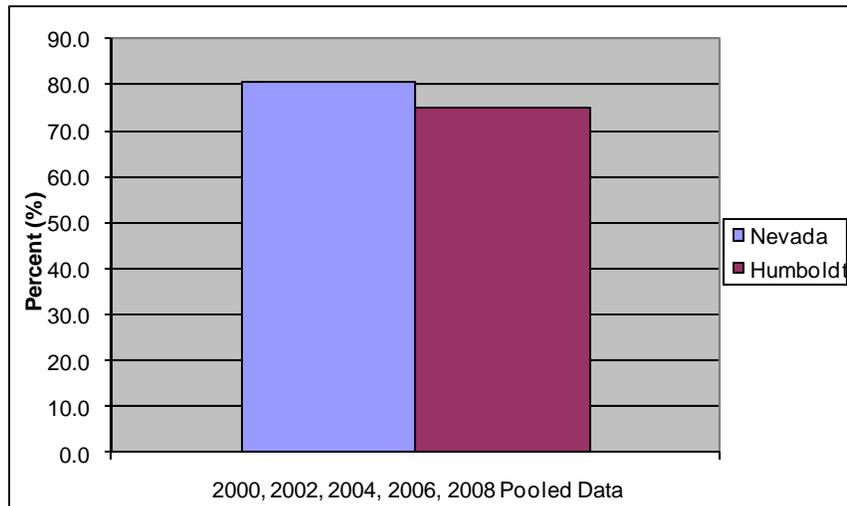

**Healthy People 2010 Objective (3-11b.):** Increase the proportion of women aged 18 years and older who have had a Pap test in the preceding three years.

**Healthy People 2020 Objective C HP2020-15:** Increase the proportion of women who receive a cervical cancer screening based on the most recent guidelines.

**Aggregated Proportion of Women Aged 18 and Older Receiving a Pap Test within Three Years, Humboldt County and Nevada, BRFSS Data, 2000, 2002, 2004, 2006, 2008.\***

The percentage of women, aged 18 and older, receiving a Pap test within three years was slightly lower for Humboldt County than the Nevada rate from 2000-2009.

Neither have met the Healthy People 2010 target of 90 percent.

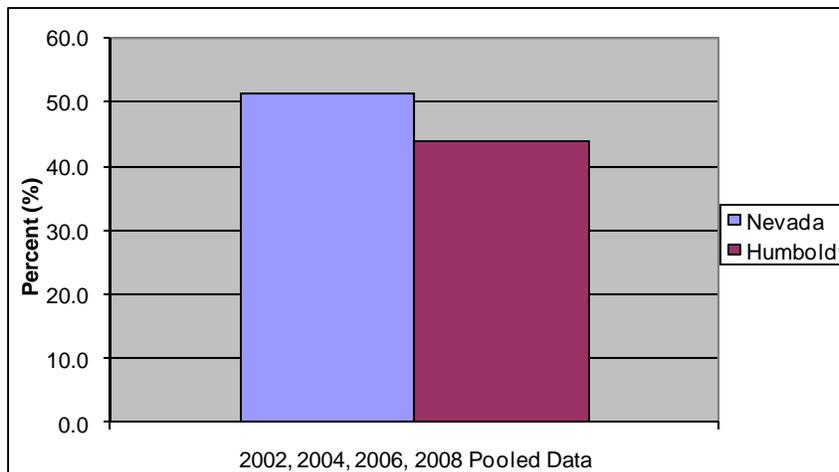

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

**Healthy People 2010 Objective (3-12b.):** Increase the proportion of adults aged 50+ who have ever had a sigmoidoscopy or colonoscopy.

**Healthy People 2020 Objective C HP2020-16:** Increase the proportion of adults who receive a colorectal cancer screening based on the most recent guidelines.

**Aggregated Proportion of Adults Aged 50+ Who Have Ever Had a Sigmoidoscopy or Colonoscopy, Humboldt County and Nevada, BRFSS Data, 2002, 2004, 2006, 2008.\***

The percentage of adults, aged 50 years and older, who have ever had a sigmoidoscopy or colonoscopy was higher for the state than Humboldt County from 2000-2008.

The Healthy People 2010 target was 50 percent.

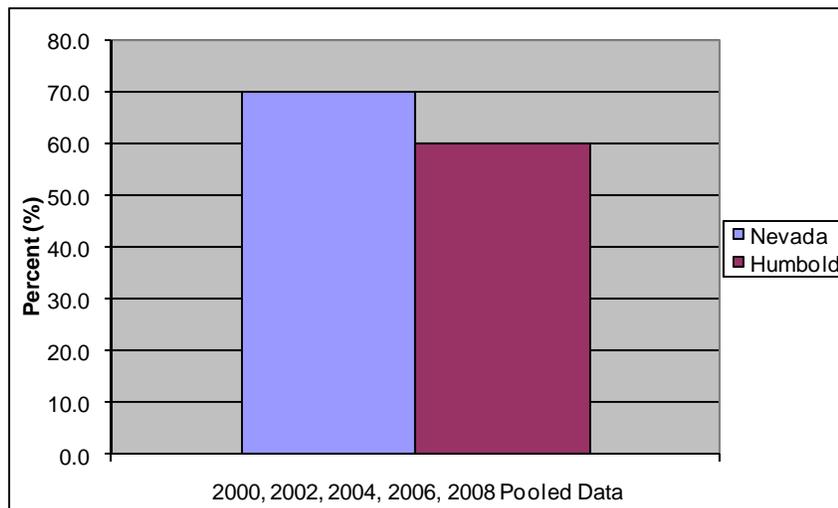

**Healthy People 2010 Objective (3-13):** Increase the proportion of women aged 40+ who have had a mammogram in the preceding two years.

**Healthy People 2020 Objective C HP2020-17:** Increase the proportion of women who receive a breast cancer screening based on the most recent guidelines.

**Aggregated Proportion of Women Aged 40+ Who Have Had A Mammogram in The Preceding 2 Years, Humboldt County and Nevada, BRFSS Data, 2000, 2002, 2004, 2006, 2008.\***

Since the year 2000, the rate of females, aged 40 and older, who have had a mammogram in the preceding two years was lower for Humboldt County than for Nevada.

The Healthy People 2010 target was 70 percent.

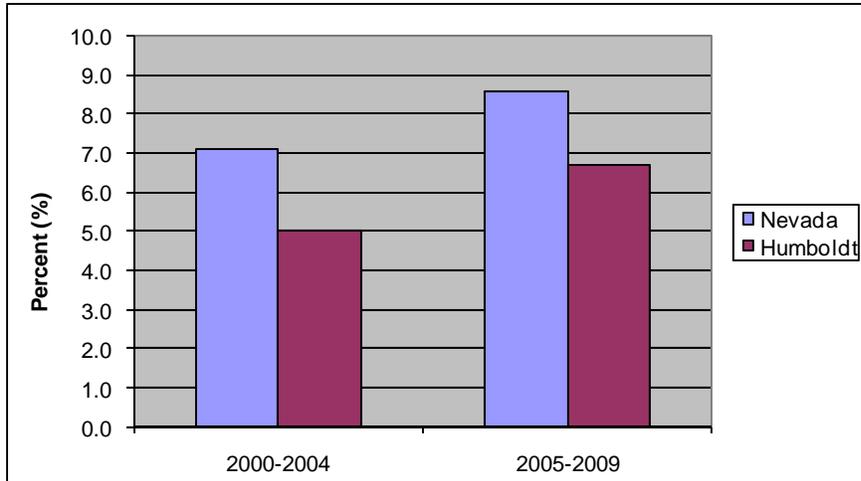

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

# Diabetes

**Healthy People 2010 Objective (5-3):** Reduce the overall percentage of diabetes that is clinically diagnosed.

**Healthy People 2020 Objective D HP2020-1:** Reduce the annual number of new cases of diagnosed diabetes in the population.

**Aggregated Proportion of Persons with Clinically Diagnosed Diabetes, Humboldt County and Nevada, BRFSS Data, 2000 - 2004 and 2005 - 2009.\***

Since 2004, the percentage of persons with clinically diagnosed diabetes increased in Humboldt County and Nevada. The county rate was lower than the state rate in 2000-2004 and 2005-2009.

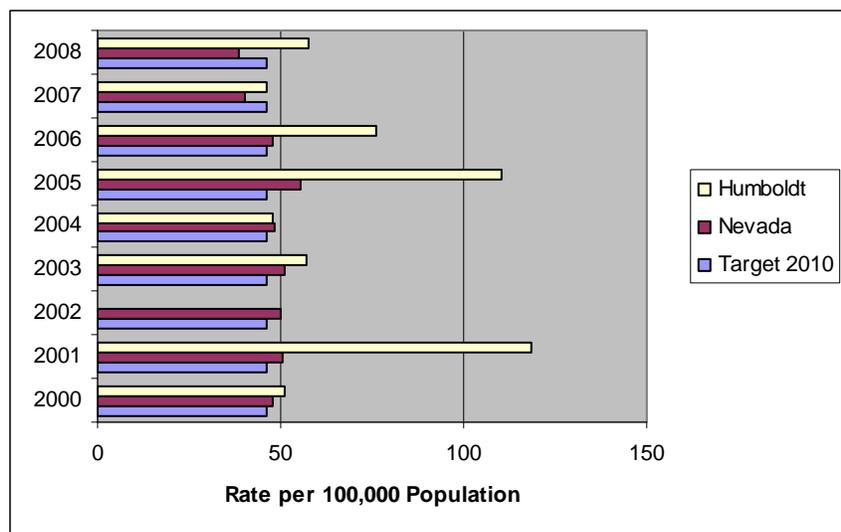

\*These percentages are weighted to survey population. Not all counties were included in the survey results.

**Healthy People 2010 Objective (5-5):** Reduce the diabetes death rate.

**Healthy People 2020 Objective D HP2020-3:** Reduce the diabetes death rate.

**Age-Adjusted Diabetes Death Rate, Humboldt County and Nevada, 2000 - 2008.\***

Humboldt County's diabetes mortality rate has fluctuated between 2000-2008. The county rate was higher than the state rate, which met the Healthy People 2010 target rate of 46.0 per 100,000 population since 2007.

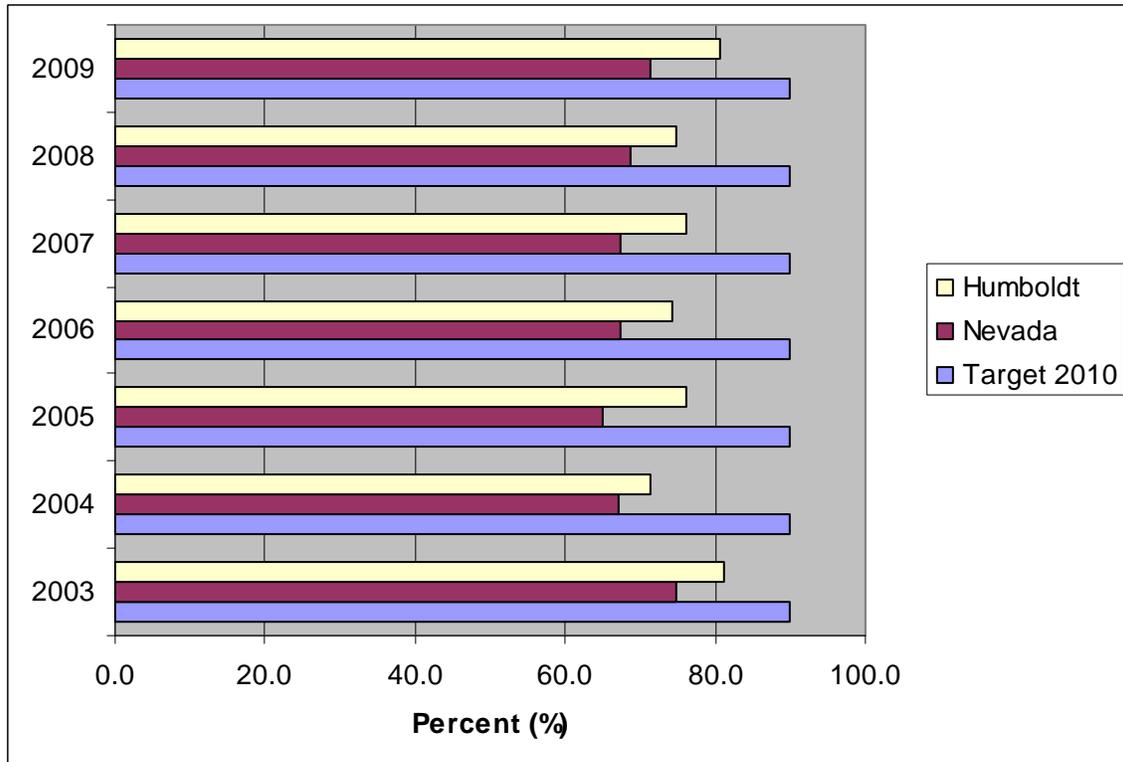

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 are not final and are subject to change.

# Education and Community-Based Programs

**Healthy People 2020 Objective ECBP HP2020-6:** Increase proportion of the population that completes high school education.

**High School Completion Rate (Percent), Humboldt County and Nevada, 2003 - 2009.\***

The high school completion rate fluctuated for Nevada and Humboldt County between 2003-2009. In 2009, Humboldt County attained a rate of 80.7 percent, but has yet to meet the Healthy People 2010 target of 90 percent.

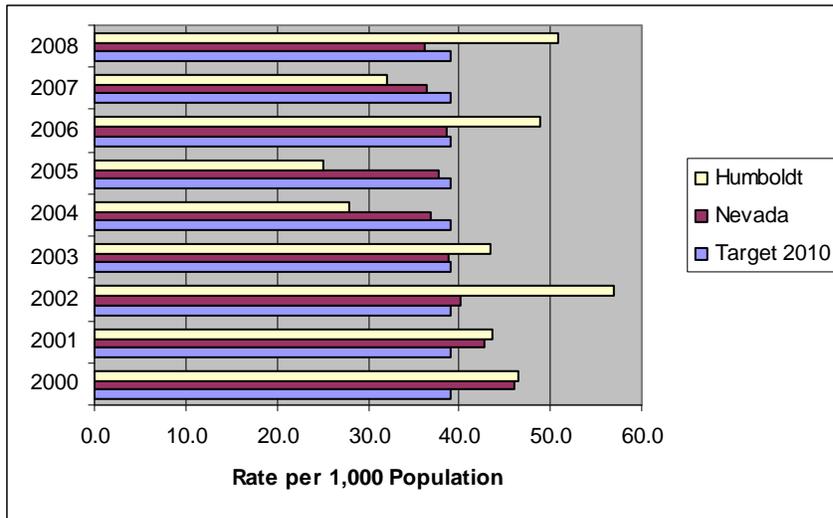

\*The Nevada data are from the Nevada Annual Reports of Accountability  
Note: Nevada and U.S. data are from two different data sources and thus may not be comparable.

# Family Planning

**Healthy People 2010 Objective (9-7):** Reduce pregnancies among adolescent females.

**Healthy People 2020 Objective FP HP2020–8:** Reduce pregnancies among adolescent females, aged 15-17 and aged 18-19.

**Adolescent Pregnancy Rate Among Females Aged 15 to 17 Years, Humboldt County and Nevada, 2000 - 2008.\***

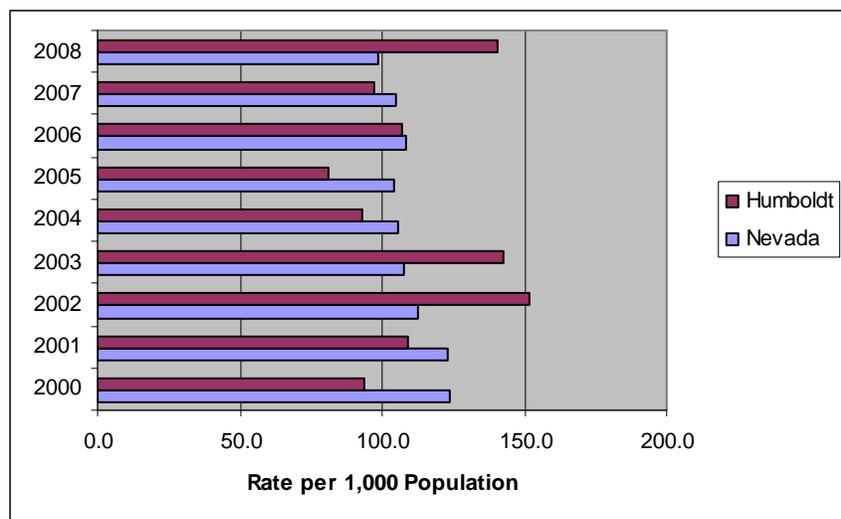

Nevada's rate for adolescent pregnancy among females, aged 15 to 17 years, decreased over the reporting period.

Humboldt County's rate fluctuated during the same time. Humboldt County met the Healthy People 2010 target of 39 per 1,000 population in 2004, 2005, and 2007.

**Adolescent Pregnancy Rate Among Females Aged 18 to 19 Years, Humboldt County and Nevada, 2000 - 2008.\***

The Humboldt County adolescent pregnancy rate among females, aged 18 to 19 years, fluctuated from 2000-2008. The state trend declined over the same reporting period.

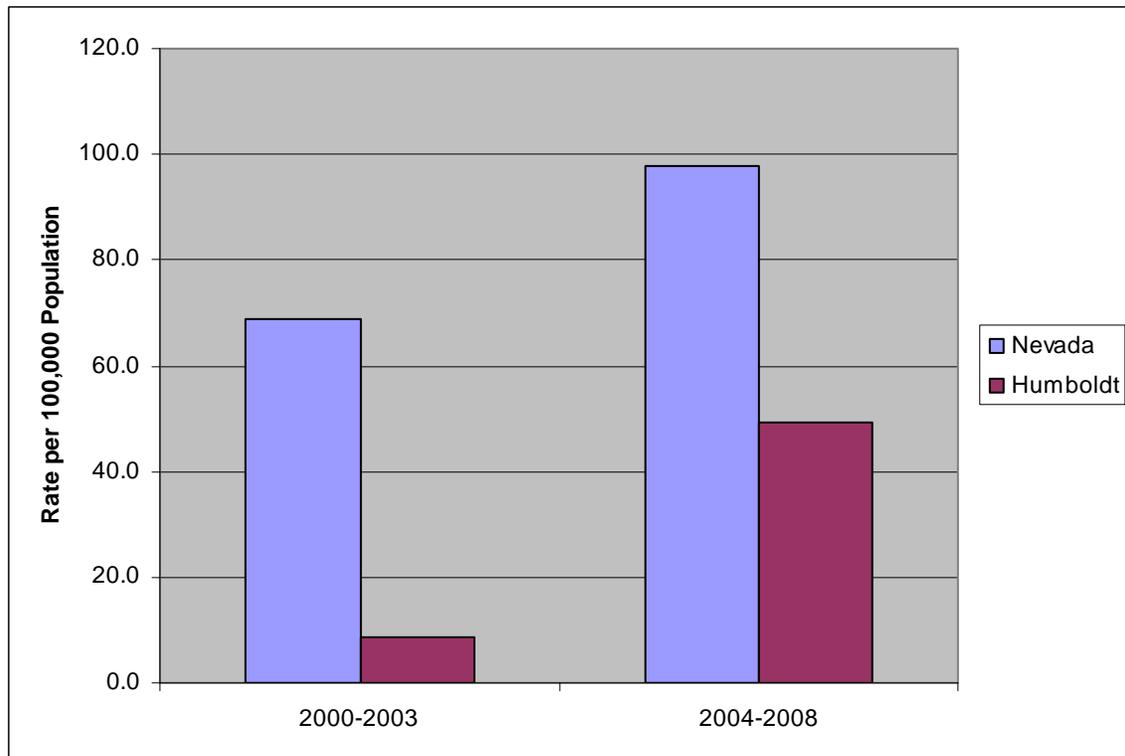

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

# Healthcare-Associated Infections (HAI)

**Healthy People 2020 Objective HAI HP2020-2:** Reduce invasive methicillin-resistant staphylococcus aureus (MRSA) infections.

**Aggregated Rate of Invasive Methicillin-Resistant Staphylococcus Aureus (MRSA) Infections, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The rate of invasive methicillin-resistant staphylococcus aureus (MRSA) infections increased over the years 2000—2008 for both Nevada and Humboldt County. The county rate was markedly lower than the Nevada rate during both reporting periods 2000—2003 and 2004—2008.

This is a new focus area objective for the federal Healthy People 2020 Program. The Healthy People 2020 target rate is 6.56 per 100,000 population.

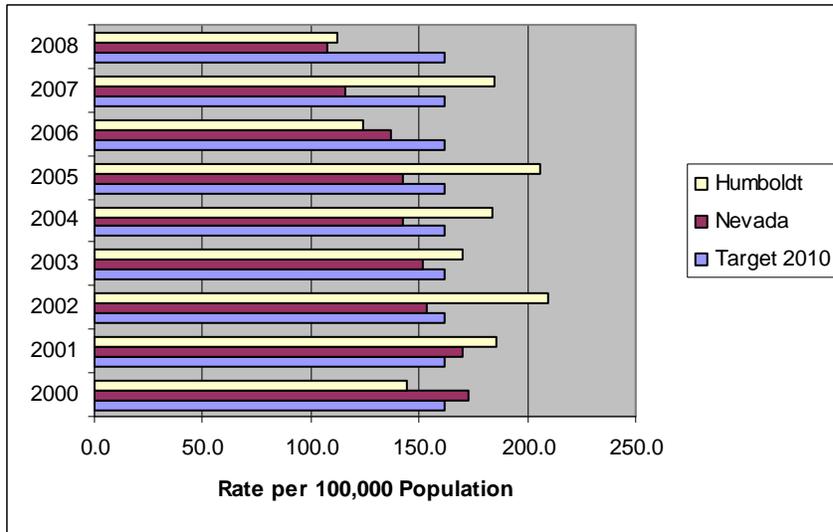

\*These rates are age-adjusted to the 2000 U.S. standard population. Nevada data are from the Nevada Inpatient Hospital Discharge Database (NIHDD)

# Heart Disease and Stroke

**Healthy People 2010 Objective (12-1):** Reduce coronary heart disease deaths.

**Healthy People 2020 Objective HDS HP2020-2:** Reduce coronary heart disease deaths.

**Age-Adjusted Coronary Heart Disease Death Rate, Humboldt County and Nevada, 2000 - 2008.\***

Nevada met the Healthy People 2010 target rate of 162 per 100,000 population for coronary heart disease mortality since 2002.

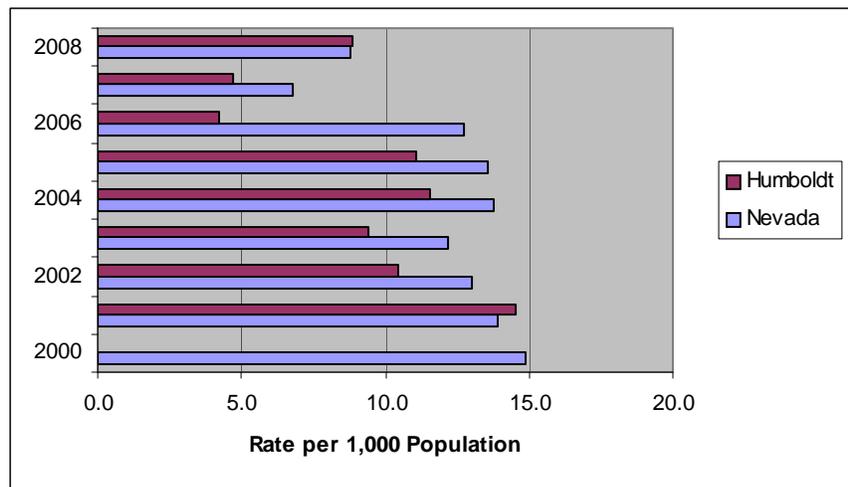

Humboldt County's rate fluctuated between 2000-2008 and the county met the Healthy People 2010 target in 2000, 2006, and 2008.

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 are not final and are subject to change.

**Healthy People 2010 Objective (12-6.):** Reduce the rate of hospitalizations of older adults aged 65 years and older with congestive heart failure.

**Hospitalization Rate of Older Adults Aged 65 Years and Older With Congestive Heart Failure, Humboldt County and Nevada, 2000 - 2008.\***

The hospitalization rate of older adults, aged 65 years and older, with congestive heart failure fluctuated since 2000 for both Humboldt County and Nevada.

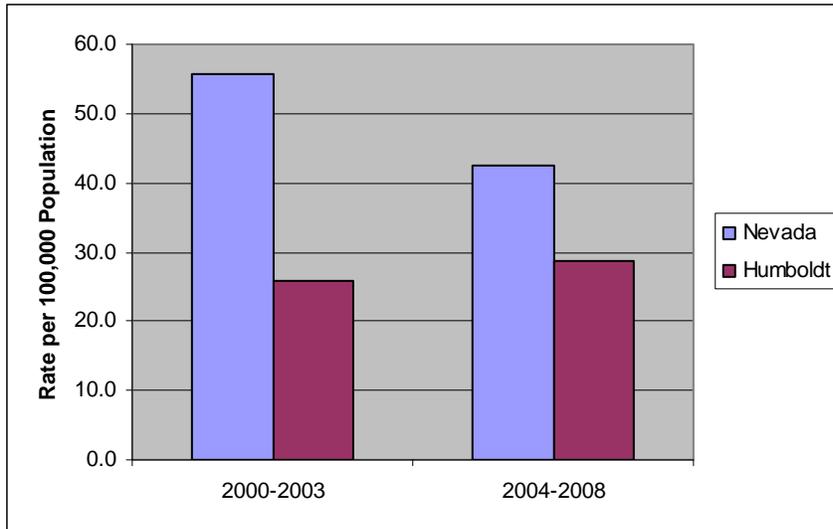

\*The Nevada data are from Nevada Inpatient Hospital Discharge (NIHDD).

**Healthy People 2010 Objective (12-7):** Reduce stroke deaths.

**Healthy People 2020 Objective HDS HP2020-3:** Reduce stroke deaths.

**Aggregated Age-Adjusted Stroke Death Rate, Humboldt County and Nevada, 2000 - 2008.\***

Humboldt County's stroke mortality rate was consistently lower than the state's rate from 2000 to 2008, and lower than the Healthy People 2010 target rate of 50 deaths per 100,000 population.

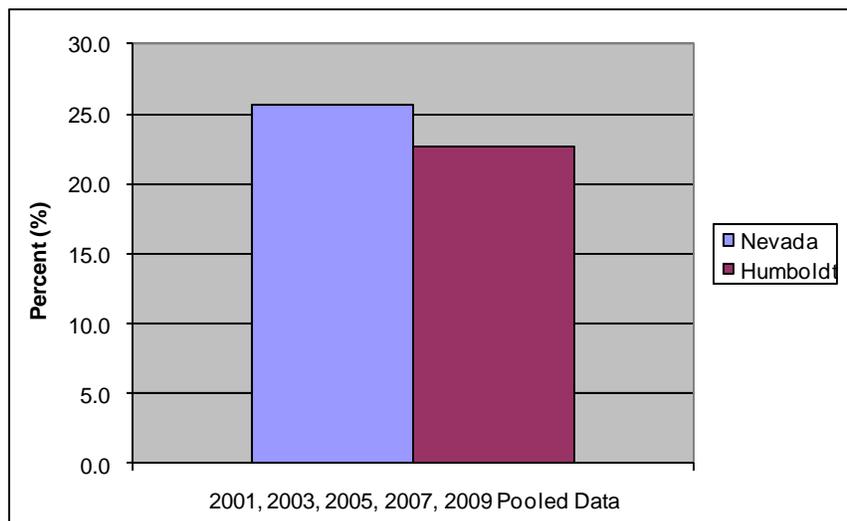

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 are not final and are subject to change.

**Healthy People 2010 Objective (12-9a.):** Reduce the proportion of adults with high blood pressure.

**Healthy People 2020 Objective HDS HP2020-5.1:** Reduce the proportion of adults with hypertension.

**Aggregated Proportion of Adults with High Blood Pressure, Humboldt County and Nevada, BRFSS Data, 2001, 2003, 2005, 2007, 2009.\***

Humboldt County had a lower proportion of adults with high blood pressure than the state from 2001-2009, but has not yet met the Healthy People 2010 target of 14 percent.

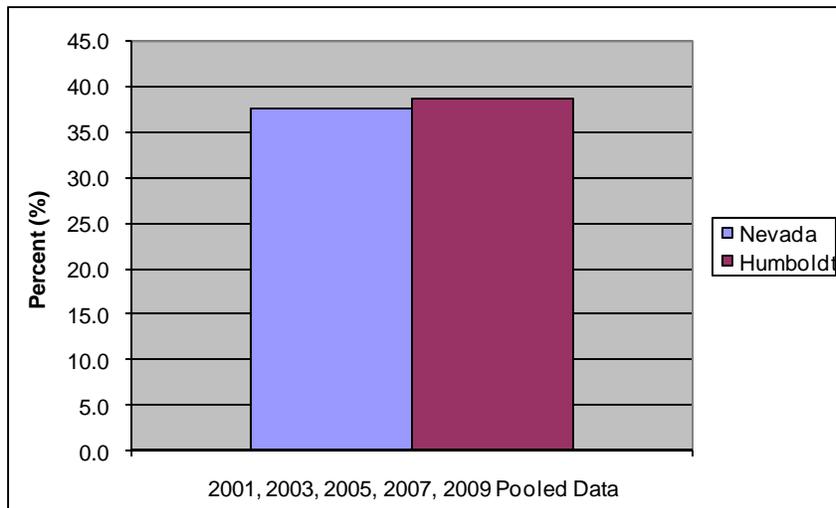

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

**Healthy People 2010 Objective (12-14):** Reduce the proportion of adults with high blood cholesterol levels.

**Healthy People 2020 Objective HDS HP2020-7:** Reduce the proportion of adults with high blood cholesterol levels.

**Aggregated Proportion of Adults with High Cholesterol Levels, Humboldt County and Nevada, BRFSS Data, 2001, 2003, 2005, 2007, 2009.\***

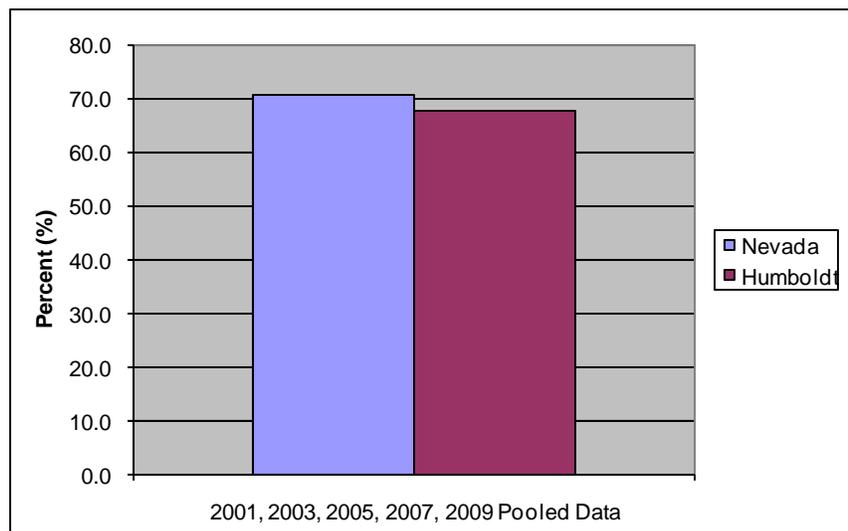

The percentage of adults with high cholesterol levels is slightly higher in Humboldt County than the state and neither have met the Healthy People 2010 target of 14 percent.

**Healthy People 2010 Objective (12-15):** Increase the proportion of adults who have had their blood cholesterol checked within the preceding 5 years.

**Healthy People 2020 Objective HDS HP2020-6:** Increase the proportion of adults who have had their blood cholesterol checked within the preceding 5 years.

**Aggregated Proportion of Adults Having Their Blood Cholesterol Checked Within the Preceding 5 Years, Humboldt County and Nevada, BRFSS Data, 2001, 2003, 2005, 2007, 2009.\***

Humboldt County's rate of adults having their blood cholesterol checked within the preceding five years, is approximately the same as the Nevada rate, and neither have met the Healthy People 2010 target of 80 percent.

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

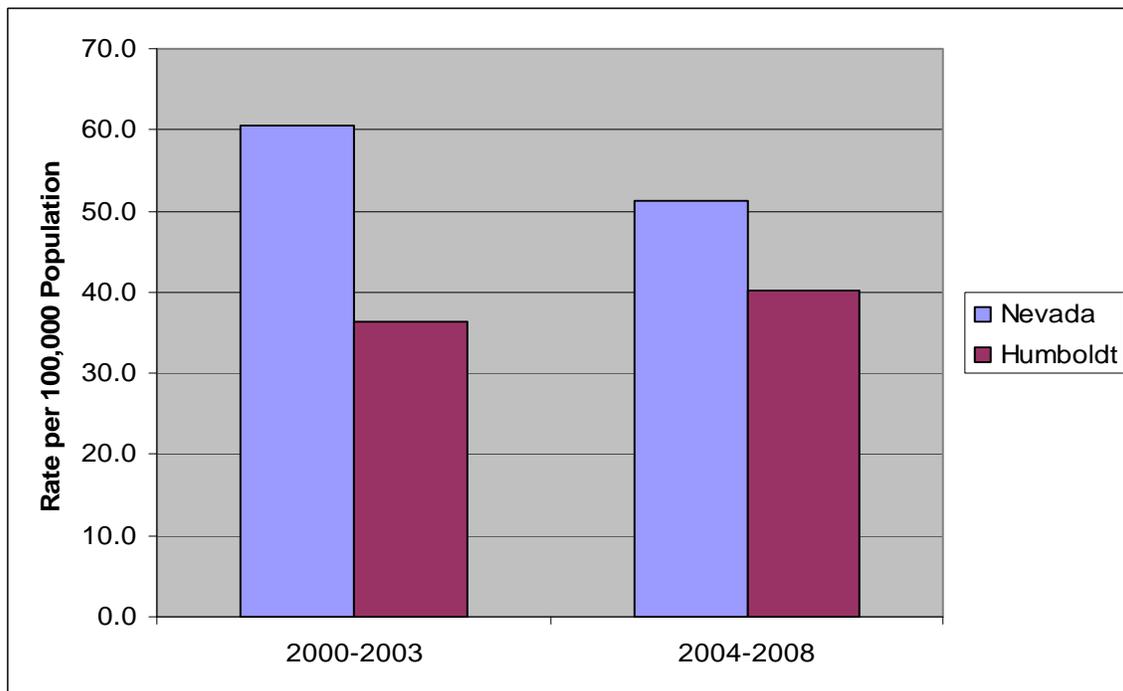

# Immunization and Infectious Diseases

**Healthy People 2010 Objective (14-17):** Reduce hospitalization caused by peptic ulcer disease in the United States.

**Healthy People 2020 Objective IID HP2020-10:** Reduce hospitalization caused by peptic ulcer disease in the United States.

NOTE: This objective was removed from the final HP 2020 release.

**Aggregated Age-Adjusted Rate of Hospitalizations for Peptic Ulcer Disease, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The average rate of hospitalizations for peptic ulcer disease has decreased for Nevada and increased for Humboldt County from 2000-2008. The county rate averaged lower than the state rate over this period.

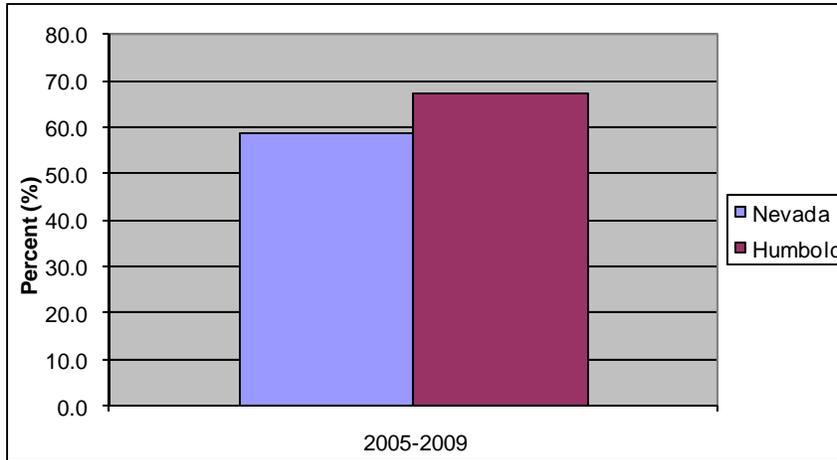

The county has met the Healthy People 2010 target of 46 per 100,000 population.

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from the National Electronic Telecommunications System for Surveillance (NEDSS).

**Healthy People 2010 Objective (14-29a.):** Increase the proportion of adults, aged 65 years and older, who are vaccinated annually against influenza.

**Healthy People 2020 Objective IID HP2020-12.7:** Increase the proportion of non-institutionalized adults, aged 65 years and older, who are vaccinated annually against seasonal influenza.

**Aggregated Proportion of Adults Aged 65 Years and Older Who Are Vaccinated Annually Against Influenza, Humboldt County and Nevada, BRFSS Data, 2005 - 2009.\***

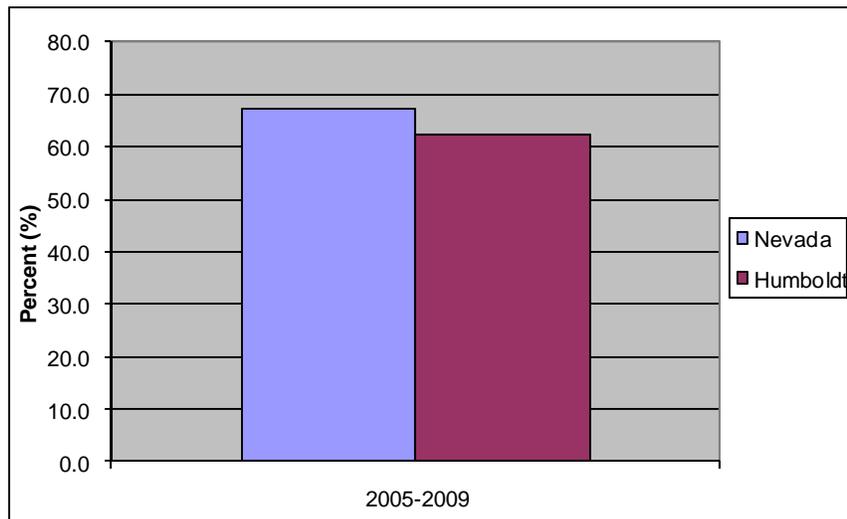

The Humboldt County rate of adults, aged 65 years and older, who are vaccinated against influenza, is higher than the Nevada rate, but has not yet met the Healthy People 2010 target of 90 percent.

**Healthy People 2010 Objective (14-29b.):** Increase the proportion of adults, aged 65 years and older, who have ever received the pneumococcal vaccine.

**Healthy People 2010 Objective IID HP 2020-13.1:** Increase the proportion of non-institutionalized adults, aged 65 years and older, who are vaccinated against pneumococcal disease.

**Aggregated Proportion of Adults Aged 65 Years and Older Who Have Ever Received the Pneumococcal Vaccine, Humboldt County and Nevada, BRFSS Data, 2005 - 2009.\***

The percentage of adults, aged 65 years and older, who have ever received the pneumococcal vaccine was slightly higher for Nevada than Humboldt County during 2005-2009. Neither reached the Healthy People 2010 target of 90 percent.

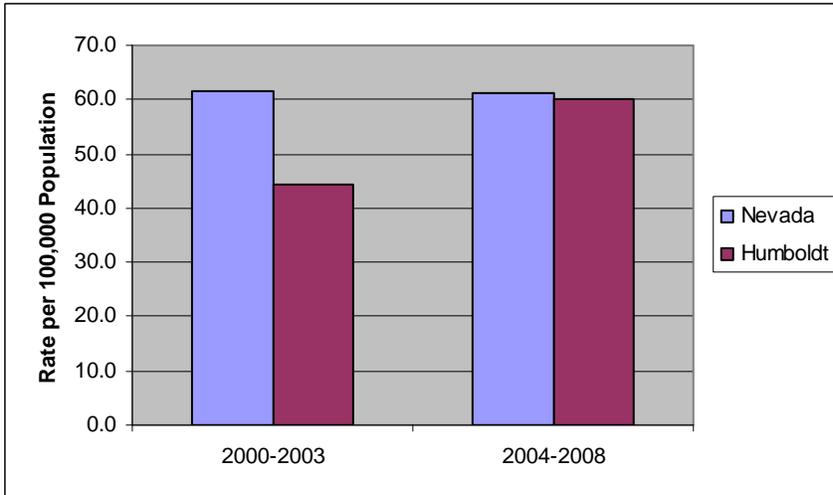

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

# Injury and Violence Prevention

**Healthy People 2010 Objective (15-1):** Reduce hospitalizations for non-fatal head injuries.

**Healthy People 2020 Objective IVP HP2020-2.2:** Reduce hospitalizations for nonfatal traumatic brain injuries.

**Aggregated Hospitalization Rate for Non-Fatal Head Injuries, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The hospitalization rate for non-fatal head injuries remained steady for Nevada, while Humboldt County saw an increase from 2000-2008 to a point where the county nearly matches the state rate.

Neither the state nor the county have met the Healthy People 2010 target rate of 41.2 per 100,000 population.

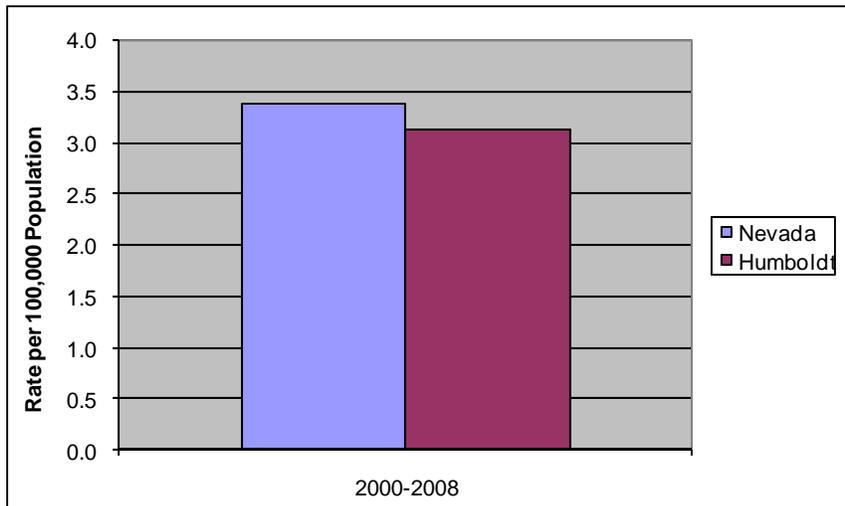

**Healthy People 2010 Objective (15-2):** Reduce hospitalizations for nonfatal spinal cord injuries.

**Healthy People 2020 Objective IVP HP2020-3:** Reduce fatal and nonfatal traumatic spinal cord injuries.

**Aggregated Hospitalization Rate for Non-Fatal Spinal Cord Injuries, Humboldt County and Nevada, 2000 - 2008.\***

The average rate of hospitalization for non-fatal spinal cord injuries was lower for Humboldt County than the state over the years 2000—2008.

Both were higher than the Healthy People 2010 target rate of 2.4 hospitalizations per 100,000 population.

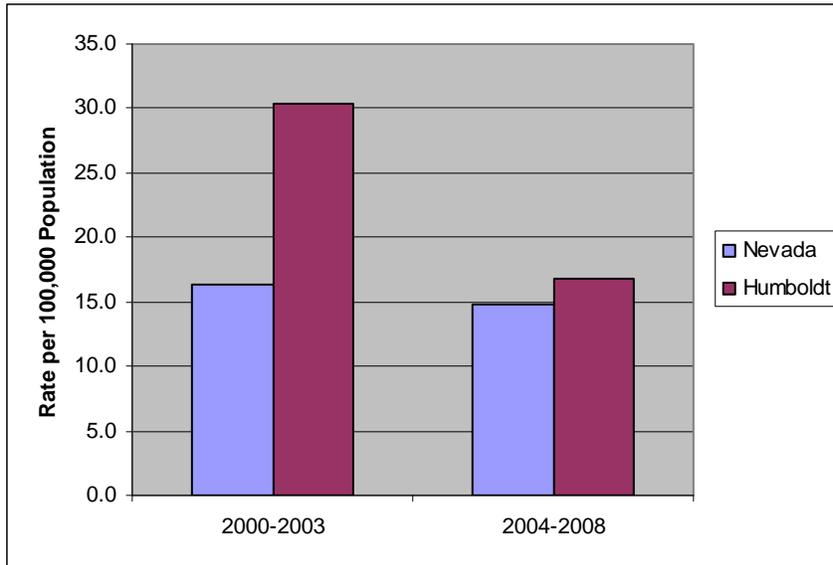

\*The Nevada data are from the Nevada Inpatient Hospital Discharge Database (NIHDD).

**Healthy People 2010 Objective (15-3):** Reduce firearm-related deaths.

**Healthy People 2020 Objective IVP HP2020-30:** Reduce firearm-related deaths.

**Aggregated Age-Adjusted Firearm Related Death Rate, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

From 2000-2008, the firearm related mortality rate declined for both Nevada and Humboldt County.

Humboldt County's firearm related death rate decreased by almost half during the years 2000—2008, yet it is still higher than the Healthy People 2010 target rate of 3.6 per 100,000 population.

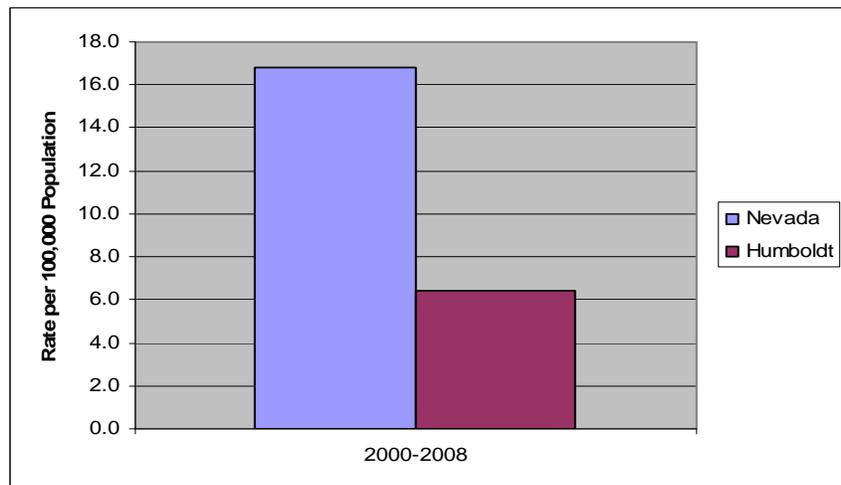

**Healthy People 2010 Objective (15-8):** Reduce deaths caused by poisonings.

**Healthy People 2020 Objective IVP HP2020-9:** Prevent an increase in the rate of poisoning deaths.

**Aggregated Age-Adjusted Death Rate Caused by Poisoning, Humboldt County and Nevada, 2000 - 2008.\***

Since 2000, the Poisoning mortality rate averaged lower for Humboldt County than for Nevada.

Neither the state nor the county have yet met the Healthy People 2010 target rate of 1.5 deaths per 100,000 population.

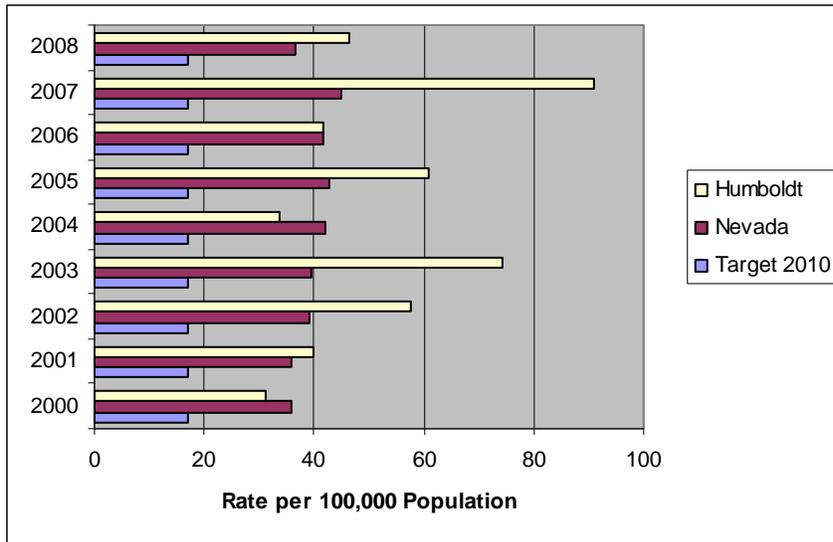

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (15-13):** Reduce deaths caused by unintentional injuries.

**Healthy People 2020 Objective IVP HP2020-11:** Reduce unintentional injury deaths.

**Age-Adjusted Death Rate Caused by Unintentional Injuries, Humboldt County and Nevada, 2000 - 2008.\***

The unintentional injury mortality rate for Nevada and Humboldt County fluctuated during the years 2000 to 2008.

Neither the state, nor the county have met the Healthy People 2010 objective of 17.1 deaths per 100,000 population.

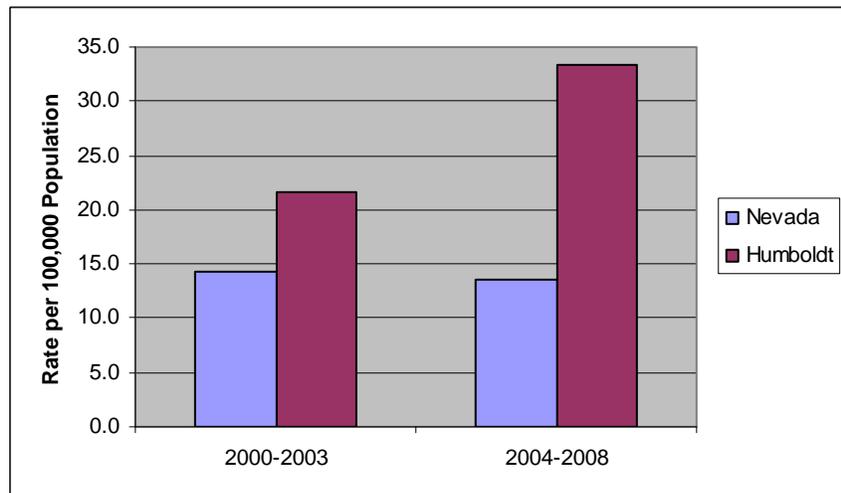

**Healthy People 2010 Objective (15-15a.):** Reduce deaths caused by motor vehicle crashes.

**Healthy People 2020 Objective IVP HP2020-13:** Reduce motor vehicle crash-related deaths.

**Aggregated Age-Adjusted Death Rate Caused by Motor Vehicle Crashes, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The motor vehicle crash mortality rate decreased for the state, but increased for Humboldt County.

Neither have met the Healthy People 2010 target rate of 8 deaths per 100,000 population.

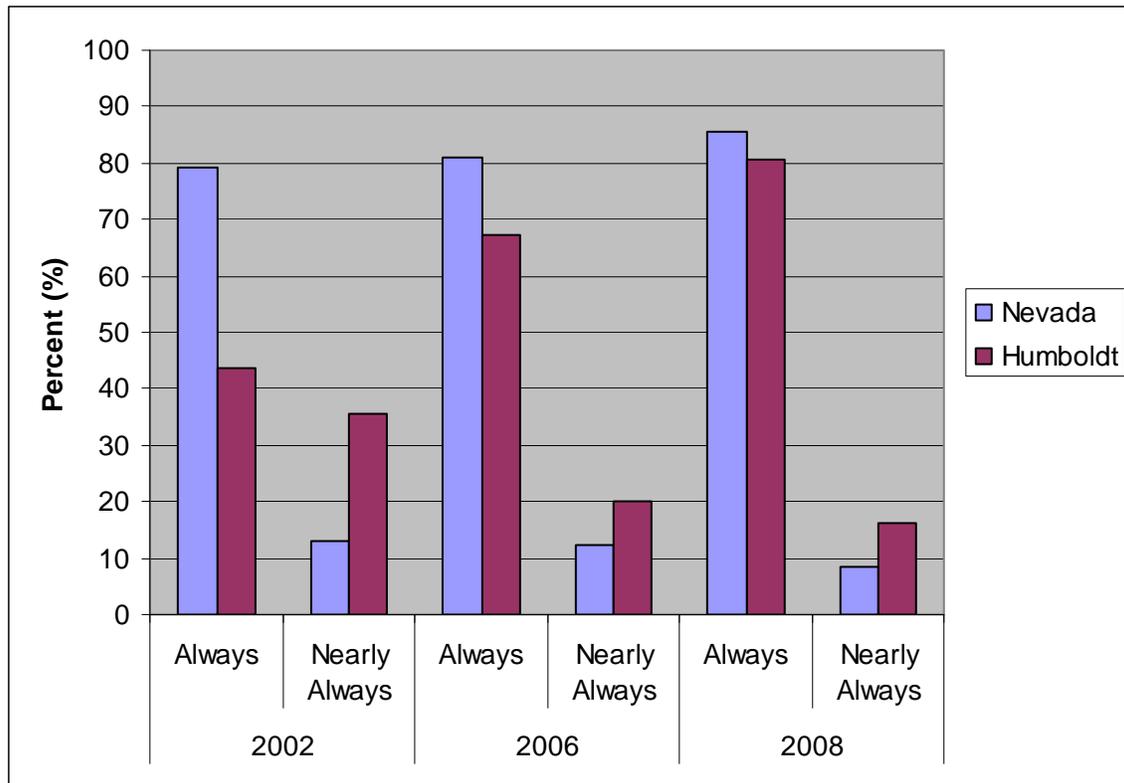

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (15-19):** Increase the use of safety belts.

**Healthy People 2020 Objective IVP HP2020-15:** Increase use of safety belts.

**Proportion of People Using Safety Belts, Humboldt County and Nevada, 2002, 2006, 2008.\***

The percentage of people always using safety belts increased for both Nevada and Humboldt County as reported during the years 2002, 2006, and 2008.

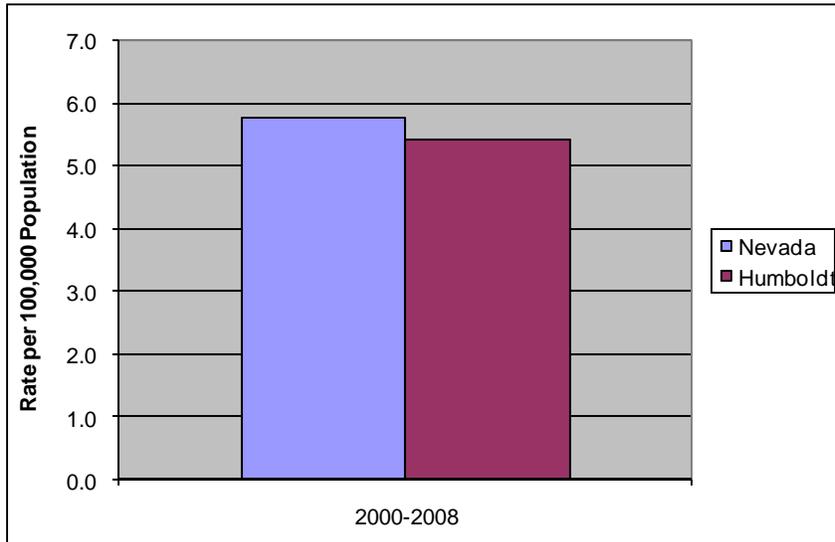

Neither the state nor the county have yet met the Healthy People 2010 target of 89 percent.

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

**Healthy People 2010 Objective (15-27):** Reduce deaths from falls.

**Healthy People 2020 Objective IVP HP2020-23:** Prevent an increase in the rate of fall-related deaths.

**Aggregated Age-Adjusted Death Rate From Falls, Humboldt County and Nevada, 2000 - 2008.\***

The fall mortality rate averaged lower than Nevada for Humboldt County during 2000 — 2008, but higher than the Healthy People 2010 target rate of 3.3 deaths per 100,000 population.

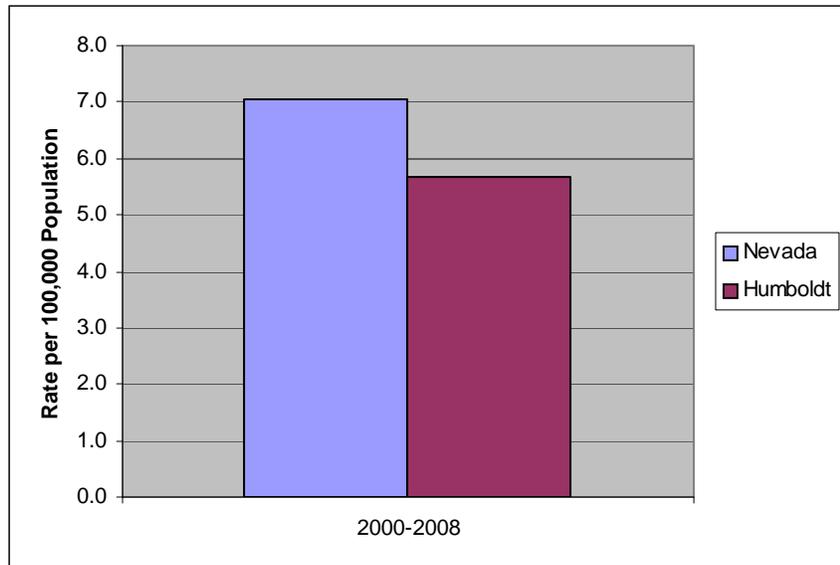

**Healthy People 2010 Objective (15-32):** Reduce homicides.

**Healthy People 2020 Objective IVP HP2020-29:** Reduce homicides.

**Aggregated Age-Adjusted Death Rate from Homicides, Humboldt County and Nevada, 2000 - 2008.\***

From 2000 - 2008, the homicide mortality rate was on average, lower for Humboldt County than for the state.

Neither the state nor the county have yet met the Healthy People 2010 target rate of 2.8 homicides per 100,000 population.

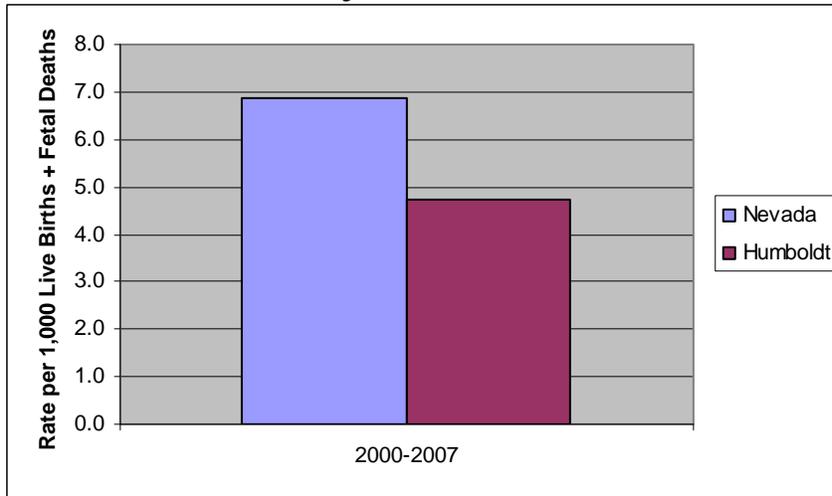

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

# Maternal, Infant, Child Health

**Healthy People 2010 Objective (16-1a.):** Reduce fetal deaths at 20 or more weeks gestation.

**Healthy People 2020 Objective MICH HP2020-1.1:** Reduce fetal deaths at 20 more weeks of gestation.

**Aggregated Fetal Deaths at 20 or More Weeks of Gestation, Humboldt County and Nevada, 2000 - 2008.\***

Fetal mortality rates for Humboldt County, at 20 or more weeks of gestation, averaged below the state rate from 2000-2007.

Neither the county nor the state have yet met the Healthy People target rate of 4.1 fetal deaths per 1,000 live births and fetal deaths.

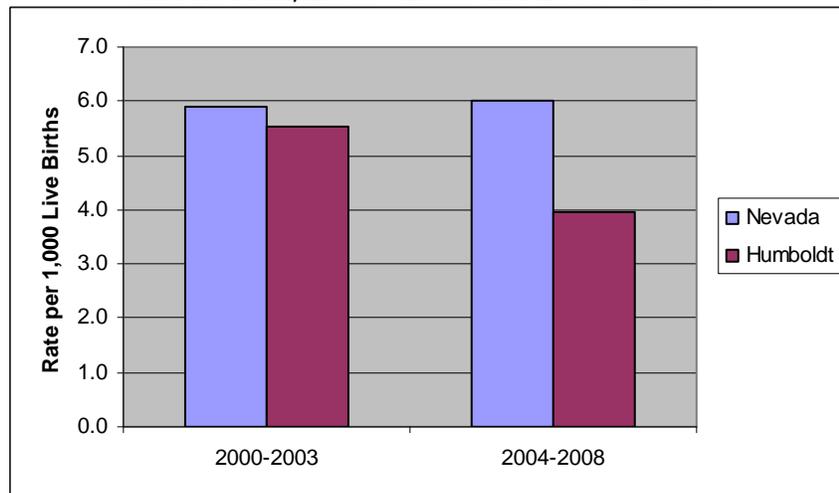

**Healthy People 2010 Objective (16-1c.):** Reduce infant death rate (within 1 year of life).

**Healthy People 2020 Objective MICH HP2020-1.3:** Reduce infant death rate (within 1 year of life).

**Infant Death Rate (Within 1 Year of Life), Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

During the years 2000 to 2008, the infant mortality rate, within one year of life, averaged lower for Humboldt County than for Nevada.

The county met the Healthy People target rate of 4.5 infant deaths per 1,000 live births.

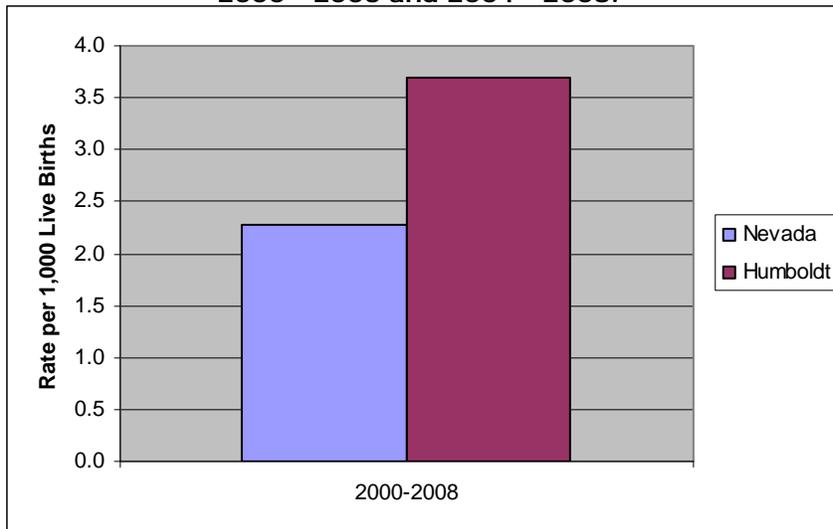

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-1e.):** Reduce postneonatal death rate (between 28 days and 1 year).

**Healthy People 2020 Objective MICH HP2020-1.5:** Reduce postneonatal deaths (between 28 days and 1 year).

**Aggregated Postneonatal Death Rate (Between 28 Days and 1 Year of Life), Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The postneonatal death rate, between 28 days and 1 year of life, averaged higher for Humboldt County than for Nevada between 2000-2008.

Neither the state nor the county have yet met the Healthy People 2010 target rate of 1.2 deaths per 1,000 live births.

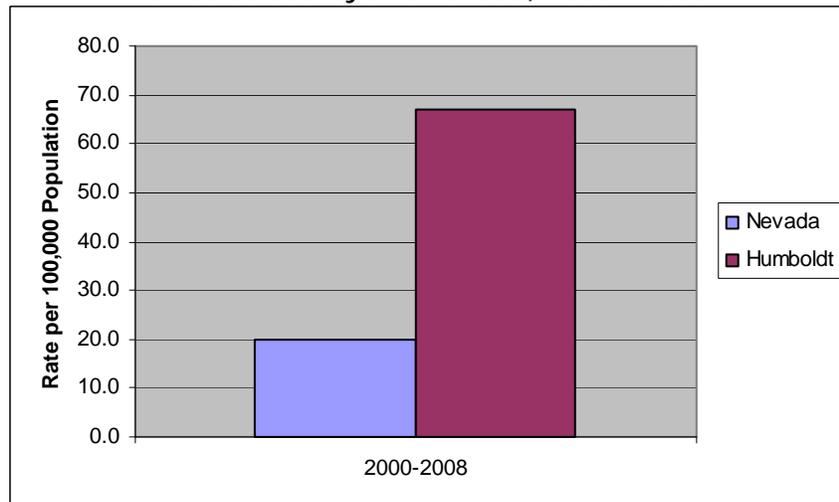

**Healthy People 2010 Objective (16-3a.):** Reduce the rate of adolescent deaths, aged 10 to 14 years.

**Healthy People 2020 Objective MICH HP2020-4.1:** Reduce the rate of adolescent deaths, aged 10 to 14 years.

**Aggregated Death Rate of Adolescents Aged 10 to 14, Humboldt County and Nevada, 2000 - 2008.\***

Humboldt County had a adolescent mortality rate, aged 10 to 14 years, averaging over three times that of the state rate from 2000-2008.

Neither the state nor the county have yet met the Healthy People 2010 target rate of 16.5 deaths per 100,000 population.

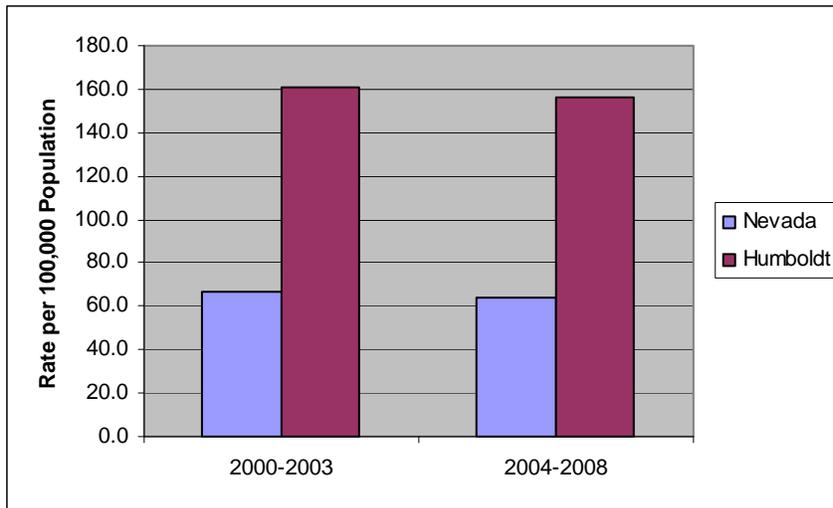

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-3b.):** Reduce the rate of adolescent deaths, aged 15 to 19 years.

**Healthy People 2020 Objective MICH HP2020-4.2:** Reduce the rate of adolescent deaths, aged 15 to 19 years.

**Aggregated Death Rate of Adolescents Aged 15 to 19, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The adolescent mortality rate, aged 15 to 19 years, for Humboldt County averaged over twice that of the Nevada rate during the years 2000 to 2008.

Neither the state nor the county met the Healthy People 2010 target rate of 38 deaths per 100,000 population.

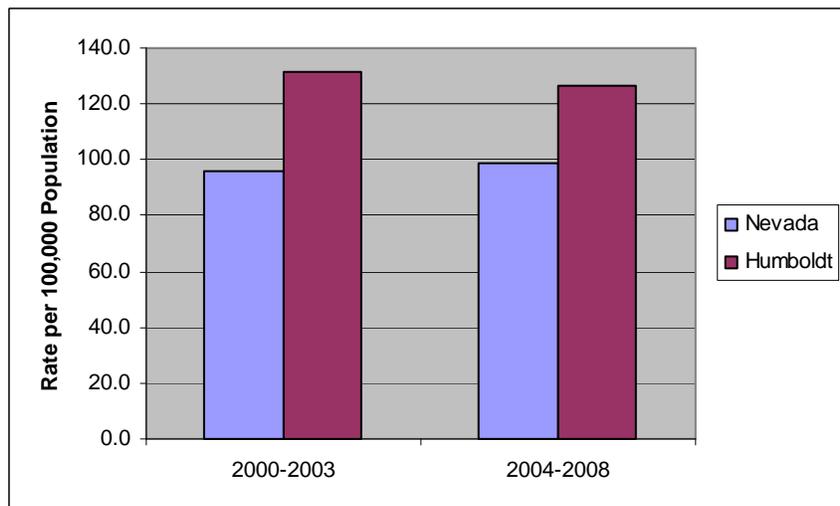

**Healthy People 2010 Objective (16-3c.):** Reduce the rate of young adults deaths, aged 20 to 24 years.

**Healthy People 2020 Objective MICH HP2020-4.3:** Reduce the rate of young adults deaths, aged 20 to 24 years.

**Aggregated Death Rate of Young Adults Aged 20 to 24, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The mortality rate of young adults, aged 20 to 24, increased for Nevada, and decreased for Humboldt County from 2000—2008.

Neither the state nor the county met the Healthy People 2010 target rate of 41.5 deaths per 100,000 population.

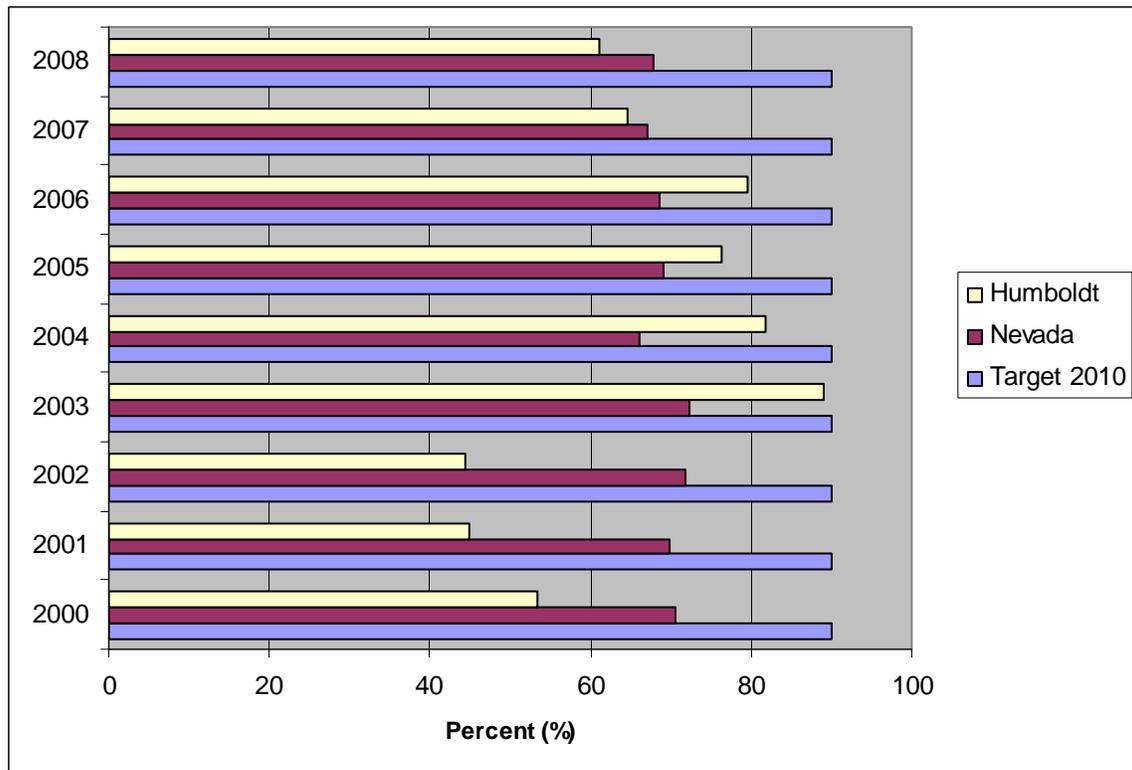

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2007 and 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-6b.):** Increase the proportion of pregnant women receiving early and adequate prenatal care.

**Healthy People 2020 Objective MICH HP2020-10:** Increase the proportion of women receiving early and adequate prenatal care.

**Proportion of Pregnant Women Receiving Early and Adequate Prenatal Care, Humboldt County and Nevada, 2000 - 2008.\***

Over the years 2000-2008, the percentage of pregnant women receiving prenatal care in the first trimester of pregnancy fluctuated for both the state and Humboldt County. The Healthy People 2010 goal of 90 percent was not attained.

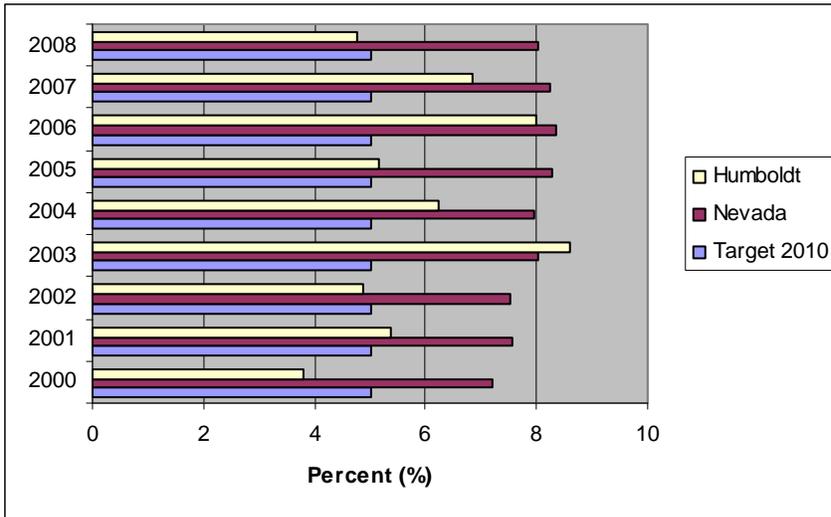

The percentages for the county and state were roughly the same in 2008 as they were in the year 2000.

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-10a.):** Reduce the proportion of low birth weight infants.

**Healthy People 2020 Objective MICH HP2020-8.1:** Reduce the proportion of low birth weight infants.

**Proportion of Low Birth Weight Infants, Humboldt County and Nevada, 2000 - 2008.\***

The percentage of low birth weight infants fluctuated for both the state and for Humboldt County from 2000-2008.

Both had higher percentages in 2008 than the year 2000.

In the years 2000, 2002, and 2008, the county met the Healthy People 2010 target of 5 percent.

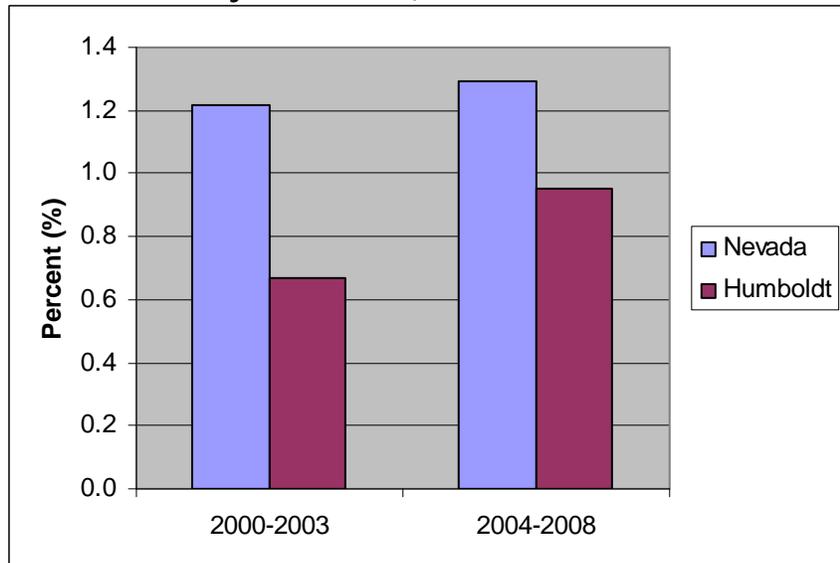

**Healthy People 2010 Objective (16-10b.):** Reduce the proportion of very low birth weight infants.

**Healthy People 2020 Objective MICH HP2020-8.2:** Reduce the proportion of very low birth weight infants.

**Aggregated Proportion of Very Low Birth Weight Infants, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

Over the period of 2000-2008, the percentage of very low birth weight infants increased for both Humboldt County and Nevada.

Humboldt County met the Healthy People 2010 target of .9 percent.

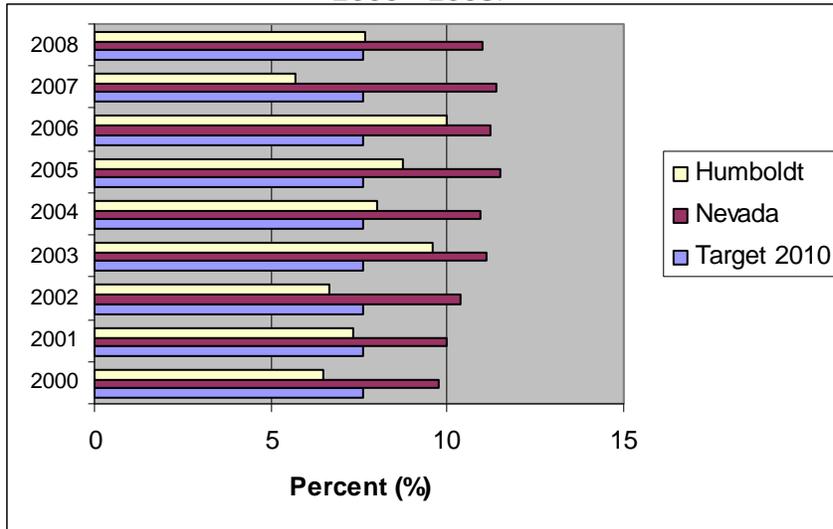

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-11a.):** Reduce preterm birth, infants born prior to 37 completed weeks of gestation.

**Healthy People 2020 Objective MICH HP2020-9.1:** Reduce total preterm births.

**Proportion of Pre-Term Births, Infants Born Prior to 37 Completed Weeks of Gestation, Humboldt County and Nevada, 2000 - 2008.\***

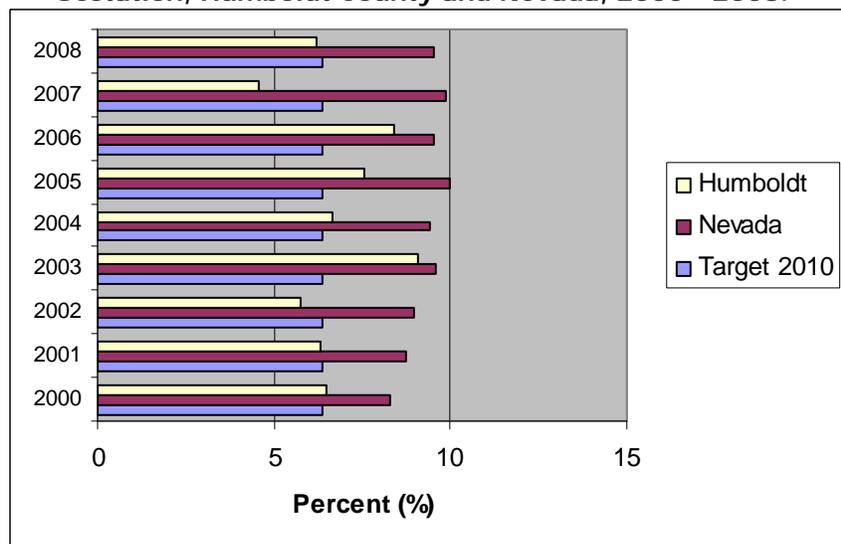

The percentage of pre-term births, infants born prior to 37 completed weeks of gestation, has fluctuated from 2000-2008 for Nevada and Humboldt County.

The county met the Healthy People 2010 goal of 7.6 percent in the years 2000—2002, and 2007—2008.

**Healthy People 2010 Objective (16-11b.):** Reduce the proportion of live births at 32 to 36 completed weeks of gestation.

**Healthy People 2020 Objective MICH HP2020-9.2:** Reduce the proportion of live births at 34 to 36 completed weeks of gestation.

**Proportion of Live Births at 32 to 36 Completed Weeks of Gestation, Humboldt County and Nevada, 2000 - 2008.\***

Since the year 2000, the percentage of live births at 32—36 completed weeks of gestation, fluctuated for Humboldt County and the state.

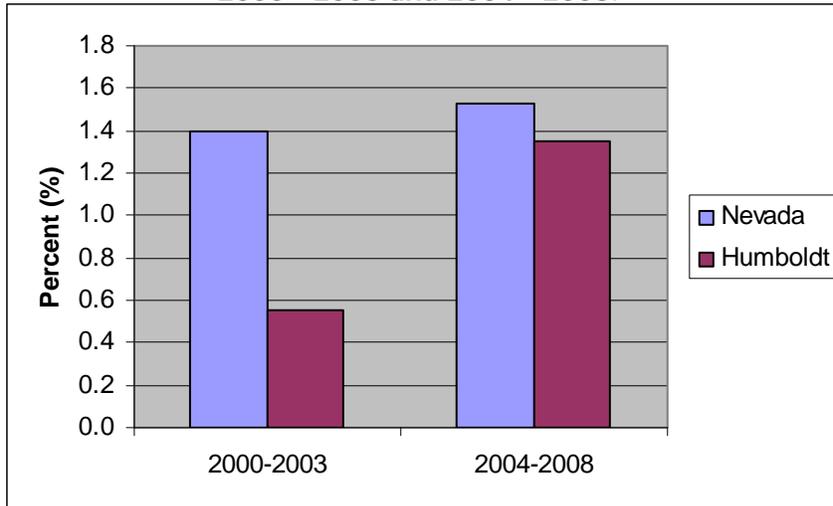

The Healthy People 2010 target of 6.4 percent was attained by Humboldt County in the years 2001—2002, and 2007—2008.

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-11c.):** Reduce the proportion of live births at less than 32 completed weeks of gestation.

**Healthy People 2020 Objective MICH HP2020-9.4:** Reduce the proportion of very preterm or live births at less than 32 completed weeks of gestation.

**Aggregated Proportion of Live Births at Less Than 32 Completed Weeks of Gestation, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The percentage of live births at less than 32 completed weeks of gestation, has increased for both Humboldt County and Nevada over the reporting period.

Prior to 2004, the county met the Healthy People 2010 target of 1.1 percent, but now is above it.

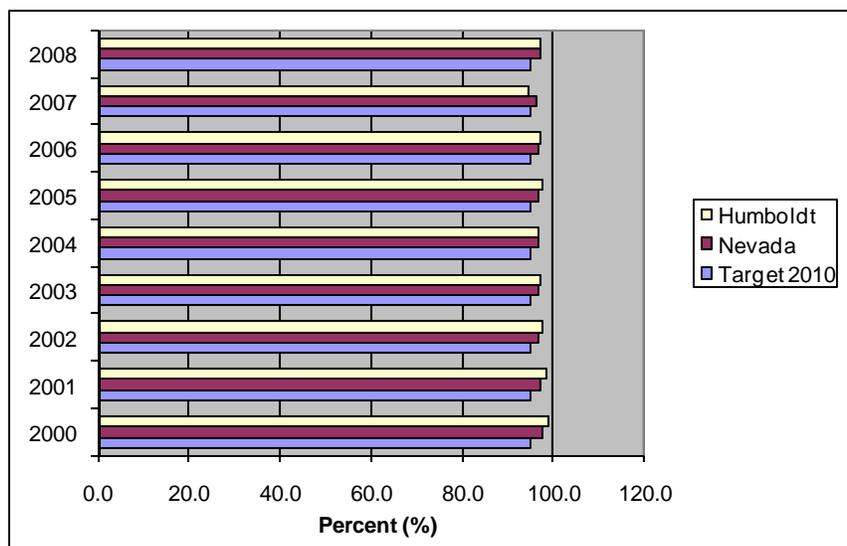

**Healthy People 2010 Objective (16-17a.):** Increase the proportion of pregnant women abstaining from alcohol.

**Healthy People 2020 Objective MICH HP2020-11.1:** Increase abstinence from alcohol among pregnant women.

**Proportion of Pregnant Women, Aged 15 to 44, Abstaining from Alcohol, Humboldt County and Nevada, 2000 - 2008.\***

From 2000-2008, the percentage of pregnant women abstaining from alcohol has fluctuated for Humboldt County and the state.

Humboldt County met the Healthy People 2010 objective of 95 percent in the year 2007.

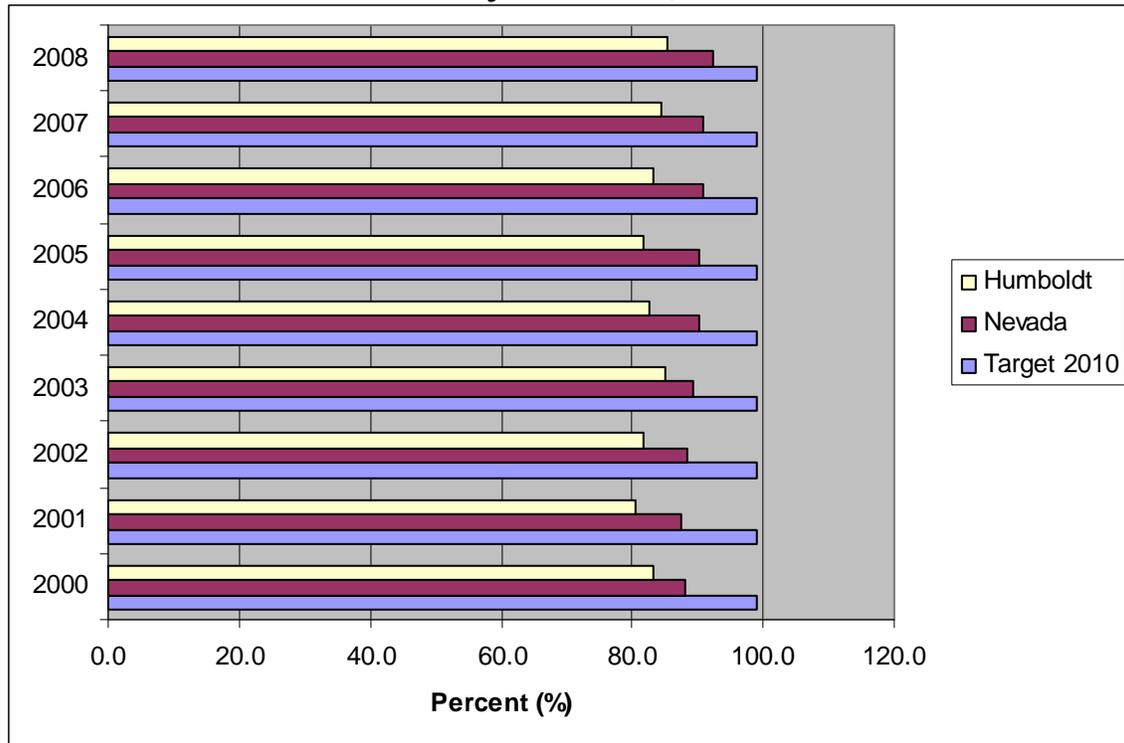

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

**Healthy People 2010 Objective (16-17c.):** Increase the proportion of pregnant women, aged 15-44 years, abstaining from cigarette smoking.

**Healthy People 2020 Objective MICH HP2020-11.3:** Increase abstinence from cigarettes among pregnant women.

**Proportion of Pregnant Women Abstaining from Tobacco, Humboldt County and Nevada, 2000 - 2008.\***

During the years 2000—2008, the percentage of pregnant women abstaining from tobacco has remained steady for Nevada. Humboldt County’s rate saw some fluctuation. The Healthy People 2010 goal of 99 percent was not met during these years.

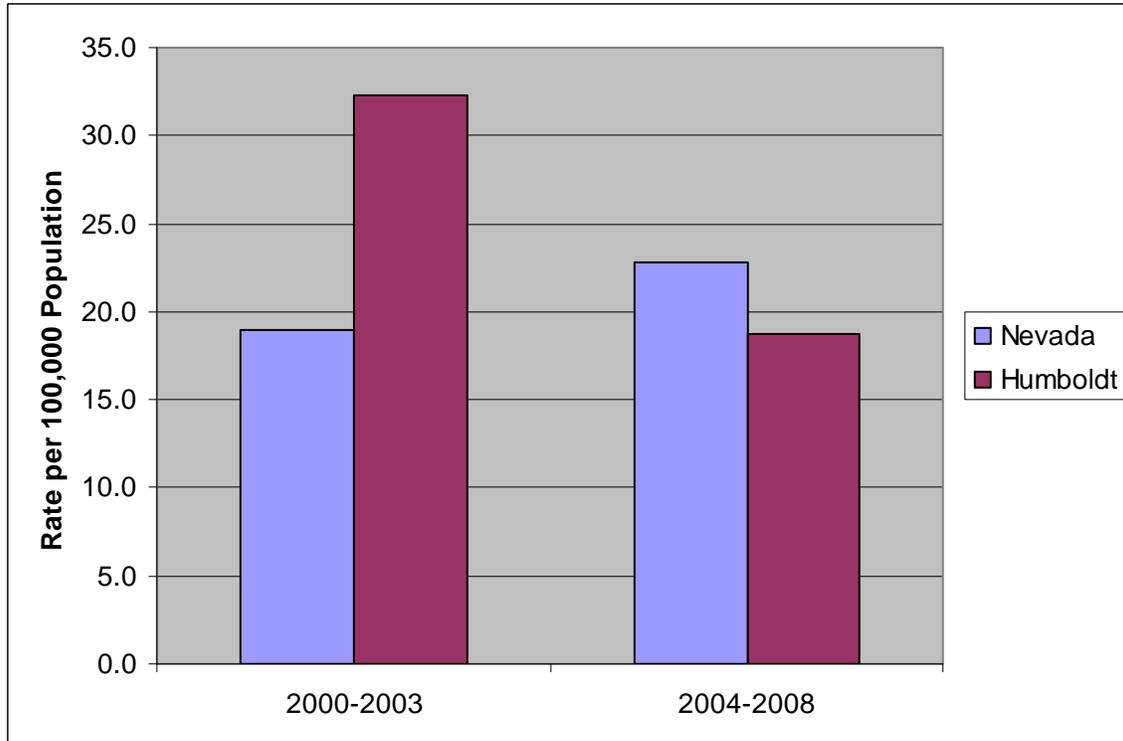

\*The Nevada data are from Nevada Vital Statistics Records.  
Note: 2008 data are not final and are subject to change.

# Mental Health and Mental Disorders

Healthy People 2010 Objective (18-1.): Reduce the suicide rate.

Healthy People 2020 Objective MHMD HP2020-1: Reduce the suicide rate.

Aggregated Age-Adjusted Suicide Death Rate, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\*

The average rate of suicide mortality decreased for Humboldt County during the years 2000 to 2008, while the Nevada rate increased. Neither has met the Healthy People 2010 target rate of 4.8 suicide deaths per 100,000 population.

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records (NVSR).

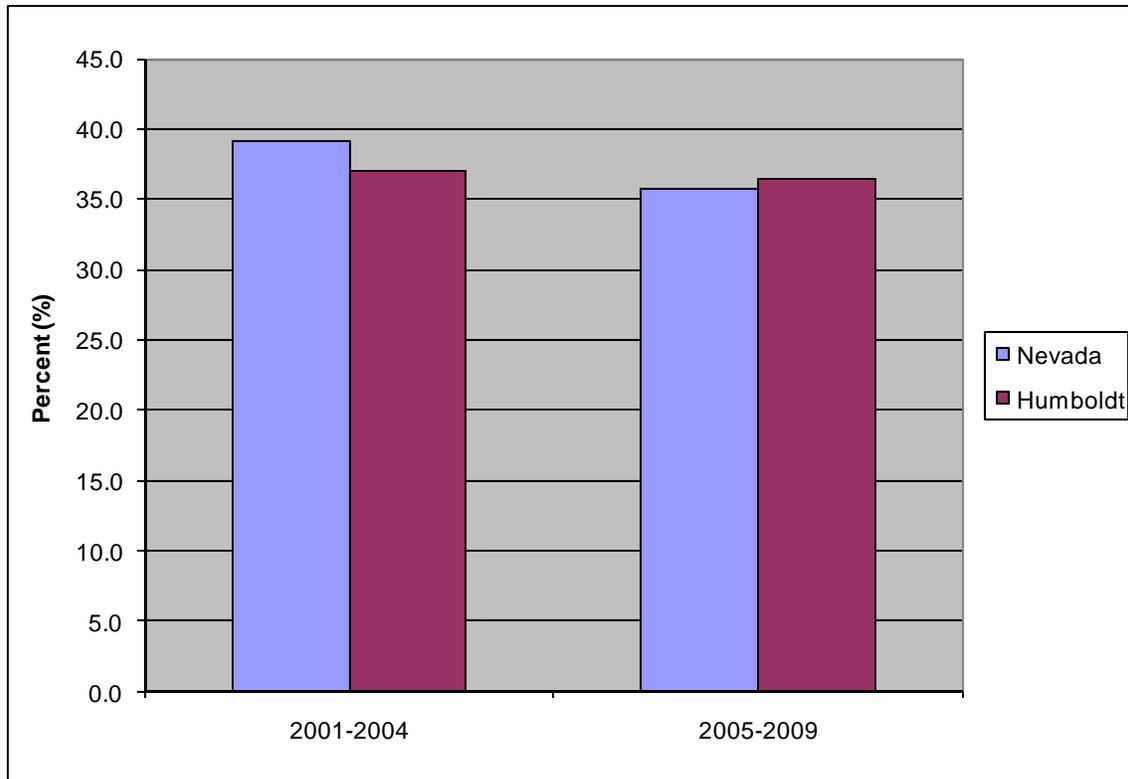

Note: 2007 and 2008 data are not final and are subject to change.

# Nutrition and Weight Status

**Healthy People 2010 Objective (19-1):** Increase the proportion of adults who are at a healthy weight.

**Healthy People 2010 Objective NWS HP2020-8:** Increase the proportion of adults who are at a healthy weight.

**Aggregated Proportion of Adults Who Are At a Healthy Weight, Humboldt County and Nevada, BRFSS Data, 2001 - 2004 to 2005 - 2009.\***

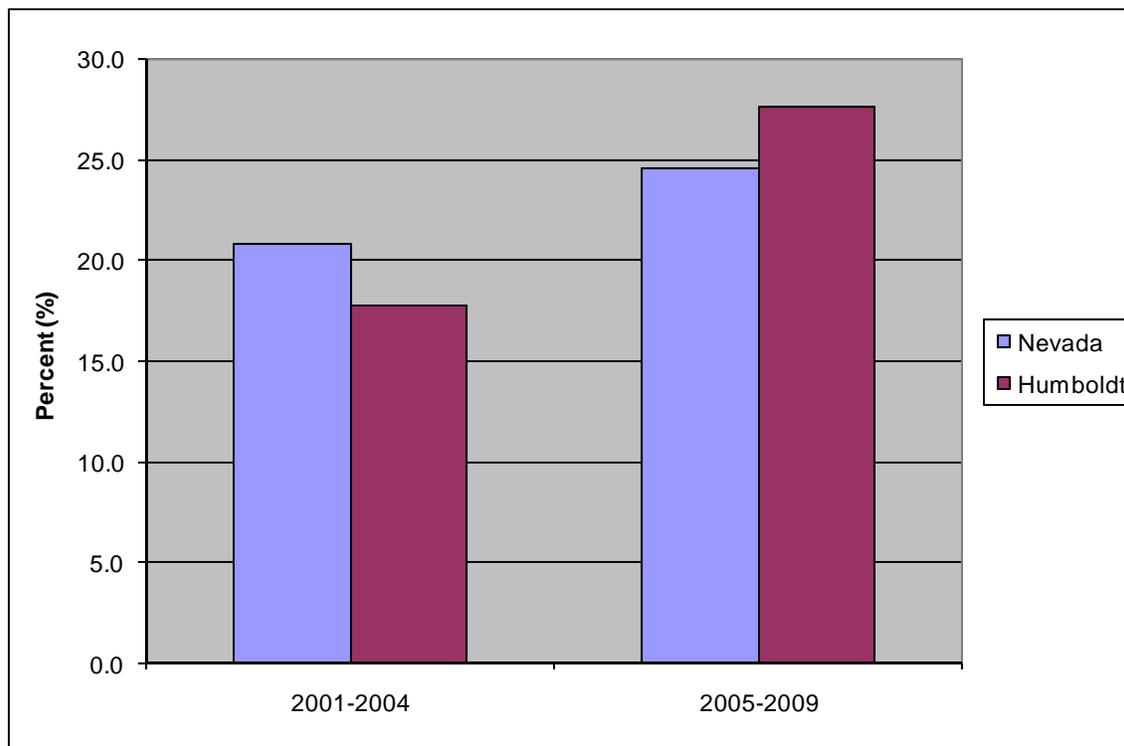

The percentage of adults who are at a healthy weight was higher for Humboldt County than the state from 2001-2009, however it did not reach the Healthy People 2010 goal of 60 percent.

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.  
Note: Body weight estimates from self-reported heights and weights tend to be lower than those from measured height and weight.

**Healthy People 2010 Objective (19-2):** Reduce the proportion of adults who are obese.

**Healthy People 2020 Objective NWS HP2020-9:** Reduce the proportion of adults who are obese.

**Aggregated Proportion of Adults Who Are Obese, Humboldt County and Nevada, BRFSS Data, 2001 - 2004 and 2005 - 2009.\***

Since 2001, Humboldt County's rate for adults who are obese was lower than the state rate. In 2005—2009, the percentage of adults who are obese was notably higher for Humboldt County than for Nevada. Both rates had risen during the second half of the decade.

The percentage of adults who are obese (BMI 230) increased for both the county and the state from 2001-2009. Humboldt County started with rates that met the Healthy People 2010 target of 15 percent, but surpassed it beginning in 2005.

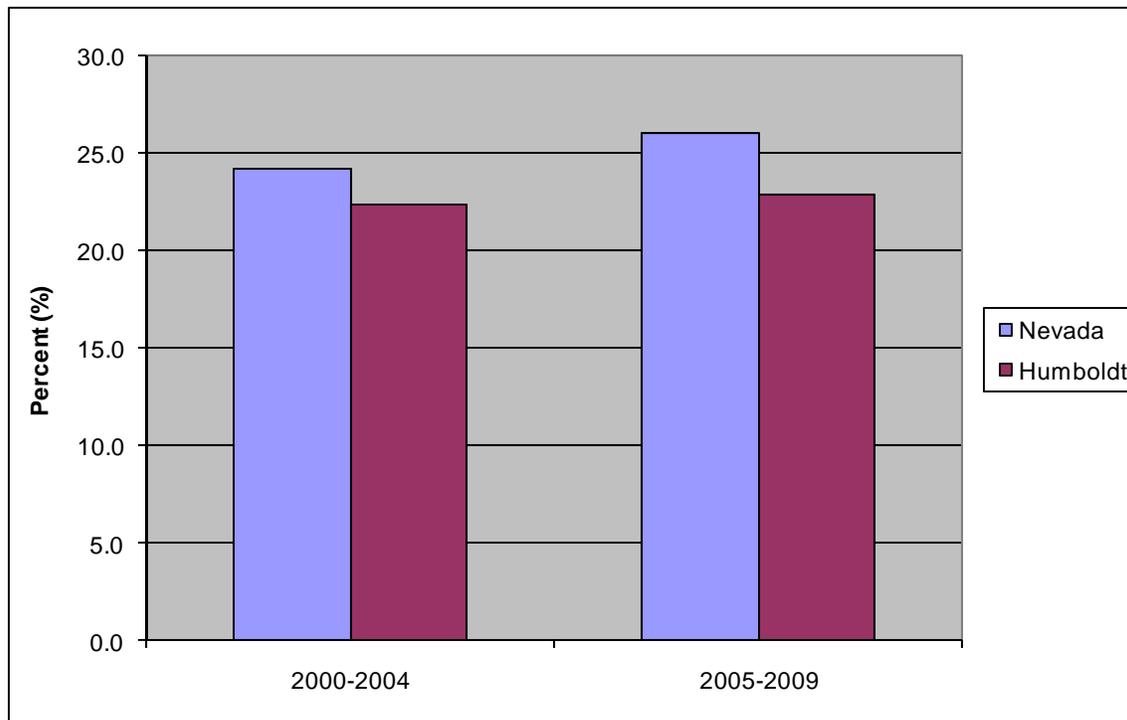

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results. Note: Body weight estimates from self-reported heights and weights tend to be lower than those from measured height and weight.

# Physical Activity and Fitness

**Healthy People 2010 Objective (22-1.):** Reduce the proportion of adults who engage in no leisure-time physical activity.

**Healthy People 2020 Objective PA HP2020-1:** Reduce the proportion of adults who engage in no leisure-time physical activity.

**Aggregated Proportion of Adults Who Engage in No Leisure Time Physical Activity, Humboldt County and Nevada , BRFSS Data, 2000 - 2004 and 2005 - 2009. \***

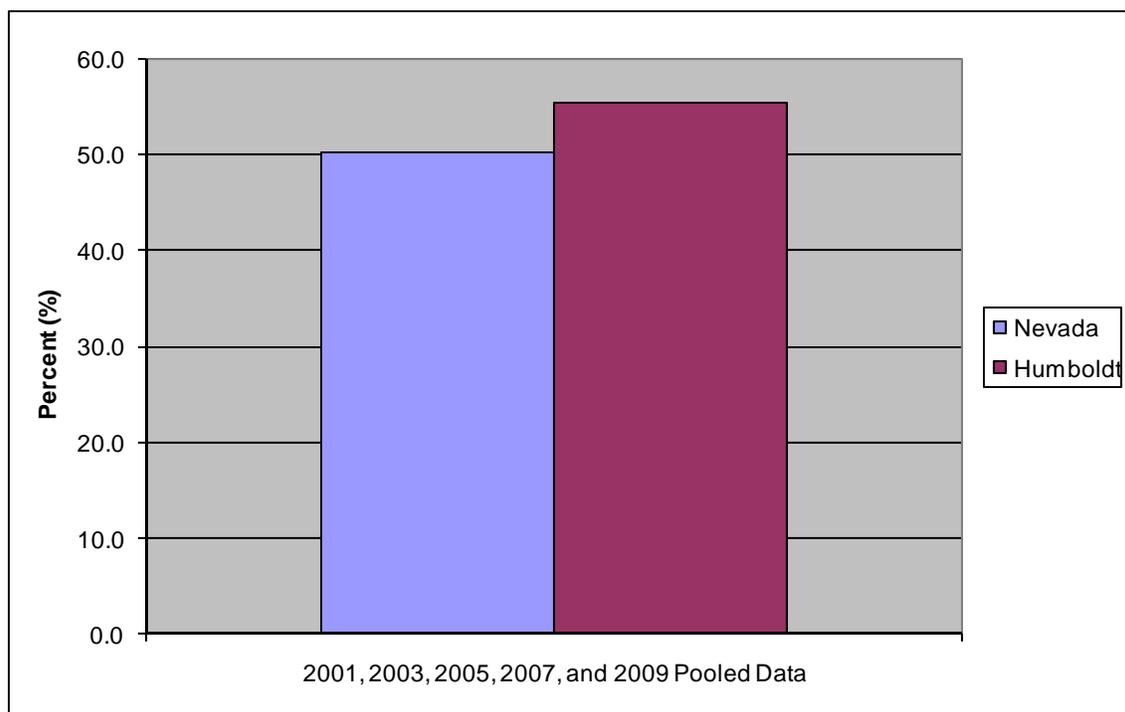

The percentage of adults who engaged in no leisure time physical activity increased for the state and decreased for Humboldt County over the years 2000-2009. Neither the state nor the county met the Healthy People 2010 goal of 20 percent.

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

**Healthy People 2010 Objective (22-2.):** Increase the proportion of adults who engage regularly, preferably daily, in moderate physical activity for at least 30 minutes per day.

**Healthy People 2020 Objective PA HP2020-2.1:** Increase the proportion of adults who engage in aerobic physical activity of at least moderate intensity for at least 150 minutes/week or 75 minutes/week of vigorous intensity or an equivalent combination.

**Aggregated Proportion of Adults Who Engage in Aerobic Physical Activity of At Least Moderate Intensity for At Least 150 Minutes per Week or of Vigorous Intensity for At Least 75 Minutes per Week or an Equivalent Combination, Humboldt County and Nevada, BRFSS Data, 2001, 2003, 2005, 2007, 2009.\***

The percentage of adults who engaged in aerobic physical activity of at least moderate intensity for at least 150 minutes per week or of vigorous intensity for at least 75 minutes per week or an equivalent combination, was higher for Humboldt County than the state over the years 2001-2009.

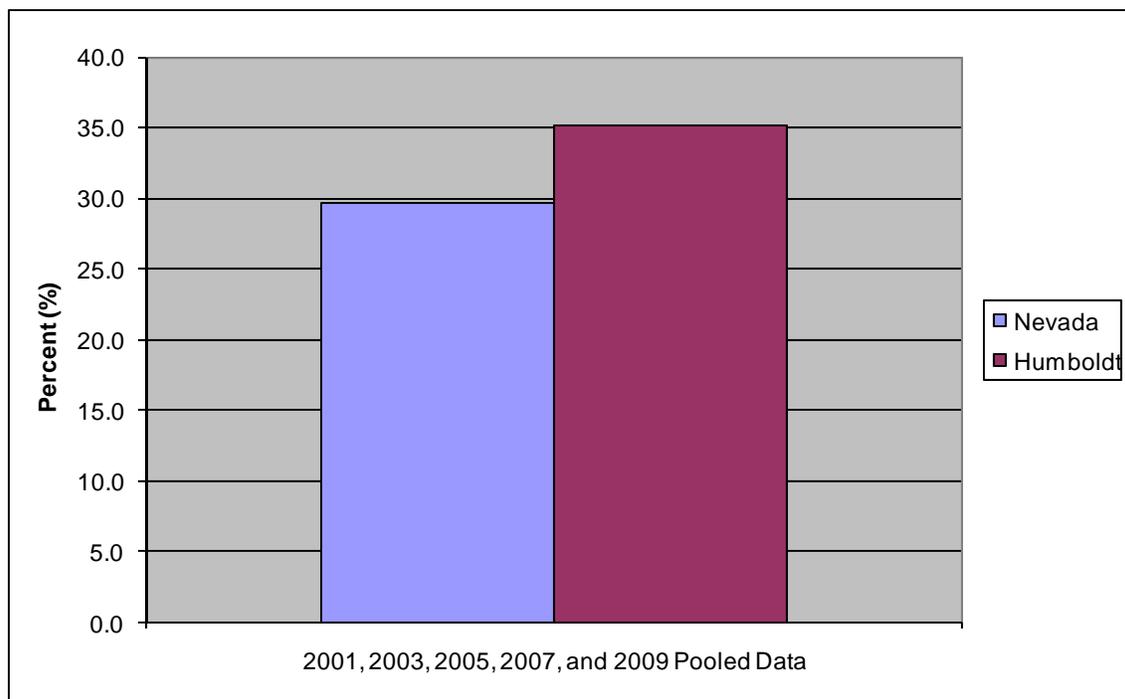

On the aggregate, both the state and the county met the Healthy People 2010 target of 50 percent.

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

**Healthy People 2010 Objective (22-3.):** Increase the proportion of adults who engage in vigorous physical activity promoting the development and maintenance of cardio-respiratory fitness for 20 or more minutes per day 3 or more days per week.

**Healthy People 2020 Objective PA HP2020-2.2:** Increase the proportion of adults who engage in aerobic physical activity of at least moderate intensity for more than 300 minutes/week or more than 150 minutes/week of vigorous intensity or an equivalent combination.

**Aggregated Proportion of Adults Who Engage in Aerobic Physical Activity of At Least Moderate Intensity for More Than 300 Minutes per Week or More Than 150 Minutes per Week of Vigorous Intensity or An Equivalent Combination, Humboldt County and Nevada, BRFSS Data, 2001, 2003, 2005, 2007, 2009.\***

The percentage of adults who engaged in aerobic physical activity of at least moderate intensity for more than 300 minutes per week or of vigorous intensity for more than 150 minutes per week or an equivalent combination, was higher for Humboldt County than the state during the reported years.

On aggregate, both the state and the county met the Healthy People 2010 goal of 30 percent.

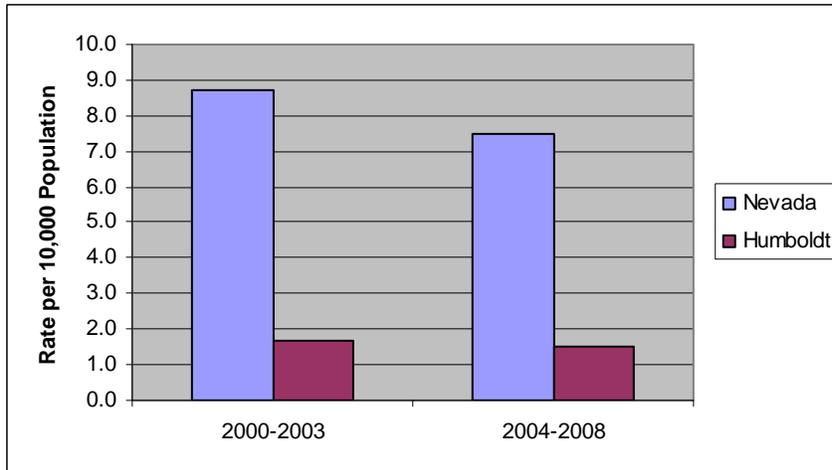

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

# Respiratory Diseases

**Healthy People 2010 Objective (24-2b.):** Reduce hospitalizations for asthma in children and adults, aged 5 to 64 years.

**Healthy People 2020 Objective RD HP2020-2.2:** Reduce hospitalizations for asthma in children and adults, aged 5 to 64 years.

**Aggregated Hospitalizations for Asthma in Children and Adults Aged 5 to 64 Years, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\***

The rate of asthma hospitalizations for children and adults, aged 5 to 64 years, declined for both Humboldt County and the state during the years 2000—2008.

Both the state and the county met the Healthy People 2010 target rate of 7.7 hospitalizations per 10,000 population during the period 2004-2008.

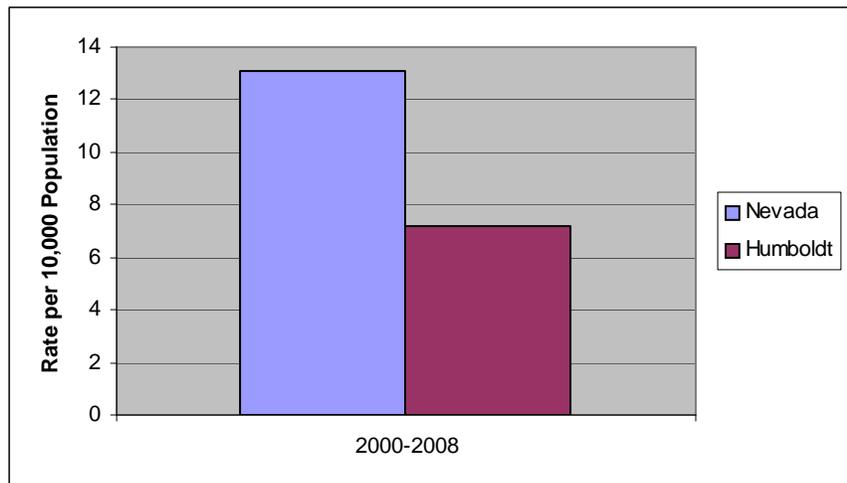

**Healthy People 2010 Objective (24-2c.):** Reduce hospitalizations for asthma in adults, aged 65 years and older.

**Healthy People 2020 Objective RD HP2020-2.3:** Reduce hospitalizations for asthma in adults, aged 65 years and older.

**Aggregated Hospitalizations for Asthma in Adults Aged 65 Years and Older, Humboldt County and Nevada, 2000 - 2008.\***

This decade, the rate of asthma hospitalizations for adults, aged 65 years and older, was lower in Humboldt County than for Nevada.

On aggregate, Humboldt County met the Healthy People 2010 target rate of 11 asthma hospitalizations per 10,000 population.

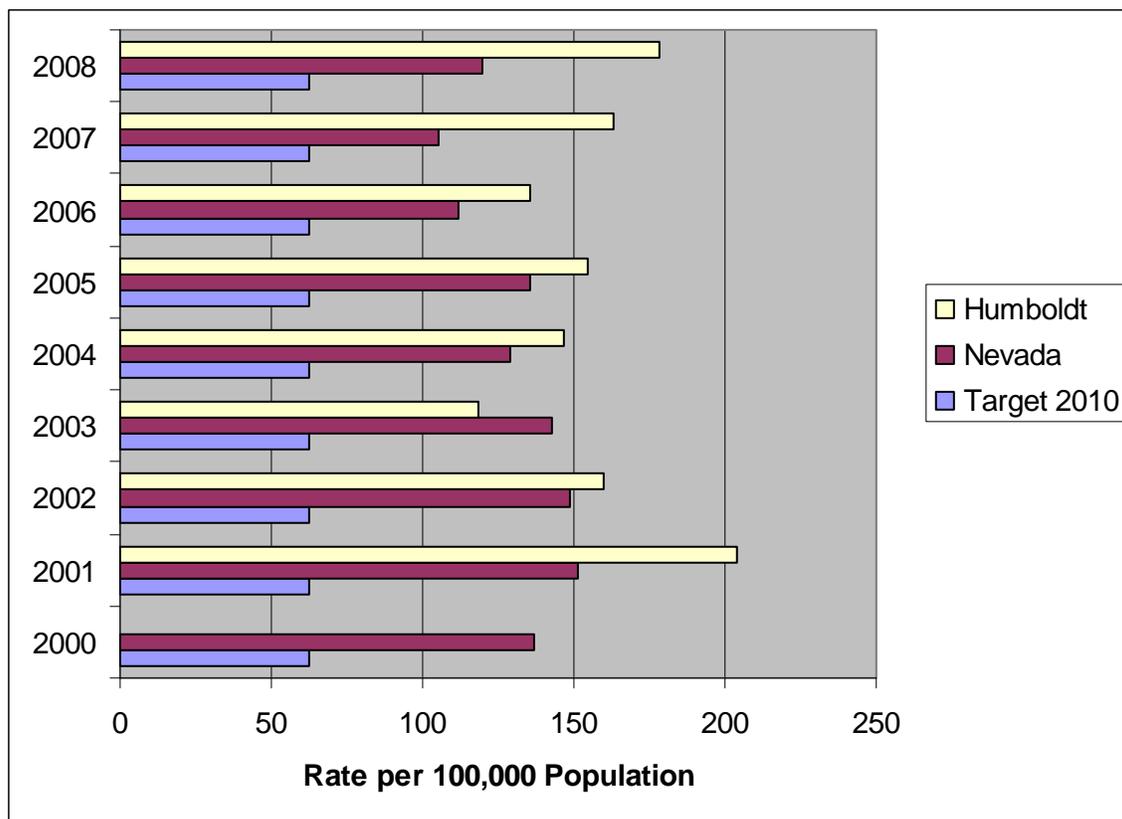

\*The Nevada data are from Nevada Inpatient Hospital Discharge Database (NIHDD).

**Healthy People 2010 Objective (24-10.):** Reduce deaths from chronic obstructive pulmonary disease among adults.

**Healthy People 2020 Objective RD HP2020-10:** Reduce deaths from chronic obstructive pulmonary disease among adults.

**Age-Adjusted Chronic Obstructive Pulmonary Disease Deaths, Humboldt County and Nevada, 2000 –2008.\***

The mortality rate for chronic obstructive pulmonary disease (COPD) fluctuated for both the state and Humboldt County between 2000-2008. Neither Nevada, nor Humboldt County, have met the Healthy People 2010 objective rate of 62.3 per 100,000 population.

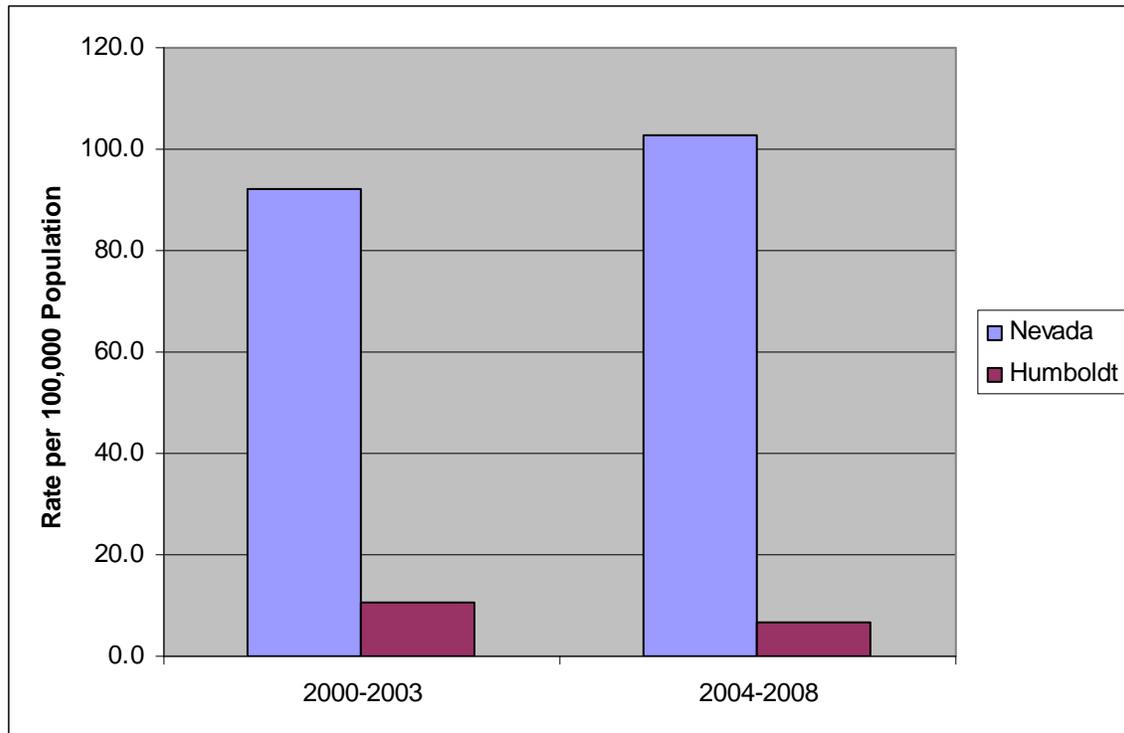

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

# Sexually Transmitted Diseases

Healthy People 2010 Objective (25-2a.): Reduce gonorrhea rates.

Healthy People 2020 Objective STD HP2020-6: Reduce gonorrhea rates.

Aggregated Rate of Gonorrhea, Humboldt County and Nevada, 2000 - 2003 and 2004 - 2008.\*

Over the years 2000-2008, the rate of gonorrhea increased for Nevada, and decreased for Humboldt County. The county consistently met the Healthy People 2010 target rate of 19 per 100,000 population from 2000-2008.

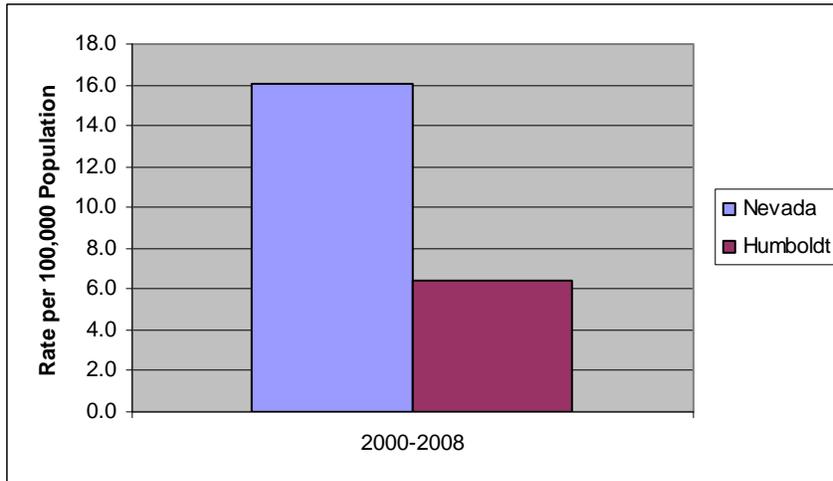

\* Nevada data are provided by the STD-MIS database.

# Substance Abuse

**Healthy People 2010 Objective (26-3):** Reduce drug-induced deaths.

**Healthy People 2020 Objective SA HP2020-12:** Reduce drug-induced deaths.

**Aggregated Age-Adjusted Drug-Induced Death Rate, Humboldt County and Nevada 2000 - 2008.\***

During the years 2000—2008, the drug induced mortality rate for Humboldt County was less than half the Nevada rate.

However, both the county and the state did not meet the Healthy People 2010 target rate of 1.2 per 100,000 population.

\*These rates are age-adjusted to the 2000 U.S. standard population. The Nevada data are from Nevada Vital Statistics Records. Note: 2007 and 2008 data are not final and are subject to change.

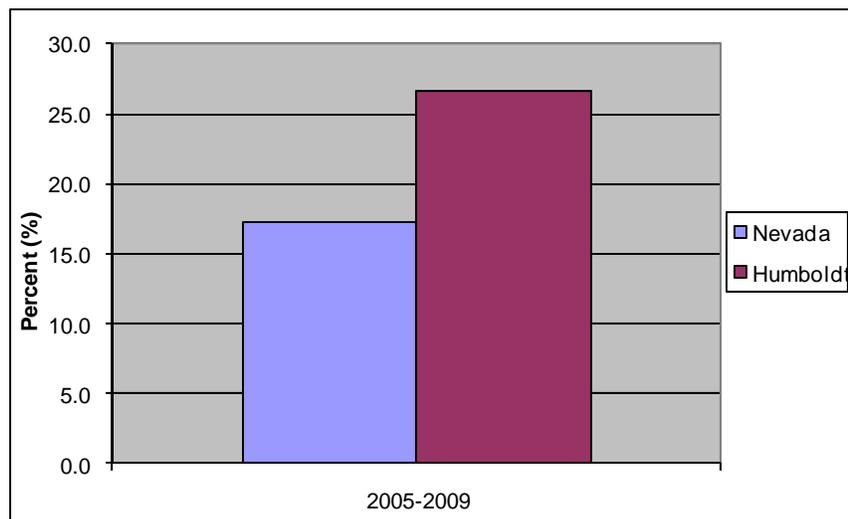

**Healthy People 2010 Objective (26-11c.):** Reduce the proportion of adults, aged 18 years and older, engaging in binge drinking of alcohol.

**Healthy People 2020 Objective SA HP2020-14.3:** Reduce the proportion of adults, aged 18 years and older, engaging in binge drinking of alcohol.

**Aggregated Proportion of Adults Aged 18 Years and Older Engaging in Binge Drinking of Alcohol, Humboldt County and Nevada, BRFSS Data, 2005 - 2009.\***

The percentage of adults, aged 18 years and older, engaging in the binge drinking of alcohol was reported higher for Humboldt County than Nevada from 2005-2009.

This percentage for both the state and the county are higher than the Healthy People 2010 target of 13.4 percent.

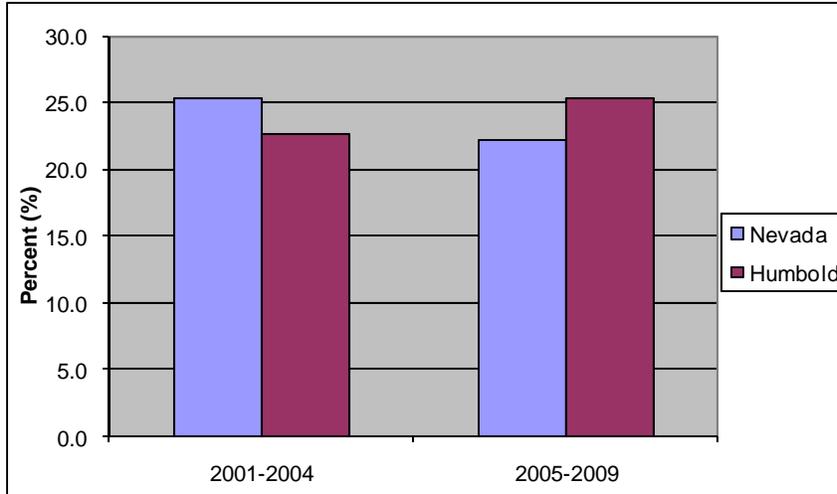

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

# Tobacco Use

**Healthy People 2010 Objective (27-1a.):** Reduce cigarette smoking by adults.

**Healthy People 2020 Objective TU HP2020-1.1:** Reduce tobacco use by adults – cigarette smoking.

**Aggregated Proportion of Cigarette Smoking Adults, Humboldt County and Nevada, BRFSS Data, 2001 - 2004 and 2005 - 2009.\***

The percentage of cigarette smoking adults decreased for Nevada and increased for Humboldt County since 2004.

Both the county and the state rate were higher than the Healthy People 2010 goal of 12 percent.

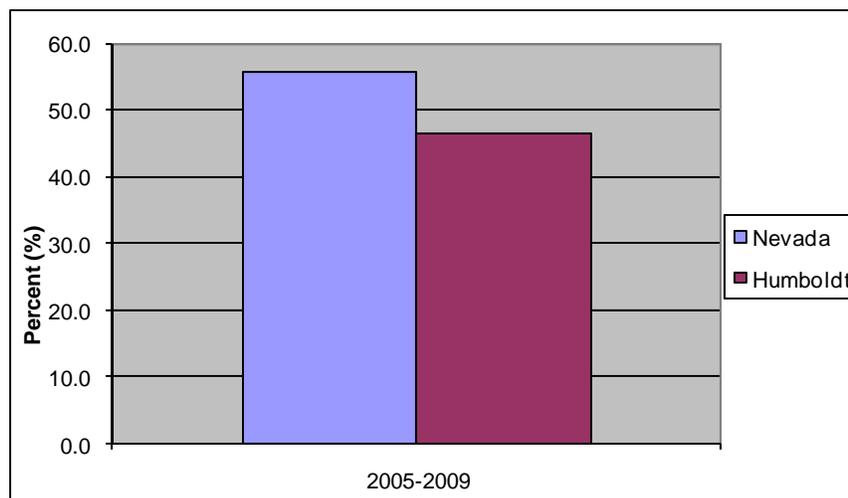

**Healthy People 2010 Objective (27-5.):** Increase smoking cessation attempts by adult smokers.

**Healthy People 2020 Objective TU HP2020-4.1:** Increase smoking cessation attempts by adult smokers.

**Aggregated Proportion of Adults Reporting Smoking Cessation Attempts in the Past Year, Humboldt County And Nevada, BRFSS Data, 2005 - 2009.\***

Nevada reported a higher number of adults reporting smoking cessation attempts in the past year than Humboldt County during the years 2005—2009.

Both the state and the county rate fell below the Healthy People 2010 target of 80 percent.

\*These percentages are weighted to survey population characteristics. Not all counties were included in the survey results.

## Healthy People 2010: Humboldt County Indicator Exemptions

The following Healthy People 2010 objectives were not reported in the Humboldt County Report due to a lack of available data:

- Adolescent Health (AH):
  - AH HP2020-1c: Increase the percentage of students whose reading skills are at or above the proficient achievement level for their grade.
  - AH HP2020-1d: Increase the percentage of students whose mathematical skills are at or above the proficient achievement level for their grade.
- Early and Middle Childhood (EMC):
  - EMC HP2020-3: Increase the proportion of elementary, middle, and senior high schools that require school health education.
- Family Planning (FP):
  - FP HP2020-9c: Increase the proportion of female adolescents aged 15 years who have never had sexual intercourse.
  - FP HP2020-9d: Increase the proportion of male adolescents aged 15 who have never had sexual intercourse.
  - FP HP2020-10e: The proportion of sexually active females aged 15 to 19 who used a condom at last intercourse.
  - FP HP2020-10f: The proportion of sexually active males aged 15 to 19 who used a condom at last intercourse.
- Immunizations and Infectious Diseases (IID):
  - IID HP2020-18: Percentage of children aged 19 to 35 months who receive recommended vaccines.
  - IID HP2020-20: Increase the percentage of children aged 19 to 35 months who receive the recommended vaccines.
- Injury and Violence Prevention (IVP):
  - IVP HP2020-13: Reduce physical fighting among adolescents.
  - IVP HP2020-14: Reduce weapon carrying by adolescents on school property.
- Mental Health and Mental Disorders (MHMD):
  - MHMD HP2020-2: Proportion of adolescents, grades 9 through 12, reporting suicide attempts in the past 12 months.
- Nutrition and Weight Status (NWS):
  - NWS HP2020-5c: Reduce the proportion of adolescents, aged 12 to 19 years, who are overweight or obese.
- Occupational Safety and Health (OSH):
  - OSH HP2020-7a: Work-related injury death rate, aged 16 years and older.
- Oral Health (OH):
  - OH HP2020-6a: Proportion of children aged 3 to 5 years with dental caries in primary and permanent teeth.

- OH HP2020-7a: Proportion of children aged 3 to 5 years with untreated dental decay.
  - OH HP2020-10b: Increase the proportion of children aged 8 years and older who have received dental sealants in their molar teeth.
- Physical Activity and Fitness (PAF):
  - PAF HP2020-7: Increase the proportion of adolescents that meet the current physical activity guidelines for aerobic physical activity and for muscle-strengthening activity.
- Sexually Transmitted Diseases (STD):
  - STD HP2020-3a: Reduce the proportion of females, aged 15 to 24 years with Chlamydia trachomatis infections attending family planning clinics.
- Substance Abuse (SA):
  - SA HP2020-4: Percentage of adolescents who report they rode during the previous 30 days with a driver who had been drinking alcohol, grades 9 through 12.
  - SA HP2020-7d: Proportion of adolescents engaging in binge drinking of alcohol.
  - SA HP2020-9b: Proportion of adolescents in the 10<sup>th</sup> grade reporting steroid use.
  - SA HP2020-9c: Proportion of adolescents in the 12<sup>th</sup> grade reporting steroid use.
  - SA HP1010-10: Reduce the proportion of adolescents who use inhalants.
- Tobacco Use (TU):
  - TU HP2020-6b: Proportion of adolescents reporting cigarette use in the past month.
  - TU HP2020-6c: Proportion of adolescents reporting spit tobacco use in the past month.

The following Healthy People 2010 objectives were not reported in the Humboldt County Report due to a lack of available data, counts of 0:

- Cancer (C):
  - C HP2020-4: Cervical cancer death rate.
- Food Safety (FS):
  - FS HP2020-3b: Rate of reported cases of Escherichia Coli 0157:H7.
  - FS HP2020-3c: Rate of reported cases of Listeriosis.
- Immunizations and Infectious Diseases (IID):
  - IID HP2020-4: Crude rate of reported cases of Meningococcal disease.
- Maternal, Infant, Child Health (MICH):
  - MCH HP2020-1f: Reduce infant death rate from birth defects.
  - MCH HP2020-1g: Reduce infant death rate from birth defects (congenital heart failure).
- Sexually Transmitted Diseases (STD):
  - STD HP2020-5: Reduce the rate of primary and secondary syphilis.

The following Healthy People 2010 objectives were not reported in the Humboldt County Report due to a lack of available data, counts below 5 but greater than 0:

- Blood Disorders and Blood Safety (BDBS):
  - BDBS HP2020-2: Reduce hospitalizations for sickle cell disease among children aged 9 years and younger.
- Cancer (C):
  - C HP2020-6: Oropharyngeal cancer death rate.
  - C HP2020-8: Melanoma cancer death rate.
- Human Immunodeficiency Virus (HIV):
  - HIV HP2020-1: Reduce acquired immunodeficiency syndrome.
  - HIV HP2020-4: Reduce the new cases of human immunodeficiency virus/acquired immunodeficiency syndrome (HIV/AIDS) diagnosed among adults and adolescents.
  - HIV HP2020-7: HIV infection death rate.
- Immunizations and Infectious Diseases (IID):
  - IID HP2020-3: Crude rate of reported new cases of Hepatitis A.
  - IID HP2020-5: Crude Rate of reported new cases of Tuberculosis.
  - IID HP2020-14: Reduce or eliminate cases of vaccine preventable diseases.
- Injury and Violence Prevention (IVP):
  - IVP HP2020-6: Pedestrian death rate on public roads.
  - IVP HP2020-27: Death rate from drowning.
- Maternal, Infant, Child Health (MICH):
  - MICH HP2020-15d: Neonatal death rate (within the first 28 days of life).
  - MICH HP2020-1a: Death rate of children aged 1 to 4 years.
  - MICH HP2020-1b: Death rate of children aged 5 to 9 years.
- Respiratory Diseases (RD):
  - RD HP2020-1a: Reduce hospitalizations for asthma in children under age 5 years.

The following Healthy People 2010 objectives were not reported in the Humboldt County Report due to a lack of available data, less than 50 BRFSS respondents:

- Cancer (C):
  - C HP2020-15a: Increase the proportion of adults who receive a colorectal cancer screening.
- Diabetes (D):
  - D HP2020-1: Proportion of persons with diabetes who receive formal diabetes education.
  - D HP2020-6: Increase the proportion of adults with diabetes who have a glycosylated hemoglobin measurement at least twice a year.
  - D HP2020-8: Increase the proportion of adults with diabetes who have had at least an annual foot examination.
- Oral Health (OH):

- OH HP2020-8a: Proportion of older adults aged 65 years and older reporting having all their natural teeth extracted.
