Division Chief Training &
Education – Retired
Orange Beach, AL

Newmont Mine Rescue

Jerry Yeager

Instructor & Safety Advisor
Nye County SAR Commander
Tonopah, NV

26TH
Annual

Rural Nevada

**Mark your calendar and
make hotel reservations now!
You will not want to
miss the 2017 EMS
Conference.**

We listened to you and read the evaluations, and have tried to meet your requests. You won't want to miss out on the pre-conference classes. They include Rope Rescue Basics for Emergency Responders, CEVO (Coaching the Emergency Vehicle Operator), Destination Unknown, ITLS ACCESS, Hazmat EMS, Basic Water Rescue, One Stop Shopping, and last but not least, Steve Murphy's - The Basics of Human Anatomy Cadaver Class. Classes will be held all day and into the night! Sign up now, as some of the classes have a limited amount of students.

Thursday night is MEGA CODE night. You will have a chance to practice your medical skills, get CEUs and eat PIZZA!

Throughout the conference, there will be several opportunities to gather information as to what's happening currently in EMS: patient report writing, how to write protocols that fit your needs, updated info on using O2 and spinal immobilization, just to name a few. Attend the Town Hall meeting or What's New in EMS class and find out what's going on.

As for the general sessions and breakouts: they are fantastic this year. How can they not be with Steve, Kirk and Rick?! We've included pediatrics, geriatrics, IV and lung sound refreshers, TRIAGE, Wilderness Medicine and many more.

We would like to thank Newmont Gold for being a major contributor to the conference again this year. We couldn't do it without you!

***Come join us for some learning, networking,
eating and having a great time.***

The University of Nevada, Reno is an Equal Opportunity/Affirmative Action employer and does not discriminate on the basis of race, color, religion, sex, age, creed, national origin, veteran status, physical or mental disability, and in accordance with university policy, sexual orientation, in any program or activity it operates. Its contents are solely the responsibility of the authors and do not necessarily represent the official view of the Nevada State Health Division or Emergency Medical Services Section.

Pre-Conference Sessions

The Basics of Human Anatomy

Steve Murphy

You asked for it – you got it! Murph is back with this 4 hour workshop to review the basic anatomical terms associated with the medical profession while combining several hands-on assessment techniques. A variety of pig parts will be used to compare their structure and function to that of human patients. Come join us in this fast paced, extremely useful HANDS-ON workshop. This class will offer a morning and afternoon session (**Pre-registration is required – limit of 30**)

Basic Water Rescue

Kirk and John Mittelman

Get your swim suits, bring your towel and goggles and join Kirk and John for a hands-on pool session. Topics covered include safety tips, rescue, packaging and resuscitation methods that may or may not only save the patient's life but keep the rescuer safe as well. **Please plan to get wet and out of your comfort zone! (Pre-registration required – limit 20)**

CEVO [Coaching the Emergency Vehicle Operator]

Newmont Mine Rescue

CEVO was first introduced in the 90's for fire, police and emergency medical personnel. Since then over 500,000 emergency responders have been trained with CEVO. What a great opportunity for individuals and services to take and learn how to properly drive emergency vehicles. (**Pre-registration required – limit of 20**)

Destination Unknown

Robert Elliott & Jerry Yeager

In this 8 hour, pre-conference course we will explore and demonstrate some basic survival and first aid skills, equipment and techniques with each student. Come prepared to be outside.

Training Location Base Camp: Elko Convention Center and outlying areas
Students will be required to spend much of this outdoor training in a field environment for the duration of training.

Hazmat EMS

Elko Fire Department

Check it out!! This class will cover the scope of NFPA 473 and the competencies required to fulfill this standard. Topics covered will include analysis of hazmat/WMD incidents to determine health hazards, development of a plan to deliver medical treatment to exposed patients, implementation of the prehospital plan and decontamination of any patient with potential harmful substance on them. Don't miss out. **(Pre-registration required – limit 30)**

ITLS ACCESS

John Mohler & Co

Emergency services personnel have all felt the frustration of losing patients because they could not gain access to them in a safe and expedient manner. The ability to treat them is hampered because of their entrapment in a vehicle. ITLS ACCESS addresses how to gain access to patients safely, quickly and efficiently, using only the tools that are carried or can easily be added to the emergency response vehicle. This allows us to **“give back” some of the Golden Hour** to the person who needs it most, the patient. **(Pre-registration required – limit 20)** (This class is being sponsored by Barrick Nevada and Small Mines Development.)

One Stop Shopping Part 1 – CPR Recert

Barrick NV Goldstrike Mine Rescue

Do you need to recertify your EMS certification this year? This 4 hour class will get you a new CPR card and you will be good to go for 2 more years! **(Pre-registration required – limit 20)**

One Stop Shopping Part 2 – EMT/AEMT Skills Check Off

Barrick NV Goldstrike Mine Rescue

Avoid the last minute stuff – EMTs and AEMTs can get their skills checked off and be ready to go to recertify. **(Pre-registration required – limit 20)**

Rope Rescue Basics for Emergency Responders

Newmont Mine Rescue

This session will be a hands-on approach to the basics of rope rescue work. Attendees will learn the basic of and have a chance to work with rappel lines, lowering systems, mechanical advantages and raising systems. **(Pre-registration required – limit of 30)**

Thursday

SEPTEMBER 21
