

ZOOM Into EMS 21-22

Date	Day	Time	Speaker	Session	Registration Link
9/23/21	Thurs	6 pm – 8 pm	Rick Howard	Nasal Cannulas Are Not Just For a Bump In Your O2 Anymore	https://emszoom21-nasal_cannulas.eventbrite.com
If we learned anything from Covid, it is that masks suck and that emphasis on oxygen exchange in the patients we treat is vital. We all believe that O2 can be good for you, but it really isn't if not done correctly. High Flow Nasal Cannula is very effective and can be used the prehospital arena.					
9/30/21	Thurs	6 pm – 8 pm	Brandon Howard	Improving CPR in Your Community	https://emszoom21-community_cpr.eventbrite.com
What can be done to improve the survival rates of cardiac arrests in your community? We will dive into the low hanging fruits, and some harder to reach along the whole Chain of Survival. We will dive into where your data goes, how to access it, how to measure and improve your EMS system with that data.					
10/14/21	Thurs	6 pm – 8 pm	Kerry Tuckett	How Far From the Patient? Uphill Both Ways!?! Wilderness Medicine	https://emszoom21-wilderness_med.eventbrite.com
Wilderness Medicine at its best! This class will cover the acronym LAST (Locate Access Stabilize Transport). Kerry will discuss ABCDE and how that affects transport. SOAP notes, bleeding control, splinting and spinal considerations will also be discussed.					
10/26/21	Tues	6 pm – 8 pm	Rob Carter	EMS Leadership and Serving Hearts. Getting Back to the Beginning.	https://emszoom21-ems_leadership.eventbrite.com
We will look at the natural evolution of an EMS career and how to stay focused on why we started in EMS in the first place.					
11/4/21	Thurs	6 pm – 8 pm	Kirk and Margaret Mittelman	Pediatric Potpourri	
Few calls cause great anxiety than caring for a sick or injured child. Pre-hospital care providers must be prepared for the challenges of a pediatric emergency. Prompt recognition and treatment of potentially life-threatening diseases or injuries may have a significant impact on the outcome of the patient. Kirk provide participants with information to assess and treat a variety of pediatric patients.					
11/18/21	Thurs	6 pm – 8 pm	Rick Howard	Home, Home on the Range	
Living on the farm can be a great life, except when you make the PTO mad and it fights back! Farming is a dangerous job, in fact, it ranks as one of the most hazardous industries. This class will explore the type of farm related injuries we may see and how to treat them.					

ZOOM Into EMS 21-22

Date	Day	Time	Speaker	Session	Registration
12/2/21	Thurs	6 pm – 8 pm	Rob Elliott / Jerry Yeager	Snake Safety, Relocation and Patient Treatment	
Hey, let's capture, relocate and release a snake! In this class, you will learn about snakes, recognize the need for PPE, how to safely capture, transport and release a snake and the recommended First Aid for a snakebite.					
12/16/21	Thurs	6 pm – 8 pm	Kirk and Margaret Mittelman	Critical Thinking – Lessons Learned From Two Old Farts	
Admit it; You are always wondering what old people talk about. Well here is a chance to listen in as Capt. Kirk and Professor Margaret go back in time and discuss their path through EMS. Although they have served different communities over the past 40 plus years, they work side by side in providing care on the streets. This session will provide case histories and some old EMS stories that we can all learn from. The common denominator in each scenario is using critical thinking skills in caring for our patients.					
1/6/22	Thurs	6 pm – 8 pm	John Mohler	Geriatrics - The Golden Years	
Ahh.. the Golden Years! This session discusses the challenges that confront EMS caregivers when caring for a geriatric patient. John will talk about physiological changes that the elderly undergo. He will share statistics and physiologic truisms relating to the geriatric patient.					
1/20/22	Thurs	6 pm – 8 pm	Rick Howard	It Only Take 8 Seconds	
What happens to your head as a 2500 pound bull steps on it or you slam it into a brick wall at 75 miles per hour? How can the brain box take the hit and still survive? What happens to the structures around the brain and what really happens to the brain will be discussed. How can we make the most of our treatment to minimize any long term issues for TBI patients?					
2/3/22	Thurs	6 pm – 8 pm	Lee Cabaniss	Paramedic Assist	
Often times, BLS providers will step aside when ALS gets to the scene. Join Lee to explore ways for BLS providers to assist ALS providers.					
2/17/22	Thurs	6 pm – 8 pm	Brandon Howard	START Triage	
Oh No! It's an MCI! Join Brandon for an interactive and fun review of sorting out critical patients based on the START triage method.
