Subject: Mandatory Vaccines
Date: Tuesday, August 17, 2021 8:15:53 PM

First, you must realize that the CDC recommendation comes from a flawed place. The leadership and the organization have become so politicized that they no longer have credibility with the people of this country. Nearly every aspect of the pandemic has been tainted with inconsistency, lies and political influence from the CDC, the news media and politicians.

We are Americans, we have the right to decide what medicines we will put into our body. The COVID vaccine is still considered experimental. There have been literally thousands of otherwise healthy people injured by the vaccines and over 12,000 have died as a direct result of the vaccines. The survival rate for Covid exceeds 99%. Does this make sense?

We are now seeing that the vaccine antibodies are diminishing after six months! Natural occurring antibodies from recovered Covid people/students can last a lifetime! Yet the CDC and the political powers are ignoring natural immunity and pushing for more shots! So wrong on so many levels.

The experimental vaccines are not safe, nor are they reliable.

I ask that you use sound professional judgment in protecting the rights and the well-being of the young people whom you govern over. Be an American hero. To force vaccines on our young adults is UnAmerican unacceptable and downright despicable.

Sincerely,

Tom Carmichael
