Subject: 8/20: Public Testimony/Opposition to Medical Mandates
Date: Tuesday, August 17, 2021 4:24:59 PM

Greetings,

I am a Nevada resident of almost 20 years and a registered voter.

I am a parent to five (5) children who have either previously attended, currently attend, or in the future, may attend colleges in our home State.

I am strongly opposed to the idea that current and future students of UNLV, UNR, and CSN would have to inject themselves with a non-FDA-approved pharmaceutical drug, or possibly be denied enrollment.

Please consider, how forced mandates eradicate freedom. Health freedom, medical freedom, religious freedom, and the ability for a competent person of sound-mind, to be able to choose what medical procedure they wish to participate in.

Students with medical conditions, unable to receive the vaccine, and those who practice religions which prohibit them from taking it, should not be discriminated against, denied an opportunity to enroll, or apply for graduation. If the proposal also attempts to separate or identify the injected versus uninjected (ie, by issuing colored stickers on student cards, different colored bracelets, special lanyards to wear, etc), this would promote a hostile environment, opening students up to discrimination, and possible targets of crime. Please do not pass policies that would make the unvaccinated second-class citizens to their vaccinated classmates; whether allowed to attend, but denied the ability to shop at the school's book store, be separated while dining in the campus cafeteria, or a separate section to study in the campus library.

This non-FDA-approved drug is being mandated, while the pharmaceutical industry remains a liability free industry. For those who will suffer a severe adverse reaction, up to death, will not have any way to be compensated or made whole again. Where there is a risk, there must be a choice. By forcing any mandates, you eliminate choice and true, informed consent.

Ultimately, you will force parents to send their children elsewhere and students will seek greener pastures in other States. For example, Arizona, Utah, Idaho, and Wyoming States refuse to impose medical mandates in their universities and community colleges.

There are moral, ethical, and legal issues at play, which are detrimental to the future, if ignored. I humbly ask that you remember the 1st and 14th Amendments of our Constitution, the Nuremberg Code of Ethics, and how the U.S. Supreme Court has

already ruled (time and time again) bodily autonomy to be a God-given right.

Respectfully,
Mary Lim
