I am opposed to this plan to intimidate, frighten and/or coerce Students into getting unproven, possibly dangerous vaccines that they do not need. People under 21 are least in danger from the covid. And the so-called Delta variant and other variants will be less-deadly than covid 19. This has been the case with every other virus. Many of us see this whole 'pandemic' as a plan to instill fear and obedience to a rogue government that IGNORES OUR CONSTITUTION and is thereby ILLEGAL. The Teachers' Unions have proven themselves to have absolutely NO CONCERN for the children and too much concern for themselves, some even using this viurs to turn teaching into a no-show, but get-paid job. We are not blind to what is being done in the name of covid. The people should not fear their government, but now many of us do.

Do not continue pushing the American people around like they are now doing in Australia and some European countries. We are a free and proud people and we will make out own decision regarding our health and the health of our children.
