Subject: Covid vacc mandate
Date: Tuesday, August 17, 2021 9:39:58 PM

Demanding that our future generation, take an experimental drug, forced upon a perfectly healthy young person so they may attend college, is inhumane. There is no science to back up claims that the vaccination even works.. This is dangerous, and I hope you, that consider this action, may also consider that in the future, you personally, be held accountable, for any and all medical damage, that will arise from this forced procedure. No on vaccine mandate
