Subject: vaccine requirement for UNR
Date: Wednesday, August 18, 2021 10:40:23 AM

Hello,

I am a parent of a child who will be going to UNR this fall. We (my daughter and I) are opposed to the vaccine requirement for the covid vaccine. Until this vaccine has been properly tested and approved we don't feel that it should be required. We understand people are afraid of covid and few people die from it, but the vast majority of people who get this virus survive. Forcing anyone to take an experimental drug is not something we can get behind. When I google "how long are drugs tested before they hit the public", the answer is anywhere from 10-12 years.... I feel like we should wait a little bit longer before requiring this drug/vaccine for anyone.

I hope you take thoughts like ours into consideration when voting on this requirement. My daughter will happily wear a mask and keep her distance in order to not have to take the shot until further test of this vaccine is done.

Thanks for reading our opinion...

Tonya Clements
