Why Say No?

- It is the first step toward mandatory statewide mandates.
- It bypasses our elected legislature.
- It will cause students to drop out and go elsewhere. It will harm funding for education.
- It's just wrong- an abuse of power by our government.
- Vaccines don't work anyway vs variants such as the Delta variant.
- It does not exempt the 10-33% of the estimated population that had Covid and have anti-bodies.*
- Expensive litigation will likely follow: the courts have generally upheld such authority (ie small pox) but there are legal differences here.

*CDC shows about 10% of the population (surviving) had Covid (36 million) but based on non-tested population with anti-bodies, estimates range from 15 to 33%.
