---

I am opposed to mandating vaccines for college students-or anyone.

Let me preface with I am a nurse, I am vaccinated, and I am pro-vaccination. I see the benefit of the vaccine, however I think it is wrong for anyone to be mandated to get the vaccination or any medical treatments! I understand and can support a mask mandate and regular testing. I cannot support a vaccine mandate. People have the right to decide what medical treatments they receive. Mandating vaccinations in colleges also can lead to a slippery slope where all schools including high schools, Jr highs, and eventually elementary schools and preschools will mandate vaccines and I for sure do not want to get my children covid vaccinated at this time with the limited testing done on children. I have rights to deny any medical treatment for myself and my children and that should not ever change for me or anyone else. Even though I am comfortable getting the vaccine others are not and it is not ethical to mandate a vaccine!
