Please do not make kids get this vaccine. They are not at risk of dying or even really having very many symptoms so mandating such drastic, illogical, controlling, manipulative measures would not be beneficial. I think you're going to have a revolt as parents wake up and see that this is not about a virus at all. The momma bears will come out to protect their children from this needless vaccine and there will be chaos. Please, we don't need this! Be reasonable and thoughtful. We need honesty about this virus, not fear. Please do what is right for the kids!!

Thank you,

Rachel Mangum
