Subject: NO Covid shots for NV college students
Date: Thursday, August 19, 2021 2:35:21 PM

Covid has a survival rate of 99.7%

Why are we FORCING people to get an EXPERIMENTAL shot when there are good therapeutics (hydroxychloroquine, Ivermectin, monoclonal antibodies, etc) that will cure the virus?

There seems to be a strange agenda - when you have to coerce/force people to take an experimental shot for a flu that 99.7% of people survive.

Is it greed? Or government control?

NO - do not make this mandatory for our students!
