**Subject:** Health Department, Vaccine

Dear Health Department,

I'm a mother of two children and they attend public school. In the near future Covid vaccines will be available for all children.

Please do not make Covid vaccines mandatory for children at schools, also don't allow mobile pop up vaccine tents available at schools.

Please go to [www.openvaers.com](http://www.openvaers.com) to see the adverse reactions and deaths from this vaccine. The manufacturer only needs to report 1-10% of their adverse reactions so it's much higher. Children ages 12-18 are experiencing heart inflammation and even death after receiving the covid vaccine. A healthy 13 year old boy passed away

after the Pfizer vaccine.

There are many breakthrough cases after the covid vaccine. Israel has the highest vaccine rate and most break through covid cases. They recalled the PCR test due to it being faulty and giving false positives. They don't test the customer for the variant. Maybe the variant is the vaccinated ones!

Many businesses and companies are being bribed, blackmailed, and censored. Many mothers like myself have experienced being censored on social media for speaking out. Please watch what is really happening. Please take all this into consideration so you won't make the covid vaccine mandatory. I think the Pfizer isn't FDA approved, but they just reinstated the EUA only. There are doctors out there that have a lawsuit to prevent children from receiving the covid vaccine. Many doctors are stating there are high levels of graphene oxide and sm-102 in the covid shot and is toxic to the body. Duckduckgo is the only way to know factual information. Google and other companies are being fact checked incorrectly. Also please don't make it legal for employers to make the vaccine mandatory as well.

Thank you!
