Subject: I refuse to give my child a vaccine that has known fatalities,
Date: Friday, August 20, 2021 8:13:20 AM

I refuse to give my child a vaccine that has known fatalities,

And is not approved by the FDA.

It is my right as a parent to say NO!

My child has all his vacation (FDA approved) UTD.

2 of my children suffered terribly after receiving the chickenpox vaccine. The FDA approved this vaccine in 1995, only eight weeks of testing. I was told it was safe. And I almost lost them both children because of it.

I refuse to go down that same road. My children suffered from febrile seizures till they were age 14. And they almost

Lost their lives on several occasions.

That was 13 years of severe stress and anxiety. praying my child was not going to die every day!

Nothing a parent should ever have to go through!

Not to mention the suffering of the Children.

I am not repeating this same mistake with this new vaccine!

My child wears a mask at school indoors and out, uses hand sanitizer after every class. And we wipe down his books and spray his backpack with disinfectant daily. And brings lunch from home.

Please do not pass this mandate!!

I will be pulling my child out of school

If this is passed!
