Subject: Proof of COVID-19 Immunization for Nevada Colleges

I believe requesting COVID-19 immunization status for Colleges is unconstitutional, unethical, immoral, an invasion of privacy, and UN-American. We live in a free country. Freedom of choice is something that makes America what it is. You cannot start picking away at basic freedoms without consequences to our individuality as well as our nation.

The Covid-19 “vaccine” is not even an approved or proven effective “vaccine”. The dictionary.com definition of a vaccine is:

“any preparation used as a preventive inoculation to confer immunity against a specific disease, usually employing an innocuous form of the disease agent, as killed or weakened bacteria or viruses, to stimulate antibody production.”

As the Covid “vaccine” does not confer immunity against a specific disease, it does not even qualify to be approved as a vaccine. Breakthrough cases of COVID-19 are rampant all over the world. Vaccinated people are getting the COVID flu, just as un-vaccinated are. I have never been an anti-vaxxer, but do not be fooled - this is not a vaccine.

According to the CDC website - there have been 6,789 deaths as of August 16th in the US from the COVID “vaccine”. -

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html> Never in our history have we had a vaccine with a reported death rate that is even close to this, and this is only the reported deaths in eight months! The majority of vaccine deaths are not reported. The Covid-19 “vaccine” is not fully tested and not even FDA approved - it can not and should not be mandated for anyone.

I am asking you to research - not just listen to mainstream media and the CDC, but speak with real doctors and immunologists. Find out the truth for yourselves - protect our freedoms as well as our health - responsibly and with real facts on the topic. I would encourage you to seek the facts on masks as well. America is a great nation, and we will survive this if we stand together and protect our freedoms.

Thank you,

Kelli Schamber
