Subject: vaccine mandate
Date: Thursday, August 19, 2021 9:47:47 PM

I oppose the removal of parental rights to choose what is best for their children as a parent and as a special education teacher. Throughout recent years, parents have been concerned about the impact of vaccinations on their children's health and development. This vaccine has not been researched long enough to understand the full impact on our children, therefore should not be mandated to attend school or any other childhood activities.
