Subject: Vaccine mandate
Date: Thursday, August 19, 2021 9:43:15 PM

To Whom It May Concern:

It was brought to my attention that the Nevada State Board of Health will be voting regarding vaccine mandates for students.

First of all, last I checked this is the United States of America, the most free country in the world. Your board has no right to make health decisions for other people's children and families. Families have been allowed to enroll their children in school without FDA approved and properly tested vaccines for decades, yet this experimental vaccine is one you wish to mandate. Unacceptable. This is a decision that PARENTS should make for THEIR CHILDREN, NOT YOU.

Everyone says follow the science...then follow the science and understand this is virus is approximately 99% survivable. 99% survivability should NOT result in a mandated vaccine with little data on long term side effects.

Who will be liable for damages if a child has an adverse event because YOU MANDATED an experimental vaccine? Who will provide compensation to the families whose child can no longer live a "normal" life because some group of people made a decision their parent should had a voice in making? Under the Emergency Authorized Use stays NO vaccine manufacturer can be held liable for damages. Are you willing to be the ones that take responsibility for any adverse events?

Children are the responsibility of their parents. Parents have the RIGHT to make the decisions that are best for their children. Shame on anyone who thinks they should be making personal choices for others who are capable of making decisions for themselves and their children. To mandate an experimental vaccine on others makes you tyrants.

Stand up for the people of Nevada. Do NOT force people to do something they are not comfortable with.

NO VACCINE MANDATES!!
