Subject: Mandatory Vaccinations for College Students
Date: Thursday, August 19, 2021 9:34:04 PM

Dear Health Department Board Members,

I am against the mandatory vaccine. Each person has an individual medical situation in which you are unaware. For you or the federal government to decide or prescribe a vaccine without being medically trained or reviewing patients history is unlawful and grossly negligent.

The vaccine is in trial period and to make people become trial recipients is also not legal. The Pfizer vaccine was tested on bats 80% died after they were given the vaccine. The other 20% died 24 hours later. The vaccine should have been stopped at this point. The vaccine contains Graphene Oxide which is a poison. They will say its not a listed ingredient but it has been traced down with the ingredient numbers and you can find it listed. As Bill Gates calls it a "trade secret" ingredient. You have the tools to research this, will you??

Mandating shots breaks title code 21 section 502 for drug safety- False and misleading labeling and the vaccine has no benefit to health not a vaccine in trial period
Section 501- contains toxin cannot mandate someone puts toxins in their body
Section 212.23 - prove safety in animals. Bats died and have a letter of intent to test pregnant rats. In the meantime we will give it to pregnant women?
Section 131242- there is shedding risk to child bearing age individuals.

If the vaccine works you should not care who doesn't get it, they would be taking their life in their hands and would not be affecting vaccinated people. If they are affecting vaccinated people then it doesn't work and no one should be forced to do it. Remember my body my choice? Millions of babies have been killed from those words so the same regard for my body my choice if I want a vaccine or not.

People can make their own decisions. If you want to go to school do so. If you don't you can choose not to. If our government was so concerned about our safety why are they letting Millions of people across the border without testing, vaccinating. Or even asking a single Covid question. Border should be locked down if we were in such an emergency covid pandemic situation. Start asking some why questions and quit allowing our children to be pawns in this "emergency pandemic" child survival rate is over 99% for covid. So we don't need to force them to be used as human testing rats in this vaccine trial.

I'm not sure where common sense has gone but is no longer common.

Concerned mom
