Hello Board Members

I am a 74 year old woman In the winter years of my life. Up until recently I was sharing these years with the other half of myself my beloved husband. Who had been my best friend since I was 4 years old and he was 6 years old. Covid-19 stole him from me, our children and our beautiful grandchildren. My son and daughter-in-law got this horrible disease but thankfully they survived. Currently three of my grandchildren are college students. Granted they are vaccinated but covid-19 has mutated into the Delta variant which is primarily hitting children in there 20's which my grand babies are. So Board members please mandate that NSHE be vaccinated. Help stop this disease before it can take one of my grandchildren. Please help stop this disease before it can Take someone else's beloved husband or wife. Help stop it before it can take someone else's babies.

Thank You

Carrol Eastman

A new widow, mother and grandma.
