---

Good morning,

In light of the new FDA approval of the Pfizer vaccine, I would still like to voice my opposition.

Please do not make this mandatory to attend a Nevada school. The long term issues arising from this vaccine are becoming more prevalent. I am not scared of Covid, as we are at very low risk, as healthy individuals. But, I am terrified of the possible side effects of the vaccine. They are negatively affecting people and the vaccines are only to prevent going to the hospital. Covid is still being spread at a rapid rate in vaccinated individuals. As a result of a mandate my daughter will have to drop out of college and will not be able to pursue a career in her field. Please allow people to have the right to choose.

Thank you for your time.

Hello,

My name is Krista Kalkoske and I strongly oppose the mandatory use of the COVID 19 vaccine on our Nevada students. Please put my opposition in record.

This vaccine has no long term studies of possible complications. This is an experimental vaccine and according to the FDA it does not Prevent a person from getting Covid. It is meant to keep people out of the hospital. People are still getting and transmitting the virus after being vaccinated. Children are the lowest at risk population, why should it be mandatory for them to have it?

The students in Nevada deserve to maintain their Constitutionally guaranteed right to say "no" to drugs for any reason. It is a violation of Nuremberg Code to force anyone to participate in a medical experiment (and with non-FDA approved drugs, these vaccines qualify as experimental). It is a violation of the 1st amendment to require anyone to violate his or her religious beliefs in order to participate in society and especially at publicly-funded schools.

There are no long term studies or statistics of possible long term health issues and complications from this experimental vaccine.

Please don't force our children to be subjected to such a mandate.

Krista
