Subject: Mandated Covid vaccines for everyone
Date: Monday, August 16, 2021 3:56:00 PM

Hi my name is Charlotte Stewart, I'm a mom and college student as well as an employee in a management position. First I would like to point out that if someone takes the vaccine and wants to donate blood for convalescent therapy their antibodies are erased and the Red Cross will not let them donate for this purpose. There is a study done by the Washington school of medicine out of St Louis that says if a person has natural antibodies they should last a lifetime. So if you force a vaccine that is untested and possibly kill natural Covid antibodies that is a tragic violation of a person's rights. Also, I will move; if I have to and take my tax money with me. This was is massive over reach in a sovereign nation. I guarantee you and your schools will be held financially and personally responsible for the massive amount of adverse reactions including death caused from these experiments. You have no idea the harm this might cause in two-five years. Please consider stopping this nonsense and bring back my body my choice.

Thank you,
Charlotte Stewart
