Subject: NV Schools Mandatory Vaccines
Date: Monday, August 16, 2021 6:07:55 PM

August 16, 2021

ATTN: NV State Board of Health,
Governor of Nevada
TMCC President
UNR President

RE: NV State Board of Health
Emergency Meeting Regarding Mandatory Covid Vaccines for NV higher education.

I am writing today with a simple statement that we, as life long citizens of Nevada are **STRONGLY** against any mandatory COVID-19 vaccine requirements for students. We are not opposed to vaccines or anyones personal medical decisions. However, the State of Nevada should not force students to take an experimental emergency use medical treatment against their conscience and personal medical concerns. This is a decision that must be left to the individual and their doctors. If these mandatory vaccines are required, many students will drop classes and move to schools with personal freedom of choice or that have distance/online programs. This is a move that will undoubtedly severally damage the revenue of the NV higher education system and continue to erode out trust in our civic leaders.

Sincerely,
Keller Hackbusch
Reno, NV
