Please add my public testimony to the 8/20/21 agenda. My name is Katrina Dahl and I oppose medical requirements on Nevada college students because no one should be coerced into taking a pharmaceutical. Thanks.

> Good morning. My name is (name) and I am a parent in Clark County. I understand you will pass and require this shot regardless our objections today, but I have to say, if this shot actually made you immune and stopped the spread then it would make sense to mandate. But it does not stop the spread or infection. (My fully vaccinated friend just tested positive COVID with symptoms.) You can not mandate a pharmaceutical drug that comes with risks. Please think about this.
