Subject: Vaccine Mandates for College
Date: Tuesday, August 17, 2021 7:01:42 PM

Mandating vaccines is going way too far. If this was really about people's health and safety, then the government should be mandating vegetables and making people submit their food journals. This is not about health this is about control. Our county is great because of the freedom it provides. Quit trying to control everyone. There is also the issue of segregation. Our country has tried segregation before, it wasn't fair then and it isn't fair now. What we need now is more love and acceptance not division and separation. It is very unwise to mandate something that has not had the usual safety trials, is not FDA approved, and the companies who produce it have been absolved of any liability. We should not force anyone to be human test subjects against their will. The Nuremberg Code's first point states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." There would be no voluntary consent if people are forced to participate in this vaccine experiment in order to attend college, this would be undue coercion. Please be logical in considering the long term effects of such an unethical choice. You should not even consider forcing people to inject something into their bodies, that is a gross violation of personal choice. You also have to look at data concerning survivability. Even if you contract Covid you most likely will NOT die. And if the vaccine and masks were so helpful in decreasing the Covid cases, why are we seeing the case numbers increase even while more Americans are vaccinated than ever?
